A NEW WOMAN.

New Takes "Quick Lunch" Like Male Philistines.

The new woman is becoming newer and newer as she grows older. This dentally clinches the control the facmay sound like a paradox, but the new woman knows better than that, says the New York Press.

The latest stride made by the new

woman is to sit up to a lunch counter versity council its name, a list of members and such statement of purposes and methwoman is to sit up to a lunch counter her coffee in a hurly-burly, as her repudiated lord and master does down-town in the middle of the day. There is a large dry goods store, where baris a large dry goods store, where bargains in ginghams, laces, jewelry and gloves are only a preliminary to the bargains in lunch that are offered in the newly fitted up lunch room in the place. Here the new woman sits

Eligibility to membership will be subject to such restrictions as may be required by the council.

Any organization which may be disapproved by the council shall cease to exist. The council will, at any time, have the right to disapprove of any existing or proposed organization. Here the new woman sits place. Here the new woman sits astride of her stool, orders her sandwich and "one in the dark" with the aplomb that comes to one sure of her position.

The new woman has taken to the

of warmth. She was a little doubtful about it when it was first proposed, but now that she has tried it she is more indignant with man than ever for keeping her in ignorance so long about this charmingly uncomfortable way of swallowing a meal.

The business and professional man, who is compelled to wrestle at a lunch counter every day, regards it as a great deal of a bore, but to the new woman it is a glimpse of a gastronomical para-

The experiment made by this particular store has proved to be so successful that it is certain there will be

dry goods stores. SHERMAN AS A BOY.

A Youthful Prank Recalled by Him After Gaining Fame. Among my school adventures at

Mount Vernon, says the Memoirs of Senator Sherman, was one I heartily regret. We had a teacher by the name of Lord. He was a small man and not able to cope with several of the boys in the school. We called him "Bunty Lord." One evening after school four boys, of whom I was one, while playing on the commons, found a dead sheep. It was suggested that we carry the

sheep into the schoolroom and place it

on Lord's seat. This was promptly done, and I wrote a Latin couplet, purporting that this was a very worthy sacrifice to a very poor Lord, and placed it on the head of the sheep. The next corping Lord found the sheep and the a great outcry against the indignity. Efforts were at once made to ascertain the actors in this farce, and proof was soon obtained. My handwriting disclosed my part in the case, and the result was a prompt discharge of the culprits from the school, but poor Lord lost his place because of his manifest inability to govern his un-

ruly pupils. Mailing a Bicycle.

to Paris by mail at a cost of a few pence looks like a yarn, but it is straight. The English parcels post now carries mail packages not over 20 pounds in weight, and not of a higher value than \$100, from any point in England to any place in France at what appears to be a ridiculously low tariff. The bicycle weighed just 20 pounds. The wheels and handle bars were removed from the frame, and carefully wrapped in heavy paper, so as to make a compact bundle, before the postage was paid, and when the wrappings were removed at the tourist's hotel in Paris the machine was in perfect condition.

The Prodigal's Return. in his own state, alluding to the civil war, suggested as a parallel case the price of standard Marquette and Gogeparable of the prodigal son and the joy-bic Bessemer will be \$4 per ton this ful reception at his home when the year with a differential rate against naughty boy returned. TIGHT LINES ON "GREEKS."

Specific Than Ever. The Christmas greetings to the departing students of the Chicago university came in the shape of an executive bulletin. It recites various rules and regulations lately passed by the faculty. The most important ruling affects the "Greeks" at the university, and inciulty now exercises over other organizations. All students in the future must conform to the following regulations:

Each organization will file with the uniods as may be required.

eq new woman has taken to the of the board of physical culture which will in the future be compelled to wear the regulation gymnasium suit.

THE HARRISON STATUE.

Placed in Position at Cincinnati and Will Be Unveiled in the Spring.
The equestrian statue of Gen. William Henry Harrison was erected on its pedestal in Garfield park, Cincinnati, the other day, in the presence of a throng of people. The statue was taken from its dusty resting place in the armory without any formalities, though it has languished there for the other lunch counters in big New York station. The rear doors were opened last three years for want of a worthy and a crowd of contractor's men entered. They laid rows of heavy scantling on the floor and placed rollers along them. It was a very simple task and one quickly done to roll the statue to the heavy low wagon that stood in the street. As soon as it was fastened securely in the bed of the wagon it was drawn by a four-horse team to the Vine street entrance of the park, where it was unloaded. It was carefully veiled and will remain in this condition till favorable spring weather permits its unveiling. At present no arrangements have been made for this ceremony beyond the selection of the orator of the occasion, Gen. S. F. Cary. The statue weighs six

THE BLENHEIM SPANIEL Most Lovable of the Four-Footed Pets of

Womankind. Of all the pets of womankind, babies alone excepted, there is nothing more lovable than the tiny Blenheim spaniel,

says an exchange. Why this breed of dogs have the name of the palace of the duke of Marlborough no one seems to know. The story goes, however, that the first duke had the breed, and that, on a friend's requesting a puppy, he refused to part with one, but, at the same time, took two or three blind whelps and threw

them to tame eagles. But in the year 1800 his grace, the duke of Marlborough, was reputed to possess the smallest and best breed of cockers (woodcock spaniels) in Britain. They were invariably red and white, with very long ears, short noses, and black eyes. They were evidently the ancestors of the present Blenheims, which are still bred by the keepers of the lodges at Blenheim and some of the inhabitants of Woodstock.

But there is little doubt that they have been crossed with the pug to give them the very short snub noses which they now possess. Moreover, the breed has become very delicate and difficult to rear. They suffer from brain disease, and are more likely than any other dog to die in puppyhood. "Idstone," the celebrated writer on dogs, remembers the time when the Blenheims were mainly bred in the vicinity of the pal-He suggests as a probable original of the Blenheim the Japanese toy spaniel. The surmise seems very prob-

HOW LIGHTNING KILLS. It Is the "Up Stroke" That Is Always

the Most Fatal. A new theory as to how lightning kills, but one which may well be held in abeyance until a clearer solution of it can be presented, is just now being urged by the scientists, says the St. Louis Republic. According to this new-fangled idea, a person is never "struck" by lightning at all—that is, in the general sense of the word quoted. The new theory is the result of deductions that have been made along the following lines: All life is electric. In the human body the stomach is the generator and the brain the battery. When a person is killed by lightning he is not "struck" at all, but dies because of a sudden loss of electric power which had been impelling his physical engine. The loss of this vital fluid, if such it may be called, is brought about in this manner: A thunderstorm is passing over. It is charged with positive electricity and the earth beneath is charged negatively. The human electric battery is between. If the cloud is charged heavily enough it saps the negative electricity from the earth, using the human being as a conductor, and finally leaves him lifeless by taking his electricity with that from the earth. This theory is in line with that which originated a few years ago and which was to the effect that it was the "up stroke" that kills.

POTATOES WERE EXPENSIVE. Big Bills Follow a Husband's Scheme to Hide Cost of Cigars.

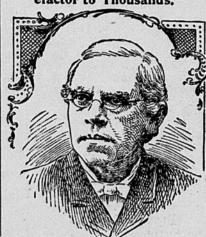

One of the funniest things that have occurred in Joliet during the present year, says the Joliet (Ill.) Republican, was the mishap of a gentleman who formerly lived on the west side, but is students, and all students | habit, by agreement with his grocer, of having his cigars and occasionally goods that were not exactly cigars charged up as potatoes. One evil day his wife took her pencil and began to reckon up the accounts. She finally found that the family had eaten over three car loads of potatoes in less than a year, and she just didn't believe that the account was correct. The smoker and the smoker's grocer were between the upper and the nether millstone for several days, and it was doubtful who finally an explanation was made that grocer's charge for potatoes.

> OCULIST EMPLOYS HYPNOTISM. Delicate Surgical Operation Performed

on an Illinois Patient. Dr. W. P. Biles, an oculist of Mount Vernon, Ill., the other day opened the lachrymal duct and removed a tumor from the eye of Philip Eitman, of Duquoin, the patient being hypnotized while the operation was in progress, instead of having chloroform administered, as is usual in such cases. Although the operation is one of the most painful known to surgery, the patient suffered no pain from the operation.

"DR. MILES,

Through His Nervine Is a Benefactor to Thousands."

WIDELY known Wisconsin publisher,

who resides at Green Bay, writes March 6th, 1895, as follows: "Five years ago I became so nervous that mental work was a burden. I could not rest at night on account of sleeplessness. My attention was called to Dr. Miles' Restora tive Nervine, and I commenced to use it with the very best effect. Since then I have kept a bottle in my house and use it whenever my nerves become unstrung, with always the same good results. My son also takes it for nervousness Dr. Miles' with like never failing Nervine success. I have recom mended it to many and

IN CASE OF WAR.

Fleet of 500 Torpedo Boats Would Be Necessary.

Estimated by Naval Officers That It Could Be Completed Within Eight Months -Naval Gun Foundry Working Nights.

The opinion expressed by Lieut. W. H. Slayton that a fleet of 500 torpedo boats would be necessary in case of war has been generally indorsed by naval officers. The question of building so large a number of such vessels did not seem to trouble them, for they called attention to the fact that when monimany inland cities, frames in others, while machinery and armament came from still other river and lake cities. All of the parts were forwarded to the scaport cities, and when put together the vessels were launched and

Difficulty of placing a sufficient number of gunboats and torpedo boats on lakes does not seem so formidable. Chicago Detroit, Cleveland, Buffalo, Cape Vincent and Ogdensburg would be the virtual launching ports for such ves-sels. New York could send boats of 150 tons through the canal to Buffalo and Oswego. Rochester could also put boats into Lake Ontario, while others could be forwarded through Lake Champlain into the lower St. Lawrence. Such boats could be built and launched at Pittsburgh, Cincinnati and Louisville, on the Ohio river, at New Orleans and St. Louis, on the Mississippi, and thence dispatched by water into the Gulf of Mexico and along the South Atlantic coast. Galveston and Mobile would be other points for building and launching. In the harbors of New York, Philadelphia and Boston, many gunboats and torpedo boats could be built and equipped. The same may be said of Bangor, Portland and other Maine The Pacific coast could also

By drawing on the resources of the ocomotive manufacturing companies at Paterson and other interior cities, a great deal of work could be done in a very rapid manner. The rolling mills and machine shops in all states might be called upon, and an astonishing

mount of work accomplished. Taking these facts into consideration, it is within the range of possibility for the United States to place in commission 500 gunboats and torpedo boats inside of eight months. Half of this number would be in the water in four

or five months. The fact leaked out the other day that orders have been issued from the navy eight o'clock and remained in the shops until six o'clock in the morning. Nightly hereafter until the ordnance to be got ready is completed the night force will be kept on.

LOOKS LIKE A MINT SCANDAL.

ver Dollars It Cannot Account For. mint scandal. The state board of ex- tint, and is covered with a red clayey would be pulverized the finest, but aminers have discovered 73,000 bright soil about one inch thick. In this new silver dollars in the state treasury, state the blocks are purchased by dealmollified the wife, even if it didn't all of which bear the date of 1893 and ers on the spot, not by weight nor by satisfy her as to the correctness of the have the appearance of having been measurement. These rough blocks are dumped in there fresh from the United | dried and subjected to a certain prep-States mint. The coinage of standard aration before being conveyed to Eskidollars at the Carson mint was always Sherhir. Some of them are as small limited and wholly suspended early in as a walnut, while others attain the size 1893, and it is asserted that no such of a cubic foot. Those which combine amount as \$73,000 was legally coined regularity of surface and size are the that year.

The question naturally arises, where did these dollars come from? They is long and costly. The clayey soil were not paid into the treasury in the attached is removed and the meerregular course of business and many schaum dried. In summer exposure hold the opinion that the silver bullion for five or six days in the sun's rays sufto this amount was clandestinely coined fices, but in winter a room heated to into standard dollars at a profit of the required temperature is required, about 38 per cent. and exchanged for and the drying process takes eight or gold in the treasury, thereby netting a ten days. When well dried the blocks profit for those concerned of about are well cleaned and polished. ROMEO AND JULIET AGAIN.

Montague-Capulet Love Tragedy in Real

Life in Austria. An extraordinary love tragedy, re-calling the story of Romeo and Juliet, is reported from Altfoldt, Irma, says a Vienna letter to the London News. Some time ago the daughter of a highly respected family made the acquaintance of an employe of the local administration, whose uncle is one of the princes of the Hungarian church. The two fell deeply in love and often met by stealth, as the young man's parents could not forget a lawsuit they had had with the girl's family and which was decided against them. The girl's father, who was once a millionaire, but tors were built during the civil war they were manufactured all over the country. Plates were made according to scale in Plates were made according to scale in whom speculation had reduced, tried succeeded, however, in getting a dispensation through his clerical uncle, and a secret marriage was performed.

The girl's parents again made a violent scene to induce her to marry the land owner. She took their words so much to heart that she took a large dose of opium and next morning was found unconscious in her bed. The young husband, hearing the news, ran to the house and in the general confusion entered the room. Seeing her pale and motionless and believing her to be dead, he blew his brains out with a revolver he had brought with him. The report awoke the young woman, whom the opium had held in a trance. When she saw her lover lifeless on the ground near her she took the revolver from his dead hand and shot herself.

QUEEN AND THE "ORB." How the Brave Girl Suffered Silently at

In the coronation the ceremonies lasted more than four hours, and throughout the queen played her part with wonderful composure. Care, says a writer in the Westminster Budget, had been taken to provide a crown suitable for her small head, but no one had thought about reducing the size of the orb which she was required to carry in her tiny hand. "What am I to do with it?" she asked

in concern. "Carry it, your majesty," replied Lord John Thynne.

"Am 1? It is very heavy," the queen answered in a tone of amazement. However, it was too late to protest, and she obeyed the exigencies of the situation. A worse mistake had been made with regard to the ruby coronation ring. The jeweler had made it to fit her majesty's little finger, whereas the arch bishop declared that according to the rubric it must be put upon the larger finger, and accordingly forced it into that position. The queen bore her now a resident of the city, and whose wife ran the store bill and looked after the household expenses. He was in the Wednesday night the first gang of workdnesday night the first gang of work- swollen that it had to be bathed in ice men was put on.
