Another important feature will be the high ceiling being more than thirty feet in height and there will also be a balcony. The stage which is also a very important feature in this building, will have an opening of thirty feet making the stage 30x62 feet, being the same as that in the Dauphine Theatre in the City.

Another feature of the building will be that there will be no obstructions such as large posts, etc., the roof being supported by steel trusses. The equipment in this theatre will be modern in every respect being obtained from the best houses in the country producing this class of goods.

This big Theatre building as is well known, is to be located where the Play Grounds is at present located but Mr. Foto the owner of the grounds, has already made arrangements to see that all of the paraphernalia of the Play Grounds will be transferred to another location which will be acceptable to the Play Grounds Commission and the ladies on this side of the River who have been so vitally interested in this. Not only will all of these things be removed but Mr. Foto also agreed to install them at the new premises in the same condition as they are at present, free of all cost to the Play Grounds Commission. We understand that Mr. Peter Vezien, who owns the three large lots of ground adjoining the Avenue Theatre has given his consent to have the play grounds removed there which is only a very short distance from the present location. There is no doubt but that this will be absolutely agreeable to those concerned.

The boy said that he jumped on the front of the car to take a ride and when the car was in the middle of the block the conductor halloed at him and frightened him which made him jump from the car and it was this jump that caused him to fall under the wheels. To boy also stated that he was not a passenger on the car but merely jumped on to take a little ride for a block.

FOTO FOLLY THEATRE

Contract Let to A. Roupich—Twenty-Five-Thousand-Dollar Investment To Be A Reality.

To say that Philip Foto has confidence in the future of this District is to state plain facts regarding the big improvements he is shortly to begin at the corner of Nunez and Opelousas Avenue on the piece of property recently purchased from the Cumberland Telephone and Telegraph Company. These lots of ground perhaps brought the highest price ever paid in our District for vacant land and being centrally located they are ideally situated for the purpose for which they will be used.

The picture shown is an exact reproduction of the water color painting of the new theatre, the work upon which will be begun with a very short time. The architect, Mr. W. E. Burke has been busy with these plans for many months looking into every detail in connection with the construction of theatres of this variety.

To look at the photograph above we must agree with Mr. Foto that he has confidence in the future prosperity of our section and it is up to the Algiers people to give him that kind of support to keep Mr. Foto an optimist.

The Foto's Folly Theatre will have a frontage of sixty-two feet with a depth of one hundred and seventeen feet and a seating capacity of one thousand, two hundred. The patrons of this big show house will have the pleasure of being seated in very latest opera chairs spaced at a distance apart that will give absolute comfort not usually found in the ordinary up-to-date picture show.

Another important feature will be the high ceiling being more than thirty feet in height and there will also be a balcony. The stage which is also a very important feature in this building, will have an opening of thirty feet making the stage 30x62 feet, being the same as that in the Dauphine Theatre in the City.

SHOOTS NEGRO.

Oscar Brooks, a negro youth, was shot twice in the thigh by Manrice Kass, a McDonoghville dairyman, Sunday afternoon. Brooks and four companions approached Kass with two sacks of wheat which they tried to sell him. Kass, suspicious, asked the negroes where they obtained the wheat, whereupon they dropped the sacks and started to run. Kass grabbed Brooks, who, however, after a scuffle, got away.

Brooks ran as far as the outfall canal in the rear of Algiers, Kass following and firing at him. The negro jumped into the canal and was fished out by Kass, who then discovered that Brooks was wounded. Kass communicated with the Algiers police, who took him in custody and later turned him over to Deputy Sheriff John Pfeiffer, by whom he was paroled by orders from Sheriff Marrero. Brooks was sent to the hospital, his condition being serious.

Charges have been made against Brooks and his companions for stealing the wheat from Southern Pacific box cars.
