NIGHT AND DAY CAMP IS LIFE SAVING STATION

Tuberculosis kills 150,000 persons in the United States every year. These two women escaped. They are shown in the Night and Day Camp conducted by the St. Louis Society for the Relief and Prevention of Tuberculosis. They are among the fortunate ones because they knew how to take care of themselves when this great menace threatened them. They knew that the cure lies in plenty of fresh air, even if the temperature is away below freezing, sunlight, good food and rest under proper medical supervision. Tuberculosis is not only curable but is preventable as well.

The prevention lies largely in right living, in building up a strong bodily resistance. Eight out of ten persons are infected at some time in their lives, according to figures of the National Tuberculosis Association, the leading agency in the United States in the fight upon this disease. This organization is sponsor for the annual Red Cross Christmas Seal sale, from which the fueds to carry on the work throughout the year are chiefly derived.

And so, Congress, weighing the ifs and ands of the storage problem has decided in its favor, but is intent on maintaining stiff rules and bylaws in order that the thing may be done right.
