1. I make my main objects to make good spellers, good writers, good readers, and quick at figures.

2. I cannot say that I make those my main objects. I look at the school as a community: I try to have all cheerful and happy; to have all industrious; to have a spirit of helpfulness; to scorn meanness; to be interested in the great achievements of the human race; to want to find out about the world they live in; to aim to be in a better and more advantageous position to-day than yesterday.

Twelve years ago J. W. Sallivan, of Hartford, Conn., scratched his leg with a rusty wire. Inflammation and blood poisoning set in. For two years he suffered intensely. When weak, in low spirits, no cheer, no spring, when rest is not rest and sleep is not sleep, we are starved; our blood is poor; there is little nutriment in it.

The Change of

Life Is the most important period in a woman's existence. Owing to modern
methods of living, not one woman in
a thousand approaches this perfectly
natural change without experiencing
a train of very annoying and sometimes painful symptoms.

Those dreadful hot flashes, sending
the blood surging to the heart until it
seems ready to burst, and the faint
feeling that follows, sometimes with
chills, as if the heart were going to
stop for good, are symptoms of a dan-

gerous, nervous trouble. Those hot flashes are just so many calls from nature for help. The nerves are crying out for assistance. The cry should be heeded in time. Lydia E. Pinkham's Vegetable Compound was prepared to meet the needs of woman's system at this trying period of her life. It builds up the weakened nervous system, and enables a woman to pass that grand change triumphantly.

"I was a very sick woman, caused by Change of Life. I suffered with hot funshes, and fainting spells. I was
