WONDER ENGINES

Some persons in this parish seem to have the impression that the Wonder Engine is a cheap engine. Nothing could be further from the truth. We do claim, how-ever, that you can pay a higher price and get no better machine for your meney. The reason for this is that there is no better engine on the market today than the Wonder, as far as the material, finish, workmanship is concerned, while every Wonder Engine sold in this parish has demonstrated their wonderful endurance, power and reliability, even in the hands of an amateur. Wonder Engines do not sell for an exorbitant price because:-

1. The Wonder Manufacturing Co. is composed of people who actually work in their own factory and there is no heavy overhead expense for high salaried

We sell you an engine and that is necessary to operate it and all other attachments that may wish added can be put on at cost. With other machines you have to talle the attachments whether you want them or not and that adds greatly to the cost of the engine—in some cases as much as the engine itself.

Ask our agent to prove the statements we have made. We sell ou easy terms-thereby showing you that our engines are as standard and reliable as sewing machines.
