

# THE "FORDSON" TRACTOR

is the result of extensive trials and experiments conducted by Mr. Henry Ford, covering a period of many years. Before placing the tractor on the market, every detail has been thoroughly tried out under actual farming conditions in various parts of this country and abroad.

Experience has pointed to the small, light tractor as being the one machine which will find all varying conditions satisfactorily.

In developing the "FORDSON" Tractor, the aim has been to produce a small tractor which will be low in first cost, reliable, and above all—efficient.

Being small, light and economical, the "FORDSON" Tractor is adapted for use on small farms, as well as the large

est. It will pull all farm implements and do the work generally done by horses on the farm. In addition, by its belt pulley the tractor will drive farm machinery such as a three-her, ensilage cutter, sawmill, etc., etc., making the "FORDSON" a truly universal tractor.

In design and construction the "Fordson" takes a long step in approaching the ideal tractor. The simplicity of its operation and construction will at once appeal to the farmer.

Special devices were perfected to keep out dust and dirt. All moving parts are enclosed and thoroughly lubricated. The number of lubricating points requiring attention are very few and easily gotten at.

## VICTORY LOAN WILL PUT COUNTRY BACK ON PEACE BASIS

Billions Needed To Pay Produc-  
ers And Teach Maimed  
Soldiers New Trades.

Once in a while someone asks: "What's the need of another Liberty Loan now that the war's over?"

Officials of the War Loan organization in this district have replied by outlining some of the purposes for which money will be needed by the Government next spring.

It is shown that the amount raised by the Fourth Liberty Loan lasted only until December first. Expenditures are going on now at the rate of nearly two billion dollars a month. There will be a gradual reduction of treasury disbursements as the war debts are wiped out. The revenue from taxes will not be sufficient to pay all the bills, so the people will be called upon to provide the money by subscribing to Government bonds. The issue will be for not more than six billion dollars.

### Pay Day at Home.

This enormous outlay of money is going to pay off the army of producers at home—the farmers, merchants, manufacturers and others. America had just begun to fight when the Hun decided it was time to quit. Allied leaders expected the war to last another year and the United States Government was turning out ships, arms, ammunition and food with a view to overwhelming Germany next fall.

Treasury officials have revealed that America would have had a tank at the front for every seventy-five feet of the line in 1919—thirty thousand tanks! We would have had ten tons of mustard gas ready for shipment for every ton Germany could produce. Thousands of batteries of guns would have been in action for every one America had in 1918. Everything else was being produced in proportion.

This gigantic preparation brought an early end to the war and saved thousands of lives. Victory Bonds will pay for this work which had been contracted for and was being delivered when the armistice was signed.

### Army Being Demobilized.

There are other purposes for which money is needed.

Part of our army of two million men must be kept in Europe until the peace treaty is signed. These soldiers must be fed, clothed and otherwise maintained. Then they must be brought home. The sick and wounded must be cared for in hospitals. The army must be demobilized. There are thousands of maimed soldiers, heroes of the great war, who must be taught self-supporting trades and given an opportunity to earn their living.

This reconstruction work at home must be carried on. The job must be finished. The American people who furnished the money to win the war must supply it also to bring the nation back to a peace basis.

## Starving, But Sunning Themselves

Sunlight is about the only necessity of life left to the starving peoples of Armenia, Syria, and other Eastern countries which have been ravaged by the Hun and the Turk.

Here are some Syrian children, emaciated, on the point of death from starvation, sitting out in the sun, trying to keep body and soul together with the pitifully small rations allowed them by insufficient relief funds. Additions to funds for relieving these victims of war and famine will be raised in America by the American Committee for Relief in the Near East, a minimum of \$30,000,000 having been pledged to this work.

The week of February 3-10 has been set by Southwestern campaign directors for raising their quota of the \$30,000,000.

## SHELTER AND DRY BEDDING SAVE FEED

Food Used to Maintain Body Tempera-  
ture Cannot Add to Weight  
of Animal.

Shelter and dry bedding are important factors in finishing off hogs for market, especially during these days of costly feed, according to E. L. Jordan, professor of animal industry, Louisiana State University. If a large percentage of food has to be used to maintain the body temperature, there is so much less available for increasing the animal's weight. If the hogs are obliged to lie in the mud during a period of cold rains, it will be impossible for them to consume enough food to maintain the body temperature, and a loss of fat already deposited in the body will be the result. Certainly no thinking farmer will fail to realize what this means, nor will he fail to provide shelter and dry bedding for his hogs when he considers that the value of these two factors may easily equal one-half that of the feed. In other words, ten barrels of corn fed to fattening hogs in dry, comfortable quarters will produce as much, and frequently more, gain than twenty barrels fed in mud and filth.

### \$100 REWARD \$100

The readers of this paper will be please to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F.
