Amatite ROOFING

THE fact that Amatite needs no painting makes it the most economical roofing on the market.

A roof which requires painting every couple of years to keep it tight is an expensive proposition. If you will stop and figure out the cost of the paint, you will find it is frequently more than the roofing itself.

Amatite is covered with a *real mineral surface*, which makes painting absolutely unnecessary.

Anyone can lay Amatite. It requires no skilled labor. Nails and liquid cement which requires no heating, supplied free with every roll.

—THE ONE SURE WAY WATER—

To have money is to save it. The sure way to save it is by depositing it in a responsible bank. You will then be exempt from annoyance of having it burn holes in your pockets, and aside from the fact that your money will be safe from theft, the habit of saving tends to the establishment of thrift, economy, discipline and a general understanding of business principles essential to your success.

To those wishing to establish relations with a safe, strong bank, we heartily extend our services.
