## Of Interest to the Future Bride

At her marriage ceremony in India a bride stands on a large plate filled with milk and rose-colored sweets.

In one of the little frequented parts of Tibet the women propose to men and have as many as 10 husbands by marrying a whole family of brothers at the same time.

On her wedding day the Chinese bride is clad in red and carried in a sedan chair covered with red. Any person who wishes may turn back the chair curtains and have a look at the bride. Hayseed takes the place of rice and confetti.

In the island of Rhodes honey is still a factor in the marriage rites. After the wedding the husband dips his fingers in honey and traces a cross over the door way of his home before the bride enters, meanwhile the spectators cry out to the bride, "Be always good and sweet as is this honey."

On the island of Jersey there is a curious but pretty marriage custom. As soon as the ceremony is over, and when the happy couple are entering into occupation of their house, the large granite slab over the porch is inscribed with the initials of the bride

and bridegroom, and between the two a rough representation of two hearts is entwined, the whole thus forming a unique marriage certificate for all the world to see.

Courtship in Burma is a more open and natural flirtation than it is in almost any other part of the East. The young man usually manifests his interest at one of the pagoda feasts by shy attention; he then calls in company with his boy friends to find that the young lady with a bevy of her friends is awaiting him. He means business, however, and if the families consent, he persuades her to eat a meal with him in public, and by virtue of this procedure his bachelorhood is brought to an abrupt end.
