THE PRACTICAL TAILOR

MINOT, N. D.

JIM HILL says:

"STACK YOUR GRAIN IF NECESSARY, BUT DO YOUR PLOWING IN THE FALL."

Most of you have threshed, so you cannot very well take his advice this fall, in that respect, but you can do that fall plowing, which will mean three or four bushels more wheat to the acre next season.

We have the plows that you should buy to do this work successfully. You get your pick from three makes:

The Emerson,
The Gale, or
The Best Ever

We recommend any of them to do the work perfectly. If the old plow isn't working successfully, get a new one. Do the work well. This fall, more than ever, it's hard to turn over the new dirt, but, the better your plow, the more successfully this can be done. Our plows are light-running, durable, and the price we ask for them is right.
