Geo. Hoover of Glenburn brot some fine potatoes to market Tuesday. Fifteen of them heaped a half bushel measure.

## HARVEST FESTIVAL AT AMBROSE

Great Display of Grain and Vegetables—Addresses by Judge Davis and Prof. Palmer.

The magnitude of the harvest festival held at Ambrose Saturday was somewhat lessened by rain. This cut out the races and some of the other outdoor features. The big tent which housed farm and home exhibits was a busy scene. The exhibits consisted of grains, grasses, clovers, alfalfa, vegetables, corn, butter, bread, cake, pie and other things too numerous to mention. The vegetable display was an eye opener. The size of the cabbages, beets, mangels, turnips, potatoes, carrots, cauliflower, kohlrabi was almost phenomenal. The quality was fine, too. Prof. Palmer urged that they be taken to the industrial exposition at Bismarck. The corn on display was a fine demonstration of what can be done with this crop in the northern part of the state. Flint corn and Northwestern of good size and ripe was shown. The corn in the fields about Ambrose was green not a sign of any frost. This is a fine refutation of the saying of some that there is frost every month in the year in this state. Had there been frost the corn would have shown it. This part of the state has had three months without frost and that within a few miles of the Canadian border. Prof. Palmer remarked that the state was going to be one of the corn states. The day before he had been in the First National Bank at Fargo and saw a corn exhibit that would do justice to Iowa or Illinois. The exhibit of clover and alfalfa demonstrates the fact that these crops will flourish when given an opportunity. There was an exhibit of ripe alfalfa, the pods were just filled with well developed seed. The oats in the sheaf were especially fine. There were also fine samples of wheat, barley and flax in the bundle. Liberal prizes were offered and there was prizes for everything brought in.

Wheat is going from 8 to 25 bushels. Threshing has been delayed some by rain, but there are many machines and some have come from other parts of the state so the work can be pushed when the weather permits. The soil is in an ideal condition for plowing and many of the farmers realize the value of early fall plowing so are taking advantage of the conditions.

A program was also given in the opera house. It was opened by a band concert on the street. Mr. Grace, president of the Commercial club, presided. He extended a welcome to the visitors and explained that the aim had been to provide a day of entertainment as well as of instruction, but owing to the weather a good deal of the entertainment part had to be left out. He then introduced Judge Davis of Minot, who related the many advantages of North Dakota and called attention to the fact that when one lives here for awhile that it is impossible to be contented in the east, and these who go east always return. He referred to the reciprocity bill and how the Canadians had saved the day for the American farmer. He urged upon the audience the need of everyone doing his duty in studying the important questions of the day and of voting intelligently in selecting men for

public office. He called attention to the growing power of the corporations and how they are using their power and money to influence the men who make, administer and interpret the laws so as to make it possible for them to still further increase their income at the expense of the public. In other words to scheme to get the people's representatives to turn their back on the people who have elected them to protect their interests and to work for the corporations instead. The judge was cheered in many of his striking statements.

Prof. W. C. Palmer of the Farmers Institute was the next speaker. He said that looking over the exhibits that he did not know that there was much that he could say, there being so much excellence in the products shown. He continued that the problem was to make the most of the soil and the climate. To put the soil in such a condition that it will force the crop to make a large and a rapid growth. To grow crops that are the best adapted to the soil and the climate. He emphasized the value of deep plowing and of plowing early in the fall. He recommended planting some corn, it is a crop that gives a large amount of excellent fodder and a fair amount of grain. Then again the cultivation given it puts the soil in the best possible condition for a crop of grain next year. The professor also wanted to see a small piece of alfalfa started on every farm and that the area be gradually increased till a considerable part of the farm be devoted to it. That it is best hay plant yet known and from what he had seen he felt sure that it would produce abundant crops of both hay and seed right here. He gave the following rules: Sow eight to ten pounds on either fall plowed land or on disced corn stubble late in May or in June and without any nurse crop. When weeds get bad run over with the mower. The land should be manured. In many cases it is necessary to introduce the alfalfa germs. The best way to do this is to sow some soil from a field that is growing alfalfa successfully.

The exhibits and crops are a fine demonstration of what can be done in Divide county in farming.

### FOUR-YEAR-OLD BOY KILLED.

Thursday afternoon on the farm of Wm. Chamness who lives about ten miles northwest of Ray was the scene of a very sad and distressing accident which resulted in the death of little Ira Chamness. The threshing machine was on the farm threshing the grain and Mr. Chamness was hauling a load of grain up to the barnyard when his little 4-year-old son ran out to meet his father, calling out to him that he was coming. In some manner the little boy fell under the wheels but the team was stopped just as the hind wheels were pressing against his body. Chamness backed up the horses and then the boy was caught under the front wheels which ran onto his body and the whole load rested upon him. The doctor was immediately called but the little fellow was injured internally and died about two hours later. The parents are prostrated with grief as little Ira was their pet and was a very bright little fellow for his age.—Ray Pioneer.

### NEGRO ON HIS WAY.

Devils Lake, N. D., Sept. 25.—"I don't know where I'm going but I'm on my way," was the strain of the song sung by Rev. W. M. Smith, the colored divine, who has been shifted from town to town by the authorities. Smith reached Devils Lake via the St. Cloud, Fergus Falls and Grand Forks route and with the assistance of a contribution raised here was sent to Minot this morning, where he claims to have relatives.

Smith is a decidedly unique character. With a laugh that means money an imagination that he probably inherited and a disposition that never grows ugly, he has traveled over the entire country on less capital than any previous globe trotter. After a few days in each city he usually finds the police department anxious and willing to raise the necessary funds to send him further on his journey.

**Aid to Perfect Health.**  
That the body may be in a perfectly healthy, normal condition, it is necessary that the various organs perform their natural functions in the regular manner.

This is particularly true of the Liver, the principal work of which is the separation of various poisonous materials from the blood. Unless these are withdrawn and disposed of, they are re-absorbed into the system, resulting in a gradual poisoning of the whole system.

Reckall Liver Salts has proven remarkably efficacious in aiding the liver to properly perform its functions, and for this reason we most highly

recommend the use of this preparation to you. The Rexall Drug Store, McCoy & Co. The Rexall Drug Store.

### IT RULES THE RAIN.

A farmer asked us the other day, "Do you keep that ar 'Reliable Roof-in'?" We told him emphatically, "No, sir, we do not keep it—we sell it." Enough said!

This roofing is so good we can't keep it—our customers demand it. We are continually running short. Should you know the amount of Reliable we have sold, and it happens that each roll is just a yard wide, the idea might occur to you that if unrolled and lain flat, the total makes a sidewalk several miles long. It would be a tough, resistant walk, too. However, Reliable we do not recommend for sidewalks—it is made for roofs.

Those roofs are reliable, and therefore waterproof, which have our Rubber Roofing lain upon them. In each square there are 108 square feet (men's size). With each square, there are ample tacks and cement. We guarantee our roofing because it is Reliable, and sell it per square. Rogers Lumber Company, H. S. Johnson, Manager.

Make up your mind today to get your insurance from the Grant Farmer's Mutual Fire and Lightning Insurance Company of Donnybrook, Ward county, North Dakota, as you will then get—First: Insurance at actual cost; second, Keep North Dakota money in North Dakota. Wm. F. Gull, H. A. Monaghan and B. J. Anderson, Minot, N. D., and H. J. Herzog, Drady, Frank M. Long, Sawyer, Agents. 7 13 tr

### L. P. WEATHERWAX ON DEEP PLOWING

"I note where some extraordinary deep plowing has been done this year. Plow one field 5 inches deep and another not let less than ten, sow the same kind of seed in the same way at about the same time and if the 5-inch plowing doesn't discount the ten inch then I'll be willing to pay for the plowing. The reasons are obvious. Deep plowing no doubt is all right if you plow from an inch to a little more than an inch deep each year, but if you plow too deep at one time, you plow under too much rich soil. I don't advocate shallow plowing, mind you, but want to impress upon your mind that you must go down gradually."

### HAGENSTEIN'S CORN.

A. D. Hagenstein is some corn raiser. The genial Hagenstein was seen walking up the street Sunday morning with a bundle of corn on his shoulder, which he had cut from his garden. The corn was fully twice as tall as "Hage" himself and was as fine

Let us show you how superior are **ANSCO Cameras**

**BEFORE** you buy any instrument, come in and see this splendid camera. See the improved closing device which prevents the back from coming off when you have the camera loaded. See the spoon that keeps the film roll tight and prevents fogging from light. See how much more convenient is a camera that opens horizontally—the way you want to take 99 per cent of your pictures—instead of vertically, as others open.

AnSCO Cameras are made from finest materials, with best workmanship. Even the lowest in price are made of wood throughout. Each is equipped with better lens and shutter than usual at the prices. All sizes from the small BB cameras for the children up to the elegant No. 10 AnSCO.

a specimen of corn as we have seen. The exhibit was sent to the Bismarck exposition along with other fine displays.

### The Ellsworths Are Here

Rev. and Mrs. N. E. Ellsworth, who have been spending the summer on the Canadian homestead, arrived in the city and are the guests of friends. Their baby is ill and the Reverend is suffering from afflicted eyes. They will leave for Bismarck soon where Mr. Ellsworth will have charge of the Episcopal church for the ensuing six months, when he will once more take up his residence on his homestead.

B. F. Warren, the insurance man, has gone with the little red Maxwell automobile to Fath, South Dakota, to visit his wife and daughter, who are holding down a 160 acre claim. He will return in a short time and be ready for business.

### Notice for Bids.

Notice is hereby given that sealed bids will be received by the Board of County Commissioners at the office of the County Auditor up to the hour of 2:00 o'clock p. m. October 17th, 1911, for the construction of a grade according to the plans and specifications on file in the County Auditor's office at Crosby, N. Dak., the grading to begin at Section corner of the southeast quarter of Sec. 16-162-97, running due north along section line 2,000 feet.

A certified check for 10 per cent of the bid must accompany each bid as an evidence of good faith on the part of the bidder. Check to be made payable to the order of W. E. Vadnais, County Auditor, and successful bidder must furnish bond to the full amount of the contract.

The Board reserves the right to reject any or all bids.

By the Board of County Commissioners.

C. D. PERRY,  
Chairman.

Attest: .....  
W. E. VADNAIS,  
Auditor.

Dated at Crosby, N. Dak., this 13th day of September, A. D. 1911.  
9 21 14

## Take the Northwest to the People

The story of where the great opportunities for development in the Northwest are to be found is told in the booklets published by the Great Northern Railway shown in this illustration.

They tell what progress has been made, and where the opportunities lie for thousands of new-comers in the great states of Minnesota, North Dakota, Montana, Idaho, Washington and Oregon. They tell of the great work yet to be done in the development of the Great Northwest, and the need for more men of brain and brawn. Plan to attend the

## Northwestern Land Products Show

St. Paul, December 12 to 23, 1911

held under the direction of the Northwestern Development League, which embraces in its organization all of the commercial and community bodies in Minnesota, North and South Dakota, Montana, Idaho, Washington and Oregon.

The way to get the people to the Northwest is to take the Northwest to the people. Send for the free books shown above. Learn more of the splendid empire which will display its products at the Twin City Land Show. Send us a list of your eastern friends, specifying which booklet you wish mailed, and we will send these books free. Through your co-operation we shall help in the great work of the Northwestern Development League.

E. C. LEEDY, General Immigration Agent, ST. PAUL
