"No. I ain't goin' no further," said the Jerseyman.

We continued on our way. It was just as much fun up there as it had been lower down, and no more. We didn't get a bite. Then we came back again, and I tell into all the holes I had discovered on my way up, and several new ones. About 3:30 p. m. we reached a farm house. By this time we were both hungry enough to eat anything we could bite, for I had lost our lunch early in the day. The owner of the farm house presented his card. It was engraved on the bara door in yellow pain:

James M. Shakes.

I did not know whether the middle initial stood for mosquitoes or malaria, but I knocked at the door of the house, and inquired for Mr. Shakes. His son Jimmie came out, and presently the old man appeared. He was the same venerable gentleman who had pulled ail the treut out of the brook shead of us. "Oh; got back a'ready," said he cheerfully. "How long did you think we'd be?" said been after him for a time. Mad doors are cetting in their work J.G. Haller and daughter, who were bitten at Webster, have been sent to Rockford, Ill., for treatment. Anotherdog went mad and bit a farmerliving two miles north of town.

The Consolidated Tank Line com pany has bought seven acres of land in Sioux Falls. The property is on the Milwaukee road. The company will build its cooper shops, stables and warerooms on this property. Work will begin at once. The cooper shops will employ twenty-five men.

Lake Thompson, about eighteen Lake Thompson, about eighteen miles north of Howard, in Kingsbury county, in places eight or nine feet in depth has recently gone dry. About ten days ago a waterspout sucked up the contents of the lake and since then the lake bed has been perfectly dry.

The members of the constitutional convention will receive \$4 per day for their services and a mileage of 15 cents for each mile necessarily traveled in going to and returning for their services and returning the services are services a

traveled in going to and returning from Sioux Falls. The presiding officer and chief clerk will receive \$6 and other clerks \$5 per diem. Twenty thousand dollars is appropriated or the expense of the meeting.

W. H. and Henry Meyers, of Rapid City, have sold to Gen. Boyle and Judge Pope, of St. Louis, the Gold Safe group of mines in Grizzly gulch for \$25,000. The same capitalists also purchased of Meyers, Cook & Rogers the Grizzly Bear group, in the same locality, for \$25,000. latter property includes a twenty stamp mill and a valuable site and water right.

Charles Little, of Fairwater, was driving a young team south from the village, when it ran away, on the hill just this side of the village. They ran into a telephone pole, smashing the wagon and stopping them. Lit-tle was thrown violently into a pile of stones. His head was badly bruised, a shoulder blade broken, and he received severe internal injuries, resulting in frequent vomiting of blood.

"But there's a trout in it," said old Shakes,
"a big one, too; I saw him this afternoon."
"I don't i cheve it," said Billy, and he
walked up to the pond. Then he ducked
down on the ground in a hurry. "Yes, there
is, too, by thunder," he whispered: "I saw
him, myself, right in the middle."
Then he got out his line and made a graceful and scientific cast. But the trout didn't
rise. He tried it several times, but the surface of the pond was unstirred except by his
ity. At Grand Forks the house of Attorney Bosard was entered by burglars, and watches and jewelry stolen. "It would be seen that try grasshoppers," suggested little Jimmy; "the trout around these parts is powerful found of grasshoppers."

Billy sent me to catch one, and I roamed little grasshoppers without finding They then entered the house of County Auditor Anderson. He discovered one at the bureau, and, jumping out of bed, grappled with him. The burgall over four quarter sections without finding any. When I came back old Shakes consoled me by saying that they were rather scarce at that time of the year. Then Billy suggested worms, and I went out behind the barn and dug up a rare and beautiful collection. Billy wouldn't try one till the terms. lar fired, barely missing Anderson's head. The auditor shot and the burglar returned the fire. No arrests. The house of Secretary Richardson was also tried.

Since the termination of the dynamite patent in 1881, there has been immense industry in the invention of high explosives, and there are now more than 300 varieties. A dynamite cartridge one foot in length takes only 1-24,000 of a second to up to the edge of the pond, and satisfyin explode, up to the edge of the pond, and satisfyin himself that the trout had not got away "Durned if he isn't in the same place," sai

FISHING IN NEW JERSEY.

"He's the most aggravating trout I ever did see."

He continued to be as aggravating as before, for he wouldn't rise for the worms. Od Shakes said he didn't like the bait, and I suggested that we might put on some pue if wasn't to expensive. This reminded the old man that perhaps "mother" he de found another. So he went up to the house and get it. We bought it for three de lans to keep him good natured. Then Billy said that the sun was too high to catch trout, but if we waited till evening we coult have but er Am Lured to the Land of Applelach Tries to Spare Farmer Shakes' Pat ent Self-Acting Trout and is Him-I had never been fishing and didn't know a trout from a bologna sausage, except by the taste, and I told Billy Button so when he

such as to make tender-hearted women weep, and now it is shrill and exultant a wild series of high-pitched trills. The music ceases, and the player casting aside his instrument, with a grating, meaningless laugh, hastens down the corridor with a desperate

the middle of the stream, but Billy did not mind it, because he had a nice pair of rubber boots on that fastened almost up to his neck. I had an old pair which Billy had kindly loaned me, and though as I have said the banks were wetter than the stream it is a melancholy fact that the insides of Billy's old knots were wetter than either. They had an attraction for moisture, and I could hear it rushing in with a dull, sickening sizzle every time I litted up my feet.

Although the stream was in the main so shallow that as American-built trout could not sail in it with his center board down, there were places here and there where it was deeper. I know, for I stepped i to several of them. Billy said that the trout lived in these pools. I did not doubt his word, but it seemed strange to me that a trout who cou'd have had the whole Atlantic ocean to swim in should chose to live in a place where he couldn't turn around without knocking something down; but Billy is a fisherman, and he ought to know.

We wandered up the stream and Billy cast his line into the quiet pools, when I didn't fall into them before he got a chance. I usually east my line, too, but it went into the branch of a tree, and then I crawled out and rescued it at the peril of my life. But I caught more, for he couldn't even hook snaw. He began to explain to me that certain atmospheric conditions combined with the absence of fish could foil the efforts of the When he arrives at the other end has forgotten his errand, and he slowly retraces his steps to obey the next capricious dictates of his imbecile

The cell nearest the stairway is teninted by a dark-featured man, who clutches at the bars of the door with a in the cream. ury that threatens to snap them like o many match sticks. There is no danger, however,

edge of which was an unpreposessing rustic just adding a good-sized trout to a fatstring. Billy looked at the string and greeted the aged fisherman reverently.

"So it was you boys that I heard behind me was it?" he said. "Well, well; you didn't catch nothin' I see. Reckon I must have pulled the trout out'n their holes just ahead of you." "This," said the keeper, "is one Germrn, and was educated in Heidelberg. His story is rather romantic. Upon the completion of his scholastic career he made a tour of the continent. While at Nice he saved the daughter of some nobleman from death. He fell deeply in love with

> they were engaged to be married. Before that event could be consummated fever and died. Her death deeply affected the man before you, and at the solicitation of friends he left Nice. He vandered from place to place, finally oming to this country. Being in as an important branch of veterin opulent circumstances, and rendered insensible to every thing good and pure by the untimely death of his betrothed, he plunged into dissipation in the wildest form, which eventually made him a mental and physical

wreck. During this conversation the insane man gave utterance to exclamations of an incoherent character, and as soon as the keeper had ceased, burst into a passionate recital. He fancied that he had cast his affiancied into a flaming pit and that her death shrick still rang

in his cars. "Ha! ha! ha!" he laughed, wildly. "They think she is dead, but she didn't, ha! ha! ha! I killed her. Yes, killed her. Oh, my, but wasn't it a fine night for such a devil's deed? darkness was frightful. Lightning blazed forth with demoniacal fury from the heavens. The thunder made the earth quiver like a reed in the blast. All the imps of Pat da were out."

The maniac paused in his excessive

frenzy and dashed from his distorted face the great beads of perspiration that trickled from his forehead, and continued in the same wild manner: "I stole her when she was asleen and fled like some arch-demon from the blackest abyss of Hades with her. out-out into the night. She, ha, ha, ho. ho, struggled like some frightened bird. But what good did it do? I-I had her. On we went, through the fierce nocturnal storm, until we came to a plateau. A blazing pit vawned before us. Oh, how merrily the yellow and blue-tongued flames curled up, The air was filled with an infernal din -whoops, agonized screams, yells and laughter. Saturnalian demons played with gleaming rods of flame on shin ing death heads, and serpents hissed in their ambuscades. I held the one loved aloft, and with arms of iron hurled her into the pit. Her cry-that of a lost soul-still haunts me.

And the maniac sank exhausted to he floor. "It seems strange," said the keeper, as the twain descended the stairs that a man afflicted so violently with insunity can talk so coherently at times. That man's imagination is as

powerful and wonderful as was Poe's." Fashion's Changes.

Quickly Corrected Harper's Bazar: Mrs. Cumso (to door make hs Mr. Cumso returned yet? FOR THE FARMER.

The thermometor and the baron etor should be used by all farmers. After having used them awhile they will be considered indispensable ad juncts to the farm.

Wood ashes are excellent on th flower beds. Roses need an application of them now. All kinds of flowers will be benefited by superphosphate and ashes at this season

After each rain the ground should be cultivated lightly to prevent evaporation of moisture. The loose dirt erves as a covering and shields the earth from the direct effects of dry-ing winds and the heat of the sun.

Weeds make excellent green manure if turned under. A rank growth of weeds indicate fertile land, but such land can be exhausted by removing a regular crop. It will pay, therefore, to turn the weeds under and let them rot in the ground. The white butterfly is the parent of

the cabbage worm. It a careful lookout is given when they first appear, and the butterflies destroyed which is not as difficult as supposed, there would be a saving of labor and loss of plants.

Land that has grown much clover seed is not good for a strawberry patch. It is good for almost any other farm crop for which clover is valuable manure. But among strawberries clover is one of the worst of weeds, and for this reason it is not best to sow gypsum or land plaster on the strawberrry patch lest it cause too great an intrusion

Mr. J. K. Brown, New York Dairy commissioner, remarks that dairying has been carried on in a very wasteful way, and that no manufacturer could stand the competition of his rivals if he should allow his business to run as slack as dairymen run theirs. "Manufacturers are literally compelled to know all about the capacity of the machines they use, but New York State farmers are keeping herds, onehalf of which never give milk enough to pay a profit on their keeping. No other permit such a drain.

When cream is thick and ropy and will not churn it is because of the presence of an excess albumen, which is like the white of an egg. This also prevents the escape of the air, gathered by churning, as is denoted by the swelling of the cream, which becomes frothy. Two low temperature sometimes operates in this way, while a too high temperature makes a butter too soft and porous. It is well to raise the temperature of the cream somewhat higher than the churning point, and let it lower to it, as fat is a bad conductor and does not heat as soon as the fluids

Horse Dentistry More trouble and lack of condition are caused by ulcerated and irreguur most violent patients. He is a lar teeth than is generally supposed Such teeth should be promptly re moved with forceps. There is no reason to doubt that a horse with ulcerated teeth suffers as intensely from toothache as a human subject Irregular growth or fractures of the enamel on the outer edges make the teeth so rough as to injure the inside of the cheek, sometimes causing ulcers. In other cases some of the grinders grow more slowly than oth-"quidding," or imperfect mastication of the food. The remedy is to file the teeth into the proper shape. Horse dentistry is now recognized

ary practice.

Whole Wheat for Poultry, The low prices of wheat for several years past has been partly compensated to farmers by inducing them to test its value for feeding. It is, all things taken into account, the king of grains. It gives the elements of sustaining life more fully than any wheat is especially rich, and it is his that adapts it so well to feeding hens for egg-production. It is hardly possible for wheat to become so dear hat farmers cannot afford to exchange it for eggs, always much dearer in price. On the farm the shrunken and imperfect wheat should be fed to the hens. It does not need grinding. Fowls have a grinding pparatus of their own, and do betwhen it is given due exercise than when grain is crushed into meal before feeding to them.—American Cultivator.

Fodder Corn. The planting of todder corn for late eeding is increasing in popularity of late years, in addition to the crops grown for ensilaging. It is an important crop to farmers who keep stock to any extent and should not be neglected by stockmen. To have a succession it is a good plan to plant every week or two after commencing. Some farmers who make but one soil less and require less sweeping. danting or sowing defer it to long. It will not usually attain sufficient growth to be at its best for either 'all or Winter feeding when put in as late as July 10, vet it can be nearas late as July 10, yet it can be nearly full growh for Fall feeding, and it the pastures are scanty, and hay not too plenty, a field of it will prove a too plenty, a field of it will prove a limit of the pastures are scanty. great addition to the feed for milch much to a living-room, and as usecows, and save many dollars' worth ful as ornamental. For a library or cows, and save many dollars' worth of hay and much shrinkage of milk. The corn may be planted in drills or sown broadcast, but drilling is preferred by the majority of good farm-

Why Cattle are Salted, Why do farmers salt their cattle? Not every farmer, remarks the Americau Dairyman, knows why he does it unless it is because the stock like it and then goes on to say: A moment's thought will show where the advan-tage lies. As soon as the food enters the stomach, the natural tendency is at once for fermentation to begin. this tendency and the digestive powers. And if these powers are vigorous, and the process of fermentation is checked or intercepted, then no bad results will follow, the food will be ligested, and salt will not be needed hough at any time this will assist in the process of digestion, Salt keeps food from decaying until it can be ligested and assimilated, and proongs the time to allow the digestive organs to complete their work; and ood is taken in excess, as often happens when stock is in pasture, salt given frequently will be of much ad-vantage. And further, salt is a pre-ventive of worms. When fermenta-tion sets in, the conditions presented worms in the intestinal canals, and and may possibly be engendered by the process. Consenquently it should be a rule with stockmen to keep salt Touched The Old Man's Heart.

Once upon a time an old man alled his three sons to him in the dusk of the evening, and in a faltering voice said to them: "My boys, in a little while you will have no father. I am standing on the shore of the river of death and soon I must launch my boat upon it. Now, I The other day a smooth faced man, venring handsome clothes and displaying a soiled collar and a necktie all awry, and shoes that never experienced the skillful manipulations of have as you know, a splendid farm, upon which one man can thrive, but as there are three of you I have been a bootblack, and finger nails that never experienced a manicure, leaned his elbow on a Washington counter sorely preplexed as to which should have it. I have therefore decided to and talked in the jolliest way to a give each of you two dollars that circle of newspaper friends. He lookyou must spend tomorrow, and to dike a tramp, but he really is one the one making the wisest purchase of the most famous men in the world, shall the farm be given. Come to and his name is known in every part me tomorrow evening at this time and tell me how you have each exof the globe. Of course he is an Ohio man. His name is Thomas Alva Edison, and he was once a peanut pended your money. Now, good-night, and heaven bless you all." boy and news butcher on a jerk-On the the following evening the three sons assembled before their father. "Reginald," said the latter water railroad in the Buckeye state. During a little luncheon Edison, between hearty drinks of beer his to the eldest, "what did you pur-chase with your two dollars?" Father," returned the son, "I pondfavorite beverage, told in his quaint way the story of his first acquaintance with any large sum of money.

It was in the days when he was struggling along with his early inventions, and didn't have big capitalists to back him. In fact, he ered long that I might make wise use of the money, and at last I bought a pair of strong shoes."
"Well done, well done; the journey through life is rugged and hard, and lidn't have any bank account himthorns are thick upon the way. self, and hardly knew what one was. Bank checks were things he never hought, and I love you the better

You have shown prudence and forefor it. And what did you buy, Augustus?" "I too thought long and deeply," responded the second son, "that I might not purchase anything trivial or foolish. Since the cap that I wear is worn and ragged, I bought a hat with a wide brim which I show to you, my father.' The old man regarded him with a glance of pride and affection, and Augustus; often in the world the row is fevered and the sun rays beat flercely upon the aching head, and your hat will comfort you. I rejoice that mysons are so filled with wisdom. And you Theophilus, what did you buy?" "My father," anwered Theophilus, "I didn't ponder worth a cent. As soon as I left you

ast evening I blew in my stuff for five tickets to the base-ball games. With tears of joy streaming down embraced Theophilus, and murmured in a voice hoarse with emotion: "Had I a farm as large as Texas, with a wind-mill on it, it would be yours!" And then Reginald and lugustus moved sadly away into the gathering gloom and while the one tried to keep the flies off him-self with his hat, the other kicked

imself severely with his boots. Health and Beauty.

"Nice farm you've got here."
"Yes, we think so," said the old lady, taking up her knitting again.
"Must be lonesome in winter though." "Oh, no, not too lonesome: I don't

like to have it so lively you can't hear yourself think." "I guess the wind whistles some through these trees, about the time

of the equinoctial."
"Maybe it does, I won't say it lon't; but it only makes me thankful we've got enough fire wood."
"How is it about books? I don't suppose you have a library in town?"
"Well, no, not to call a library," said she cautiously, not wishing to hear her native place disparaged; "but there's books in circulation.

Mis' Miles has got 'Pilgrim's Progress,' and I've got 'Uncle Tom's Cabin.' So once a year we swap.' "Have any lectures or concerts?" "Husband says there's good speakin' in caucus, some of it real violent; easel should be a fancy scarf or "throw," as they are now called. They are easily made of bolting cloth Sometimes it fairly makes the tears Sometimes it fairly makes the tears

come into my eyes to hear them lit-tle creatur's tune up." "Well, well," said the book agent "I've seen a good many folks that call themselves contented, but I don't think any one of 'em could come up to you. Shut up in this etc. A pretty water-color flower piece has a lovely frame of pure white, which sets off the rich coloring of the flowers perfectly. A brass plaque, "Oh yes," said the old lady, primly,

EDISON'S FIRST BANK CHECK. Was Very Much Afraid of Boing Hold Un a

The Perisians have a proverb to the effect that "a small fly is multiplied by millions, heis undoubtedly a brave man who will attempt combating such a host. Fort Tel-el-Kebir, on the day after the battle there, in 1882, presented a remark-

had occasion to use, and had about The fort seemed to be covered with as much idea of their value as the man in the moon.

Edison had finally sold his patent on the gold and stock indicator to the Western Union Telegraph company for \$40,000, and was coming over to New York to get his money. He had heard of Wall street and its bulls and bears, and had been told that it was full of "sharks," who would fleece a man very quick. So he made up his mind that Wall street

was a very dangerous place, and that if ever he had occasion to go there he would be lucky if he got away without losing his overcoat spurs to my pony and urged through. The brute several refused to stir, frightened by the hun and umbrella.
At that time Gen. Lefferts resident of the Western Union. One norning Edison came into the company's general offices to close up the sale of his patent. After a few preliminaries he was given a check He looked at it curiously for a mo

able gathering of flies

dark pall. At about 150 yards distant from this dark mass, I heard a loud, humming noise, and I approached nearer, the sound inreased in volume, until it became a roar. It came from a wall of flies one mile long, ten yards high and forty yards wide; this pall represented a line of dead and unburied Egyptians.

To go round the flank of the fly

wall was out of the question, so I put with Judge James J. Lindley, an instance of the old gentleman's ready wit occurred. A young man, a and noise. At last, I managed to get him "head on," and never shall I forget my passages through those forty yards of flies. They presented such a firm front that I could feel a that he was from Cynthiana, Ky., near where Lindley was born and lived for many years, teaching school, among other things. In pressure, heavy enough to compe me instinctively to grip the saddle talking over country history became quite well acquainted, and the young Kentuckian mentioued his father's name. "I knew him well; he used to go to school under me,"
