VANDERHOEK PULLET FLOCK MAKES SPLENDID RECORD

The flock of White Leghorn pullets belonging to P. Vander Hoek are making a remarkable record now.

When they were six months old, they celebrated their birthday by making a seventy per cent laying record and since that day, they have increased this score to seventy-five per cent.

The flock is composed entirely of pullets from the Harry Beernink trap-nested strain.

A ten pound boy was born to Mr. and Mrs. Tom Heeringa Sunday.

Dr. F. L. Wood fits glasses scientifically and accurately.

INFLUENZA BAN IN LYNDEN LIFTED WHEN WAR CLOSES

The influenza ban was lifted in Lynden Monday, following the issuing of an order by the State Health Commissioner calling the quarantine off. Danger is not necessarily past, but conditions were such that the state health board considered it wise to remove the restrictions.

The following order was received from Thomas D. Tuttle, state health commissioner Monday:

"Special orders of the state board of health prohibiting public gatherings because of Spanish influenza are hereby discontinued with the approval of the president of the board.

Lynden wrestled with the general masking order but one day. Marshal Le Compte received orders on Friday from the county board of health to see that everyone was masked, and an attempt was made to enforce the order Saturday. For a great portion of the day, the Lynden people wore the masks, but the action of Bellingham in taking them off Saturday brought an immediate seconding locally.

Lynden has thus far been exceptionally fortunate during the epidemic, but few cases having appeared locally. Although the danger is not yet fully past, nevertheless conditions in the cities where the scourge was heavy have vastly improved.

The Liberty Theater opened its doors on Wednesday night, and will continue its programs regularly as in the past.

Here's another fine poultry record—

A Barred Rock hen belonging to Mrs. Eva Thompson laid twenty-seven eggs in October.

"HIPRESS"

These are the best wearing rubber boots and shoes you've ever bought

They're called "HIPRESS" because High PRESSure—tons of it—is used to press the rubber and fabric that's in them so tight together into one piece that they won't come apart, crack, leak or peel. They're made like Goodrich Auto Tires—and the Goodrich Company puts tough, auto-tire-tread rubber in them. No other footwear is made this way—that's why "HIPRESS" is superior to all.

Yes sir, when Goodrich gets through making these boots they wear like a plough. Many a pair has outworn two to three pairs of the other kind.

As for fit!—just tuck your toes into a pair and you'll be the most satisfied man on earth.
