State Crop Bulletin.

Seattle, Wash., Aug. 23., 1904.

Week ending Aug. 22, 1904:—

It has been another hot and dry week. There has been no rain in any locality since the 28th day of July, and very little for over a month, consequently the drought is beginning to be seriously felt. Pastures have become very dry and short, so that cows have to be fed hay to keep up their milk supply. Gardens, except where artificially watered, have dried up badly. The potato crop has been very injuriously affected by the unusually dry summer, and it is not believed there will be above half the average crop. The quality, however, is excellent.

In the Sound country oats have ripened rapidly, and cutting is in progress under favorable conditions. The crop will be fair. The reports about hops vary according to locality. In Yakima County, where they are irrigated, the crop will be a good one, and picking will soon begin. In King and Pierce Counties, except nearest the mountains, where there is most moisture, the crop has been affected by the extremely dry weather.

Wheat reports from Walla Walla county are of a yield a little above average, eastern Whitman county about average, while in western Whitman, Adams, Spokane, Lincoln and Douglas counties the yield will be less than average, owing partly to June frosts, and partly to hot, dry weather in the filling season.

PALOUSE COUNTRY.—Colfax—Cereals have not been improved by

the prevailing hot weather and continued drouth and the yield is scarcely up to previous estimates. Other crops would be benefitted by rain. Rosalia—Cutting practically done. Threshing about half done. On account of extreme hot weather and continued drought crops ripened too fast. However, the entire yield will be nearly the same as last year. Tekoa—The weather has been so hot that it has dried everything too fast. Winter wheat nearly all threshed. Fair yield. Farmington, about ten miles south of here, has a fine crop of winter wheat. The high winds of the 19th blew off a great many apples; in places fully one-half the crop. Pastures need rain badly. Fletcher—Harvesting nearly done. Threshing two-thirds done. Crop is short on account of June frost. Quality good. Gardens very poor. Potatoes less than half a crop. One-fourth of a crop of fruit.

Another Swindle.

The secretary of the Panama canal commission sends out the subjoined notice to the working men of this country and it is timely:

"The laboring people of the country should be on their guard against so-called 'labor exchanges,' which are holding out promises of employment on the Panama canal, and exacting a fee of a dollar or two from each applicant. A concern in one of the eastern cities is sending broadcast circulars urging early registration, with the assurance that the earliest to register will be in line for the best places that are open. Of course the isthmian canal commission would give no countenance to such contemptible schemes of sharpers, whose sole object is to separate the laboring man from his hard earned dollar."

FOR RENT, FOR SALE, ETC.
