PLATFORM OF NATIONAL PARTY

In the issue of December 14th, The
Journal gave an epitome of the po-
litical section of the proposed plat-
form of the new National Party
which it is proposed to form from
the following elements: Moderate
socialist, trade unionists, woman suf-
fragists, prohibitionists, progres-
sives, single taxers and other for-
wardlooking thinking citizens who
have the welfare of the country and
its people at heart.

By epitomizing a clear idea of the
industrial planks in the platform
cannot be given so The Journal
prints this section of the platform
in full.

PART II.

Industrial Democracy

It is fundamental to industrial
democracy that there shall be equal-
ity of economic opportunity and that
the economic life of the nation
shall be responsive to the people's
will. As a result of the industrial
development of the past century,
conditioned by special privilege, a
small minority of our citizens have
come to control a large majority of
our capital. The artificial monop-
olies of transportation and communi-
cation, the natural monopolies of
land, lumber, minerals and water
power, and the great bulk of the
manufacturing machinery of the na-
tion are owned and controlled by
this minority and are available to the
workers and to the public only on
the sufferance of a privileged class
of owners. Therefore we favor a
policy of public ownership to be pro-
gressively applied to the organized
industries of the nation. As steps
toward the realization of this indus-
trial democracy we urge:

(1) Extinction of Land Monopoly:
Removal of the fundamental evil of
land monopoly by taxation of its
rental values, this taxation to be
progressively increased and taxation
of improvements to be gradually
abolished.

(2) Public Ownership: Public
ownership and democratic control of
coal and metal mines, water power,
natural gas and oil wells, steam and
electric railroads, telegraph and tel-
ephone services, water works, light
and power plants, terminal ware-
houses and elevators, and all other
public utilities and basic industries
whose operations depend on fran-
chises, or that require large-scale
operation on a non-competitive or
centralized basis.

(3) Experimental Public Own-
ership: In order that the efficacy of
public ownership may be impartially
tested in those industries in which
its efficacy is now in dispute, we
advocate a policy of careful experi-
mentation by the government in the
public ownership and operation of
representative industries, and espe-
cially those in which the necessities
of life are produced. We urge that
this third class of government in-
dustries be conducted in every case
in fair competition with those that
are privately owned, to the end that
the relative merits of public own-
ership and private ownership may be
separately and scientifically deter-
mined.

(4) Private Industry: Industrial
democracy aims not only to guaran-
tee equality of economic opportuni-
ty, but also to encourage the fullest
individual liberty and initiative in
industrial enterprise. It is desirable
that our citizens should be free to
venture their earnings in the up-
building of new forms of industry,
and the net incomes which result
from such undertakings should not
be regarded indiscriminately as un-
earned increment. Often such net
incomes are but fair wages due for
the useful experiment performed and
the social service rendered. We do
not object to the continuance of
private enterprise in such fields so
long as the gains derived therefrom
are earned.

(5) The Democratic Management
of Public Utilities: The capitalist
system, despite its many injustices,
has developed two instrumentalities
that are of large economic value:
The industrial corporation and the
trade union. Any form of public
ownership which should neglect those
instrumentalities and give over the
management of our industries to a
mere political bureaucracy would
arouse the well-merited opposition
of all classes. Both the workers and
the expert business managers of
industry must be protected from un-
enlightened tyranny of public offi-
cials, and similarly the body of citi-
zens as a whole must be protected
from monopolistic extortions on the
part of industrial groups. The chief
industries should be controlled by
administrative boards upon which
the workers, the managers and the
government should all be repre-
sented.

(6) The Farm Problem: The til-
ler of the soil is menaced upon the
one hand by the privately owned
means of transportation, storage and

marketing, and upon the other by
constantly growing landlordism.
Therefore we favor public own-
ership and operation of all necessary
means of transportation, storage and
marketing, and we demand that land
monopoly be removed by progres-
sively increased taxation of site
rental values.

As further measures for the bene-
fit of the farmers we urge (a) ex-
tension of the Federal loan law priv-
ileges to those desiring to acquire
farm land (b) provision for ad-
vances upon crops of products in
storage; (c) government insurance
of farm stock and crops against
natural calamities.

(7) Abolition of Grain Specula-
tion: We favor Federal grain in-
spection under a system of civil ser-
vice, and the abolition of all boards
of trade, chambers of commerce or
other places of gambling in grain
or trading in "options," "futures"
or "short selling," or any other form
of so-called speculation, wherein pro-
ducts are not received or delivered,
but wherein so-called contracts are
settled by the payment of "margins"
or "differences" through clearing
houses or otherwise.

(8) Extension of Postal System:
We favor the extension of the postal
savings system, to the end that de-
posits may be received without limit
and that loans may be made direct
to the people on satisfactory security
at the cost of service. We favor the
extension of the Parcel Post to the
point of fullest possible public ser-
vice.

(9) Federal Incorporation: We
believe that for the better protec-
tion of the public all private corpora-
tions doing interstate business should
be chartered by the Federal Govern-
ment.

(10) Labor Legislation:
1. We hail as one of the important
recent developments of indus-
trial democracy the achievement of
union labor conditions in industrial
establishment engaged in govern-
ment work, whether such establish-
ments are owned and operated by the
government or by private contrac-
tors. This is sound social policy
and we favor its extension to all
work performed by or for the govern-
ment.

2. We urge that upon all boards
or commissions created for the man-
agement of publicly owned industries
or services, or for the supervision of
private enterprises, the workers
shall have adequate representation.

3. We favor the progressive
shortening of legal workday in keep-
ing with the increasing productiv-
ness of machinery, and securing to
every worker a rest period of not
less than a day and a half in each
week.

4. We favor the protection of the
workers by governmental insurance
against sickness, injury and death;
together with maternity benefits and
old age pensions.

5. We favor a more rigorous and
effective inspection of factories,
workshops and mines, for the better
protection of the workers.

6. We favor the adequate protec-
tion of children by the enactment
and rigid enforcement of thorough-
going state and Federal child-labor
laws.

7. We favor forbidding interstate
shipments of all products made by
(a) children, (b) women employed
more than eight hours a day or six
days a week, (c) convicts under pri-
vate contract, (d) persons employed
in uninspected factories or mines.

8. We oppose the invasion by the
courts through injunction of the
Constitutional guarantees of freedom
of speech, of assembly and of con-
tract.

9. We favor the extension of the
Labor Bureau System, to distribute
labor in accordance with supply and
demand; and the establishment of a
system for placing settlers on un-
occupied lands, thereby relieving
congestion of population in industrial
centers.

10. We urge the development of
instrumentalities which shall guaran-
tee to every willing worker oppor-
tunity to secure employment adapted
to his capacities.

PART III

International Democracy

We recognize the Republic of the
World as the goal of international
political development. As steps look-
ing toward and corollaries of that
goal we propose the following:

(1) Abolition of Secret Diplo-
macy: We demand the complete
democratization of our foreign policy
and international relations. Believ-
ing that the making of secret treat-
ies and agreements by governments
without the sanction of their peo-
ples is one of the chief causes of in-
ternational misunderstandings and
wars, we demand that the Govern-
ment of the United States shall not
make any treaty or agreement with
any nation or nations except in
open session of the senate. We
further demand that in the councils
of nations the Government of the
United States shall urge that the
sanctions of the peoples shall be

more essential to any treaties or
agreements among civilized nations.

(2) International Policy: In the
interest of world peace and a higher
civilization we demand that the rep-
resentatives of this nation in the
councils of nations urge the follow-
ing principles:

1. The sea and all waterways flow-
ing into the sea must be open
without hindrance to the peaceful
navigation of all peoples. The duty
of policing the seas must be made
the collective function of the asso-
ciated nations.

2. All strategic ocean waterways
must be internationalized and their
protection be the function of the
associated nations.

3. Prohibitive or discriminatory
tariffs or taxes on trade and com-
merce and inequitable discrimina-
tions among the peoples of the va-
rious nations in the matter of fran-
chises, privileges and rights must be
prohibited.

(3) Foreign Investments: For-
eign investments should assume their
own risks. They should receive no
diplomatic or military support. The
United States should refrain from
becoming a guarantor of foreign in-
vestments.

(4) International Organization: We
favor the creation of an interna-
tional tribunal so constituted as to rep-
resent the weak as well as the pow-
erful nations for the settlement of
disputes between nations, and the
development of effective methods of
enforcing the decisions of such tri-
bunals.

We favor the formation of a union
of the nations of the world for the
purpose of enforcing international
equality and the maintenance of
peace.

NOW WHEN THE CALL FOR MEN IS URGENT

(By the Rev. Charles Stelzle)
There are certain fallacies which
most of us have come to accept as
gospel truth. We are told that
"one should always look on the bright
side of things."

But many things in this world
have no bright side. What about
the young fellows we knew ten years
ago—bright, talented, with splendid
prospects—slipping away into in-
temperance and degradation? Where
is the bright side to this? What
about the horrors of child labor, of
disease and suffering due to ignor-
ance and sin?

"All things are for the best," we
are told. This is repeated as though
it were a text of Scripture. There
is no such sentiment in the Bible.
True enough, there is a teaching that
when one is following out the pur-
poses of God in his life, then all
things are for the best; but many
things are not for the best—they
are hideously bad.

"Truth is mighty, and will pre-
vail"—this has been said with the
assurance that every man who
preaches the truth is sure to win
out. It is true that the truth is
mighty, and that it will prevail, but
not necessarily here and now, nor in
every individual's case. Truth did
not prevail in Judea, in Assyria, in
Greece, in Rome. All these nations
went down to their ruin because they
neglected the truth. Truth will pre-
vail, but not always the exponent of
truth. He may be called upon to
suffer.

What does all this mean? Just
this—it means that when there is
no bright side to some things, when
many things are not for the best,
when to preach the truth means suf-
fering, there is a call for men—
men with red blood and strong
hearts—men who are willing to
work and to fight for the right,
who will be willing to help destroy
those things which are not for the
best, so that the world may finally
be brighter for every man, woman
and child.

The present war is challenging men
as never before. We are sure that
we are right and that ultimately we
must win. But we shall win only
as men are willing to give them-
selves—and all that they possess.

Col. Brice Disque says: "The
Germans are still able to throw into
the fight more airplanes than Great
Britain, France and the United States
combined."

But the Germans don't have to
contend with "Bad" Grammar and his
bunch of sawdust autocrats.
