

Probably the biggest social event scheduled for the coming week is the house warming and reception to be given by the boys of Company L Tuesday night in rededicating the remodeled and renovated armory hall. Beginning with a muster and drill at 8 o'clock and followed by the reception at 8:30, the evening affair will be continued until midnight with a dance which commences at 9:30. All friends of the company in the city and county are invited to be present throughout the evening, the admission being free. Many improvements have been made to the halls and especially the floor, since the fire of a few months ago, and it is now declared the floor is the best for dancing of any in the city.

The Reynolds Automatic Side-Hill Combine Harvester

Is the only machine built that levels itself on side hills and uneven ground. Let the ball do the work, which levels the machine without any aid whatever.

The Reynolds Combine is built to save all the grain and harvest it clean. It is built to stand hard usage on even or uneven ground alike and is positively without a peer in its adaption to the rolling wheat lands of Umatilla and surrounding counties.

The Reynolds Combine is not a new machine nor an experiment, but is threshing the wheat each year in the wheat fields of this county and every machine turned out has proven every point claimed, by practical test!
