If in the sheltering circle of my arms
 No little child of mine shall ever rest,
 Nor I may feel the touch that thrills and charms
 Of helpless searching lips against my breast
 Yet for the sake of that beloved child,
 Of whom my dream is ever, night and day,
 Teach me the mother spirit, tender mild,
 That from no childish heed can turn away.
 And if the love that I had held so sure,
 Grow dim and distant till it vanish quite,
 Grant me that changeless love that shall endure,
 Strong and sufficient for earth's darkest night.
 Take from my heart all bitterness and pain
 Until these trifles, selfish striving cease
 Use Thou the life I should but spend in vain,
 And in the joy of service grant me peace.
 ETHELWYN DITHURDEE.

OUR SOLDIERS OF THE SHOPS

AMERICAN soldiers in the field are going to play a big part in the war but American mechanism, utilized in many ways will do still more

CUTICURA HEALS SALT RHEUM

Between Fingers After Two or Three Years' Suffering From Itching Burnings.

Hands Swollen So Could Not Put in Water. Used One Cake Soap and One Box Ointment.

"Salt rheum began between my fingers. It first appeared in water blisters, then patches appeared on my wrists. The blisters were accompanied by a burning and itching sensation, and I would rub my fingers until they bled. My hands were swollen, and I could not put them in water without suffering."

"This had been going on for two or three years, until I sent for a free sample of Cuticura. I purchased more, and I used two cakes of Cuticura Soap and one box of Ointment, and I was healed." (Signed) Mrs. Mary Walsh, 2228 Colby Ave., Everett, Wash.

Make your skin soft and clear by using Cuticura Soap daily for the toilet, and Cuticura Ointment for first signs of pimples, redness or roughness.

Sample Cash Free by Mail. Address postcard: "Cuticura, Dept. S. Boston," and everywhere. Soap 25c. Ointment 25c and 50c.

THE BUTCHER APPRECIATES GOOD EYE-SIGHT.

—and among the best butchers in town are those who prefer Schieder Eyeglasses because they are absolutely dependable, useful and comfortable.

towards the kaiser's undoing. Henry Ford, now devoting all his energies to war activities says:

"American mechanisms—designed by American engineers, constructed by American workers and operated by American fighters—are going to win the war on land, in the water and in the air."

The Eagle is one of two particular fighting devices which are so engrossing Mr. Ford's attention at present that he is working harder and putting in longer hours than any of the 10,000 employees of his concern.

Without going too deeply into details as to the construction of these boats, it is permissible to say that they are 200 feet long, 25½ feet wide, draw 8 feet of water, carry 5-inch guns, are equipped with submarine detectors that can spot the enemy's U boats more than a mile away, have devices for dropping depth bombs, and are expected to do great execution.

Yet they are to be turned out (big as they are) in the same standardized, systematized fashion as the little pleasure cars which made Mr. Ford's name known throughout the world. He described yesterday one of the buildings along the Rouge River, at Detroit, where the Eagles are now under construction.

"This is 300 feet wide and 1,800 feet long," Mr. Ford said. "It has three sets of rails, along which the Eagles progress from the beginning of their assembling until they are complete. At the end of the tracks they take to the water, and by that time they are a finished product, fully equipped, armed and supplied—and their crews aboard."

"It would be possible for an Eagle to leave this building, go through the Rouge River, the Welland Canal and the St. Lawrence, and right across the sea into action, without a halt." Hats off to Henry Ford and to other loyal American manufacturers and their loyal workmen. They are indeed going to have a big part in winning the war on land, in the water and in the air.

In invention and manufacture America has led the world for a half century and more. Through its inventive and manufacturing prowess, plus a red blooded soldiery, it will lead the world to freedom and safety.

A SHOWDOWN OR A BLUFF?

IS Germany to stake all on an attempt to whip the allies on the western front or is the offensive started Thursday a move to cover activity in another direction. The American strategists at Washington are inclined to the latter view. There is some reason for their view. Germany would risk grave disaster should it place all faith in a west front offensive and fail to land. For a long time the Teuton plan has been to strike at weak countries, rather than at the formidable forces in the west. Instead of decisive fighting in the west we may soon be reading of another Italian drive or possibly of warwaging against the Scandinavian countries. Yet we fight against a conceited and sometimes foolish foe. That conceit led the kaiser to take up ruthless submarine warfare—a capital blunder because it brought America into the war. It is not beyond the realm of possibility that the Potsdam warlords have underestimated the allied western strength just as they underestimated America and the allied ability to offset the submarine. If so they may risk the fate of kaiserdom on the west front. Should they do that the most stupendous fighting of the war will soon be underway.

U. S. AND ITALIANS CO-OPERATE. ROME, March 22.—It is announced that American aviation students training on the Italian front will cooperate with the Italians in aerial defense.

28 YEARS AGO

(From the Daily East Oregonian March 23 1890)
 Charles Hamilton returned Sunday from visiting relatives in Kansas.

Umatilla county's tax for 1889 is in the neighborhood of \$103,000 of which only \$20,000 has been paid.

Abs Jacobson is suffering from a badly sprained ankle received at Athena during a visit of Pendleton Odd Fellows to that place.

H. L. Marton, proprietor of the Chicago store is closing out his stock of general merchandise.

A head end collision occurred at Earnhart station this morning between No. 2, Sunday's delayed fast mail, and an eastbound freight.

William Brown, a pioneer farmer of the East end is in the city.

Former School Teachers Asked To Fill Ranks Depleted by War Call

The Bureau of Education states that Commissioner of Education Claxton is now appealing to the patriotism of former school teachers to fill the ranks of the teaching profession depleted by the war, and to school and state authorities to repeal the existing laws which prohibit married women from teaching in the public schools.

The following statement is authorized by the Commissioner:
 From every part of the country come reports of large numbers of teachers leaving the schools of cothly and city to enter some branch of the military service of the country of to engage in clerical, commercial or industrial occupations at salaries much larger than those received as teachers.

Reports from normal schools indicate that numbers of students graduated from them this spring will be less than last year. Unless something can be done to relieve the situation the places of many trained and experienced teachers will be taken by young

teachers without experience or professional training.

There are, however, in the country, scores of thousands of persons, mostly women of good scholarship and training, who have had successful experience as teachers but who have retired from active service, and these might render valuable service again in schools as a means of relief in the present crisis. I recommend, that they be called again into active service and that laws, ordinances and regulations of school boards prohibiting married women from teaching in public schools be suspended or repealed."

The Commissioner urges that normal schools give special courses this summer to former teachers, to enable them to enter the work again.

Supply and Demand
 "You believe in the law of supply and demand?"

"Yes," replied Mr. Dustin Stax. "I can trust to nature for the demand, but when it comes to supply I want to be one of the fellows who make the law."

No great man needs a brass band.

Here Is Our One Best Argument

LIST OF MONTANA LAND SALES UP TO MARCH 1ST, 1918.

Name	Address	No. of Acres

TOTAL NUMBER OF ACRES SOLD 22,480

**Indicates parties who have bought twice.

***Indicates parties who have bought three times.

****Indicates parties who have bought four times.

Can you consistently question the judgment of these parties on LAND VALUES? I respectfully invite you to interview any and all of the satisfied customers who have purchased land in Montana through my agency.

That The Central Montana Ranches Company is THE BIGGEST land selling agency in the Northwest is an irrefutable FACT.

We have listings from Kalispell to Havre; from Helena to Lethbridge, Alberta.

The "Spring Drive" starts next week. Are YOU going to be one of the fortunate ones to get in on the Ground Floor?

BEN. F. DUPIUS

Special Agent for The Central Montana Ranches Co.

Get Long Battery Life Through Good Battery Care

Unless you give your battery the care it deserves you can't expect it to keep on giving you the service you demand.

You can't get that service day in and day out unless you add distilled water—unless you keep the battery charged.

You can get every mile of service there is in that battery if you just follow carefully a few simple directions.

We'll be glad to tell you just how to take care of your battery if you'll stop for a few minutes. And also ask us about the Still Better Willard Battery with Threaded Rubber Insulation.

Talks to Oregon Farmers

NO. 3

We want to impress most emphatically on your mind, the absolute dependability of every utterance we make in our weekly talks. Every statement can be substantiated, and shown true in every particular. In ALBERTA, YOU HAVE THE GREATEST GRAIN AND WHEAT PRODUCING COUNTRY IN THE WORLD. Alberta holds the world's record, both in yield and quality. Alberta grain has carried off the prize in every competition where ever entered. In southern Alberta, Lethbridge district, the average yield per acre on 107 farms in 1916, was 53 bushels. Eighteen miles north, the Nobleford farm of 1000 acres, averaged more than 54 bu. per acre. Thirty miles southeast, 640 acres produced a wheat crop to the value of \$115 an acre, or \$105 an acre more than the land cost 10 years before. We can show you farms that did better than this, viz: 300 acres yielding 61 bushels, 175 gave 55 bushels, 120 that gave 60 bushels, and the farm showing the highest average, was wheat 74 bushels and oats 127 bushels per acre. This is the kind of land you want, the land that produces the big crops, that brings you big returns, the land that people from all parts of the country are coming to buy. To illustrate: W. J. Winstead landed in Brooks, 65 miles north-east of Lethbridge March 18th, 1916, with one car household effects, nine head of horses and less than \$500 in cash. On his breaking of sod he got 24 bushels to the acre, on some backsetting, 56 bushels, and threshed out in Oct. 7000 bushels of wheat, 2000 bushels of oats, 700 bushels of barley, 670 bushels of flax, the proceeds of which put him out of debt, put \$1500 worth of improvements on his place, bought him an automobile, and left a stiff bank account. He says, "At present prices I could cash in for \$16000. If a fellow tends to business in this country, he can't help but make money." Mr. Winstead is from Washington, and to clean up \$16000 in six months speaks strongly for Alberta soil, and this is not an isolated case, hundreds there will present you with the same testimony. The same opportunity is yours, land equally as good can be had at \$11 to \$30 an acre, 20 years to pay. Here is your chance to grow wheat, make some money, and serve your country's need. Get in this Spring, NOW is the time. See us for date and rate to Sunny Alberta.
