A Sure Way

To save money is to put it in a bank. It is not what you might have saved that counts,—it is what you did not! Remember, when you spend a dollar foolishly, you may be helping another man place his foot above your own.

Grand Detour Disc Harrows for Use with Tractors

We recommend this disc harrow to all tractor users. It is built by the J. L. Case Threshing Machine Co. in their big plow factories, an assurance of up to date design, the best of construction and high grade materials.

The operator from his position on the tractor easily controls the angling of both front and rear sections by means of a single lever.

Each section oscillates independently, which prevents undue strain should a section pass over a stump or stone.

Grand Detour harrows are built in 6, 7, 8, 9 and 10 foot widths with 16 or 18 inch discs.

If you want a dependable, well constructed harrow, we believe we have the harrow you want.
