Savages Fond of the Banjo. The banjo, in its primitive form, is found in use today by savage tribes in equatorial Africa. It is a calabash, or half a one, with strings of some sort across it, and is perhaps the most important instrument of music at cannibal feasts and on other joyous social occasions.

Almost Beyond Imagination. Astronomers reckon that there are at least 1,000,000,000,000 suns in the universe; and some of them are so far distant that light starting from them long before the earliest dawn of human history has not yet had time to reach us.

Clears the Head. Many colds in the head are relieved, particularly that heavy, dull feeling, when breathing through the nose is impossible, by employing as a throat and nasal douche half a teaspoonful of baking soda to a glass of warm water. Fill the passages with as much of the liquid as possible; this will clear the passages of obstruction and in a little while breathing through the nose is possible.

Deggs at 65c. a dozen, butter fat at 67c. and fowls of all kinds sky-high it seems as if the rancher ought to get busy and make the hens lay, and milk the old bossie cow harder than ever.

How fortunate our little Valley ought to feel; so few flu cases and not one fatal one. Payette County is sure to be congratulated.

Could Not Live Without Birds. The value of birds to man is based principally on their feeding habits. Their greatest help is through their activity in eating harmful insects, their eggs and larvae. Without this constant aid, we would be powerless to protect our trees and crops from the ravages of caterpillars, beetles, borers and such creatures.
