

FARM BUREAU NOTES

and other weed pests. Avery, Rigney and Whaley, appointed to serve, draw up resolutions and appear before the county commissioners.

The sale of pure bred sheep, especially bucks, was argued pro and con. A committee was appointed to see what could be done. Mr. Rigney and Mr. Avery were appointed to act.

Mr. A. Anderson placed the proposition of holding a fair in 1929 and stated that now was the time to start and that it was up to the farmers to start the association and promise the support of the county commissioners.

Mr. McCall spoke on the good of the boys and girls' club, for junior farm bureau work, and the benefits that developed in the fair exhibit in produce and stock.

Moved and seconded: Resolved, that the Jerome County Farm Bureau put forth an effort to have a fair in 1929, and that a committee be appointed to work on the project. Committee appointed—G. J. Whaley, J. D. Rigney and H. G. Avery.

Moved and seconded to appoint a committee to get petitions circulated to establish a herd law. (Carried.) Committee appointed—G. J. Whaley.

Control—Discussion was opened regarding the Canadian thistle, which is getting a good start. It was suggested that the county committee enforce the weed law. It would force every farmer to keep the bad weeds.

Moved, seconded and carried, that a committee be appointed to present resolution to the County commissioners to enforce the weed law in relation to fighting the Canadian thistle.

AN OLD FAULT FINDER

An irritable and fault finding disposition is often caused by indigestion. A man with good digestion and bowels that act regularly is usually good natured. When troubled with indigestion or constipation, take Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. They also cause a gentle movement of the bowels.

At Melbourne and Sydney, Australia, the Salvation Army has opened a new branch of the Women's Retreats.

The Public and the Company

A COMMUNITY always welcomes the establishing of an institution that fills a recognized community need; unfortunately it doesn't always manifest a lively interest in the health of such an institution after it is established.

It is one thing to establish industries; it is quite another thing to build up, develop and maintain them.

An industry can be established by the investment of capital; its development and maintenance depend upon the attitude of the public toward the enterprise and toward the product.

Likewise, the permanency of an institution depends upon the willingness of its customers to pay a sufficient price for its product to enable it to continue strong and healthy financially.

The Mountain States Telephone and Telegraph Company's system of wires, furnishing the means of communication over mountains, plains and desert, is a tremendous factor in the development of the West.

Telephone service is a "home product" of every community in the mountain states, and is woven into the very warp and woof of commercial and social life. The permanency and adequacy of telephone service depend upon the same factors as are involved in the security and permanency of every other established industry.

With very, very few exceptions the people of the West recognize these principles and pursue a "live and let live" policy toward all legitimate business institutions.

Now All You Good Fellows, Come Fill Up Your Pipes

15c

The Velvet tin is twice as big as shown here

If ever men are "Tom" and "Bill" to each other, it's when good pipes are a-going. If ever good pipes go their best, 'tis when Velvet's in the bowl.

For Velvet is a mighty friendly smoke. Kentucky Burley is the leaf that Nature made for pipes. Wholesome and hearty, honest as the day. And Velvet is that same good Burley leaf, brought to mellow middle age.

For eight long seasons Velvet "meditates" in wooden hogsheads, throwing off the rawness of "young" tobacco—truly "ageing in the wood." Out Velvet comes—cool, calm and generous—the tobacco Nature made good, kept good and made better.

Velvet's sweetness is the sweetness of good tobacco, not "put on" like "frosting" on a cake. Its mildness comes from natural ageing, not from having the life baked out. Its fragrance is true tobacco fragrance, not a perfume. And Velvet makes an A Number One cigarette. Roll one.

As good old Velvet Joe says:

"Fill yo' heart with friendly thoughts,
Yo' mouth with friendly smoke—
An' let the old world wag."

Liggett & Myers Tobacco Co.

BEAR'S LAST FIGHT

Bruin Made Big Mistake When He Tackled Turtle.

Like Ben King's Famous Pup, Slow-Moving Loggerhead Demonstrated That "What He Took Hold Of, He Never Let Go."

While bears are certainly dreadful antagonists, they have been known to get the worst of it when out of their element. Curious and unequal combats occur when beasts of prey attack creatures under unusual circumstances. The pursuer in such a case is likely to incur more risk than the pursued, a fact that was illustrated in a novel encounter in a harbor of Florida between a bear and a turtle.

The crew of a schooner while ashore heard a strange rumbling and pushing around a turn in the beach, saw a huge loggerhead turtle in deadly combat with a big black bear.

From the men's position it seemed that the bear had sprung upon the turtle as it was retreating toward the water, and had tried to overturn it. In some way the bear had stepped in front of the turtle, which, thrusting its head out, had quickly seized one of the bear's hind legs and held it.

At this the bear roared loudly, pawed furiously at the turtle's back, and tried to force it over. The turtle resisted with all its strength and weight. He settled down close to the ground whenever the bear made an extra effort. Then, as the bear would relax its efforts the turtle would suddenly start up and endeavor to get nearer the water, keeping his firm hold on the bear's leg.

Finally, by a sudden push and a powerful muscular effort of his head and paws, bruin managed to get the turtle half set, one side being raised a foot or two. Pursuing his advantage, he seized one of the turtle's hind flippers in his jaws, and the snap that followed showed that the bear felt that things were coming his way.

He continued to chew the flipper and endeavor to overthrow the turtle. But his antagonist worked around and finally got in a stroke with his sharp claw that badly ripped the bear's underside. This infuriated the bear to such an extent that he let go his grip on the flipper and, reaching his head down, tried to reach and free his hind leg. Herein he committed a terrible tactical error and the enraged loggerhead quickly improved the opportunity thus afforded him.

As the bear's nose came within reach the turtle let go the hind leg and quick as a flash fastened his iron

grip upon the bear's jaw. The bear was taken by surprise and roared lustily with pain and rage. The turtle pushed on and dragged his unwilling captive along. The bear saw his danger and felt it, too, for they were so near the water's edge that the waves were splashing them.

The bear continued to struggle furiously, but his strength soon began to fail, for the turtle dragged him deeper and deeper. Fighting with his head half the time under water so exhausted the bear that presently he began to gurgle. That moment was fatal. The loggerhead marched off into the sea with his enemy and the last seen of the bear was the feeble kicking of his hind legs. Next day his body was washed ashore, cut into a dozen pieces. —New York Herald.

Can An Auto Prance?

Can an automobile prance?—or is it in this one respect inferior to the horse? A few days ago a handy little truck was navigating Spring street, Jeffersonville, which is rather rough because the war delayed repairs. It was loaded with long boards which projected far behind and practically balanced the truck on the rear axle. When holes in the street were struck the front wheels reared up so violently that the chauffeur, or driver, was catapulted into the air. He then got down and "led" his truck which did not prance unless running at least five miles an hour. Had he "let 'er out" she would certainly have set on her tail. —Indianapolis News.

Ideal Bed for Invalids.

In view of the elaborate care with which most details of sick nursing have been worked out, it is more than a little curious that the maintenance of the patient's warmth in bed should have been left so long to the precocious ministry of the hot-water bottle. At the "Cripple's" hospital, Alton, England, two wards are now supplied with electric mattresses, which have proved both safe and convenient in practice, even when a child is the occupant of the bed. The mattress is differentially heated, and the heating element is so disposed that the maximum warmth is generated at the foot end, less in the middle and none at all at the head end.

More Food From Irrigation.

Prospects throughout the western reclamation belt indicate that the food production records of 1917 and 1918 will probably be eclipsed by those of the current season. Prices of essential foodstuffs are high enough to make it attractive and profitable for farmers to produce on a big scale. Reports indicate the labor supply is abundant and good, although demanding high pay. Credits are not cramping the consequence that nation

farmers are not handicapped in their operations. This is why it looks like a boom year for the rubber-boot farmers of the far West.

GIVES CAT PALM OF WISDOM

Writer in California Newspaper Comes Forward With Loud Praise of Household Pet.

It is often a subject for discussion as to which is the wisest animal. Some say it is the dog and some are in favor of the horse, while scientists appear to think it is the elephant.

We beg to differ with all these views. We do not even agree to the movement in certain quarters to give the palm for wisdom to the fox. To our mind the wisest animal that lives is the cat. And, if it goes to that, we are willing to have it further known that of all animals we like the cat the best.

A cat is so wise that it succeeds in not letting us know how wise it really is. If you will be friendly with cats—and that's an easy thing to do—you will be astounded at their wisdom. And you could not imagine how affectionate a cat can also be.

There is an old yellow cat up in the Verdugo hills that we wouldn't trade for all the dogs and horses and elephants outside of Barnum's circus. When the last of his nine lives departs from the earth those mountains will be a very lonely place for us. —Los Angeles Times.

NOTICE FOR PUBLICATION

Notice of Proof of Application of Water to Beneficial Use

Notice is hereby given that at 11 a. m. on the 26th day of September, 1919, at Eden, County of Jerome, State of Idaho, before Earl S. Young, Notary Public, proof will be submitted of the application to beneficial use of two (2) cubic feet per second of the waters of Webb's Coulee in accordance with the terms and conditions of Permit No. 13930 heretofore issued by the State Engineer of the State of Idaho.

1. The name and postoffice address of the person or corporation holding such permit are Elmer Webb, Eden, Idaho.

2. The use to which said water has been applied is irrigation.

3. The amount applied to beneficial use is two (2) second feet.

4. The place where said water is used (if for irrigation, give full and accurate description of the lands irrigated) S1/2SE1/4, Sec. 7, T. 9 S., R. 19 E., B. M., and N1/2 NE1/4 Sec. 18, T. 9 S., R. 19 E., B. M.

5. The date of the priority which said user is prepared to establish is March 14, 1919.

W. G. SWENDSEN, Commissioner of Reclamation, Aug. 7—Aug. 28.
