Road working seems to be the general order of the day, and it is certainly needed. Several of the roads leading to town are reported almost impassable since the recent rains. Washouts are numerous, and in many instances the roads of a few weeks ago are now gullies or yawning abysses which must be surrounded to be passed.

We desire to remind the citizens of Camden and vicinity that next Thursday is the day which has been set apart to clean off the grounds at Camden Cemetery. As this is a matter in which all of us should at least feel an interest, let everybody make their arrangements to spend the day at the cemetery next Thursday and go prepared to work.

There were over one hundred ministers and delegates present at the conference, which was in session Friday and Saturday.

We have received part eighteen of the Book of the Fair. This is the only work in any wise attempting to reproduce in print the entire Columbian Exposition at Chicago. In this respect it is without a competitor. It confines itself neither to art alone on the one side, nor to dry statistics on the other, but it presents in attractive and accurate form the whole realm of art, industry, science, and learning, as exhibited by the nations of the earth, so far as can be done in reasonable limits. The work will consist of 1,000 imperial folio pages, 12 by 16 inches, to be issued in 25 parts of 40 pages each, and at the price of \$1 a part. It will contain over 2,000 of the finest illustrations from official sources, many of them full page plates covering 102 square inches of surface. Buy no book of the great fair till you have examined the Book of the Fair, which is the only authoritative publication covering the whole ground. Published by the Bancroft Company, Auditorium Building, Chicago.

A REPLY TO TAX-PAYER.

Editor CHRONICLE:

We had almost come to the conclusion that the "Fool-killer" had completed his work in this county, and was now seeking new worlds to conquer, but after a careful perusal of "Tax-payer's" lengthy reply to "Observer" in the last issue of THE CHRONICLE, we are forced to accept the conclusion that the arch-fiend failed to remove the fool of all fools.

Had he been careful, and he certainly was not, we, and the people of old Benton, would not have been afflicted with such bosh and inexcusable nonsense on the part of the seedy Tax-payer. We dislike very much to see a person feign ignorance to hide his ignorance; or, in other words, we regret to observe Tax-payer make use of seedy dialect to protect himself. Why not be proud of the hayseeds and moss that adorn his person? Why not give his real name to the public so that the people may nominate him for Congress next term, or at least that some beneficent friend may inform him that the civil war is over and that he is living or rather existing in a time of peace.

We believe that Tax-payer has recently been resurrected from the eternal darkness of deepest oblivion and placed in the elevated position of school director, and the importance of his position has turned his head. We feel confident that he would make an efficient water-carrier for a school.

We, like Tax-payer, are not a school teacher, nor do we ever expect to be, and we make this statement in order that Tax-payer may not be under the impression that the author of this article is a teacher trying to vent his spite upon his brainy head. We simply dislike to see the teachers bemeaned by such nonsensical bosh.

Talk sense, Tax-payer; get out of your state of know-nothingism, old fogysm, etc., and present something to the press worth publishing, and we will be delighted to sanction it, and if you are right we might get our consent to publicly nominate you for Congress.

Now, as to answering your argument in favor of charging one dollar for each certificate, we see only one point that is worth answering, and in fact it is the only point you made in your long harangue worth noticing, and that is the question of acquiring revenue for the county. You say you believe it is right to charge the teacher one dollar for each certificate in order that some revenue may come to the county. Well, now, after the poor teacher's warrants have been shaved 10 per cent. he pays enough revenue to the county without being charged an extra dollar for his certificate. If the teacher could present his warrant and get every cent it calls for the charge for a certificate would not be such an important matter, and every teacher in the county would willingly pay his dollar.

Just such fellows as Tax-payer are responsible for this state of affairs, and if they along with him could be banished to some land where intellect and progress never held sway, the county would be much better off.

Now, as to growling at the court, treating all alike, giving us better teachers, etc., we will say that not a growl have we given expression to, and as to the co-operation you refer to, we assert that it is the very kind you are not giving your help to. Your argument shows you up in your true colors of one opposed to all fairmindedness and in favor of self.

Now, Mr. Tax-payer, we have tried to do as you bade us—smoke your argument in our pipe—but we are sorry to say, after several vain attempts, we examined our pipe and behold! there was nothing in it. Give us that tobacco, cultivated by an intellectual mind, and we will gladly smoke it, but—beware of lugs! JUSTICE.
Big Sandy, July 29.
