

# THE SEQUACHEE NEWS.

VOL. 3.

SEQUACHEE, TENN., THURSDAY, JAN. 30, 1896.

NO. 30

## Public School.

The Public Schools, primary and secondary open next Monday at 8 o'clock a. m.

Now we want everybody to send their children every day unless there is some urgent cause for their absence.

We want the children to take hold and make a reputation for Sequachee second to none in the county.

We want every parent and guardian to be present if possible at the opening of the school.

The teachers are strangers, let us give them a good send off, and show them and the children that we believe in good education.

And not only then, but let the parents make a little effort to encourage both teachers and children by calling at the school house.

Try it fathers, mothers, guardians: It will do you good to have performed your duty to your children.

## Sequachee Musical Society.

A musical organization was effected Saturday evening by the signing of an agreement, adoption of By-Laws, and election of officers and the venture may be said to be fairly started. The object is good and should be made a real pleasure to its members and the community. The rehearsals will be conducted in a business way, and only those who desire to improve themselves and study music are allowed to be present.

The members will be divided up into groups and all given something to learn. The meetings will be held every Saturday evening at 6:45 p. m.

The officers are, President, Thomas H. Hill; Secretary, Mrs. J. W. Graham; Director, William C. Hill.

## Good Flour.

We believe in home rule, also in the faithful support of home industries, which leads us to remark that the brand of flour known as the "Pride of Sequachee" is a fine, high grade of flour, and good enough for anyone. We know what we are talking about. We are using the flour from the Jasper mill right along and like it very much.

## Thanks.

THE NEWS is delighted to receive by every mail from Woburn, papers reporting the celebration of the fiftieth anniversary of the ordination of our kind friend, Rev. John Qualey, of that place. The good people honored themselves by showing their respect for him who has served them so faithfully for thirty-two years.

## SCHOOL CHILDREN

buy your tablets at this office. A nice one for only 1c. Only a few on hand so come quick before they go.

## LOCAL.

The penalty on taxes begins Feb 1st.

Mr. I. N. Knox, of Inman, was in town Saturday.

Attention is called to the "ad" relative to potatoes in this issue.

After some dreary days the sun came out again on Tuesday.

We have a claim against the Melrose Manufacturing Co., which we will sell cheap.

Miss Bell Francis, after a week's sojourn with her sister at Bridgeport returned Monday.

Did you know our job work was the best and most for the money? Try us and see.

We hear from Dayton, Tenn., that the family of Henry Kent will shortly return here.

The man who sent THE NEWS a brand new pipe is a gentleman and a scholar, and his name is Henry Kent.

Mr. Wm. Owen went to South Pittsburg, Tuesday, Mr. C. H. Davison acting as Deputy P. M. in his absence.

Mr. B. L. Francis, in his own words, arrived at Atoka, "right side up," and will now devote his attention to instructing the Indians.

F. J. Cheney and & Co., have concluded it would be a wise thing to advertise in THE NEWS. They know a good thing when they see it.

The work of preparation for business is still going on at the saw and planing mill. We expect Messrs. Gabel and Brown will be ready in the next paper to advertise their business.

Mr. J. M. Carnutt called on us Tuesday. He has left Rising Fawn owing to the shutting down of the furnace and now contemplates a trip to Arizona.

Thanks to Mr. C. H. Davidson, we got some coal. A friend in need is a friend indeed. As it was this shambing was about ready to shut up shop for the want of a fire. And still these mountains are full of coal.

We are glad to know that Gabel & Brown have arranged to get timber from the Town Co., on and near the town site, for manufacture here. Now we hope they will push work so as to get their product on the market and do the place some good.

Mr. H. E. Tate, who assumes charge of our schools next Monday, was in town Tuesday. He hopes and expects a good attendance and good support. Last week he supplied the place of primary teacher in the South Pittsburg school for Mrs. T. H. Baker, Jr., whose absence was caused by the death of her little son.

This is not a chestnut. We do job printing.

Mr. Volley Lasater is on the sick list this week.

L. W. Gabel loaded a car of lumber Wednesday.

Mr. A. K. Pryor of Victoria was in town Sunday.

Tolley Burnett was in town Wednesday from Whitwell.

Miss Kate Haynes has a severe attack of cold this week.

F. M. Eakin from the mountain was in town Saturday.

Miss Annie Richards who lives near Jasper is very sick.

Speaking of weddings there is a little danger as this is Leap Year.

A sign of prosperity the yelling of the bull-drivers on the mountain side.

Gabel & Brown expect to circulate their saw this week—that is, saw lumber.

Mr. J. H. Vinzant has one of the Gustafson valves in operation on his steam saw mill.

The Valve works have something over two hundred valves on hand, nearly completed for shipment.

Mr. Lum Houts and family and Mrs. Isabelle Norris visited Rev. Jacob Houts of Kelley's Ferry last week.

The game of snap is alright but it isn't a snap to play it. See the point. This is an alleged joke and is marked accordingly.

Miss Lula Lasater entertained quite a number of her friends at her home Saturday evening. Music was in order until a late hour.

Mr. Will Harris was in Sequachee Sunday and lingered quite a while at the gate, and it so cold that Mr. Haynes may look out soon.

Maj. Thomas H. Hill of THE NEWS staff invested in a life insurance policy and went to South Pittsburg Wednesday in the bright light.

Our "Little Buttercup," Mr. Chris. Gabel is now engaged in overhauling the big planer at the saw mill. Three set screws in the shifting attachment were broken off, necessitating a long and tedious job.

Mr. M. C. Campbell would like to see the policy outlined in the NEWS of last week, in the editorial on Reform, carried out. We are confident that other thinkers like him will admit the truth of what we said.

Austin Coppinger the mighty hunter got five coons one night last week and it wasn't an extra night for coons either.

We object, however, to his keeping our friend and comrade out of his bed till thirteen and fourteen o'clock.

J. V. Lasater went to Jasper Thursday.

M. Martin went to Whitwell Saturday.

A Mr. Wright was in town selling fruit trees Monday.

Patronize a job office where your interests are looked after.

If any of our subscribers will bring us some apples, they can.

Miss Hattie Walker is now visiting her sister Mrs. Kilgore of this city.

Three more cars of walnut lumber went through here Monday from the upper Valley.

The Valve Works last Saturday cast repairs for the big 5-inch valve belonging to the Roane Iron Co., Rockwood, Tenn.

We thought ourselves secure for some coal from Whitwell by team, but it is hardly likely that the roads will permit any hauling before May.

The postmaster and one of his farm hands was busy Friday last constructing a crossing through the sea of mud which surrounds the post-office.

There is quite a movement in walnut lumber now and parties are inquiring for it in this section. Two car loads were shipped from Let, Bledson Co., last week, to Liverpool, Eng., by way of Port Royal.

Mr. Jess Coppinger is again under the weather, we hear. This time it is not rheumatism. He heard of a trade in cattle and corn the other day, and rolled over the ground in such terrific convulsions of laughter, that up to the present time it has taken one half barrel of salve to make him feel comfortable. We sympathize with him very much and wish his speedy recovery, but at the same time counsel him not to laugh that way again.

## Valves Shipped.

Gustafson Bros., shipped on this morning's express, 1-4 dozen 1½ inch Balanced Plain Eccentric-Lever Valves to the Roane Iron Co., Rockwood, Tenn. This is the same firm to whom the large casting for the 5-inch Throttle-valve was sent a few days ago. This Throttle-valve has now been in use a little over a year and a half in the most exacting service where all other valves previously used failed to give satisfaction.

The additional fact that more or less new valves are being ordered, when once introduced, speak well for the merits of the Gustafson Bros.' Valve.

They claim that none others will be used wherever the new balanced Quick action valve has been given a trial, as they possess superior merits that cannot fail to be appreciated by practical engineers.
