Our Baptist friends are holding an old fashioned revival here this week, the meetings every evening are pretty well attended. Elder McCall is a powerful speaker, and still believes the old-time doctrines of literal hellfire and brimstone. There are people nowadays who have never been taught to believe such doctrines, and to them it all seems very strange. Everything, however which tends toward good ought perhaps to receive encouragement, but it seems to your correspondent that the preaching of such things in the present age is rather a sad commentary on the intelligence of the community.

## Comfort and Economy

The Wilson responds so accurately and unfailingly to its dampers that when the room is once warmed, by opening the draft wide you can set the dampers and maintain an absolutely even and healthful temperature.

## With a WILSON WOOD HEATER

it is just as comfortable in the farthest corner of the room as it is within a few feet of the heater. This means health and comfort.

The patent Hot Blast Down-Draft, found only in the Wilson, consumes every particle of burnable elements in the wood, thus giving greater heat with one-half the fuel.
