## Lightning Kills Few.

In 1906 lightning killed only 169 people in this whole country. One's chances of death by lightning are two in a million. The chances of death from liver, kidney or stomach trouble is vastly greater, but not if Electric Bitters be used, as Robert Madsen, of West Burlington, Ia., proved. Four doctors gave him up after eight months of suffering from virulent liver trouble and yellow jaundice. He was then completely cured by Electric Bitters. They're the best stomach, liver, nerve and kidney remedy and blood purifier on earth. Only 50 cents at St. Lucie Drug Store.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

The many warm friends of Hon. F. M. Hudson will respond with alacrity to the recent appointment proffered him by the Florida Railroad Commission which is level headed and choose none but the best in its appointments, and know what it was doing when the selection was made. Judge and Mrs. Broome, of Fort Pierce were the over Sunday guests of Miss England. The Judge and his wife were most favorably impressed with the little city itself, also the promises the future seems to hold in store for its success, and expressed the wish, that at no distant time they might become residents, but not visitors. There are many fine residence lots on the market, and it is a hope with their owners that purchasers may soon come their way, and why not Judge Broome and his bride.

After leaving the Hopkins the party wended their way toward the northern portions of the Gardens and came across by the Saeger Brothers plantation and were soon again in Walton after a very enjoyable drive.

## Development of Port St. Lucie

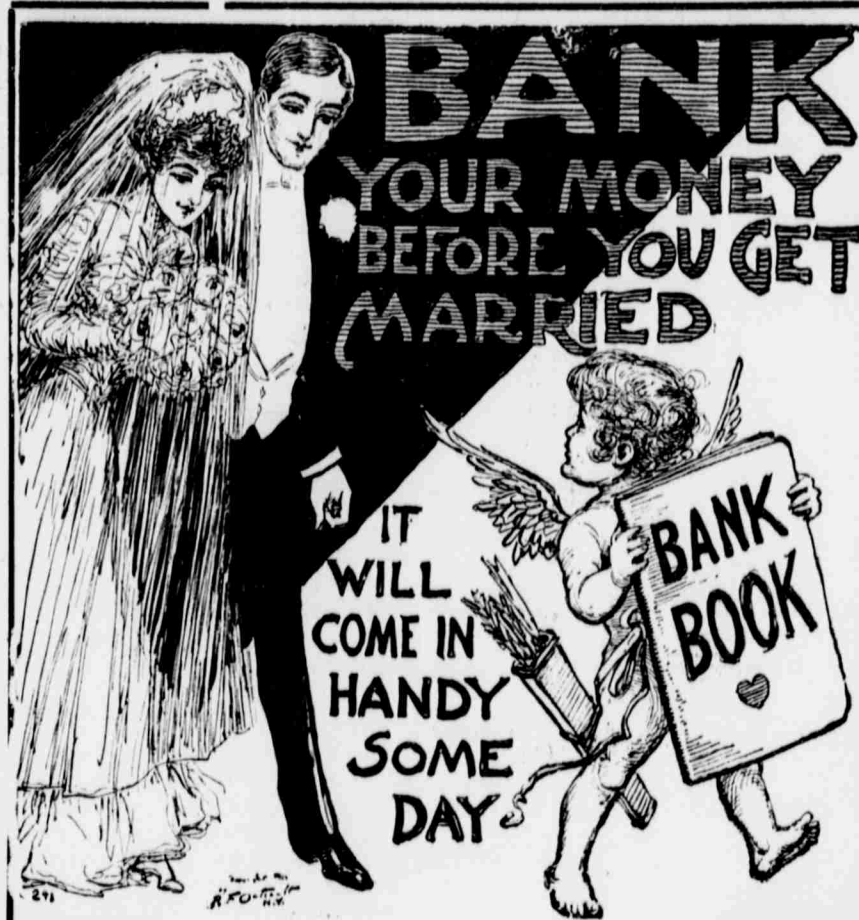

Capt. J. H. Rogers, of Sewalls Point, who is prominently associated with the Sewalls Point Land Company and the building of Port St. Lucie, was in the city the first of the week and reported many improvements in progress and in immediate prospect in the new city.

The main avenue, 100 feet wide and 2½ miles long, has been cleared and practically graded. Piling for a pier 170 feet in length with a 60 foot T at the end has been put down. Captain Sewall and Captain Rogers have recently completed a canal and basin at the end of Sewalls Point, making a splendid harbor. Dredging operations are in progress opening a 40-foot canal connecting the inland lakes at Port St. Lucie with St. Lucie River.

Captain Rogers also stated that modern electric light, ice and water plants will be erected by November, and a hotel will also be built this summer. He is confident that an appropriation will be made at the next session of congress for the inlet at Gilberts Bar—an improvement that means much to Palm Beach County. In this connection he stated that the government had called for bids for opening a waterway from Great Pocket to Peck's Lake. This improvement will greatly simplify inside navigation from West Palm Beach to Sewalls Point.—Palm Beach County.
