THEIR OWN COUNTRY

How strange that no one is ever overcome by the heat of a hot summer. We will probably get plenty of rain from now on. The season is at hand.

There is just one automobile in Damascus, but even that one may be hard to dodge.

The latest in aviation is the death dive spiral. Sooner or later it will justify its name.

The way some of the fool optimists talk to enough to make the rest of us turn pessimists.

A traveler reports that potatoes in Greenland do not grow larger than an ordinary nut.

Dealers in canoes might try giving a course of swimming lessons to every purchaser of their wares.

Bevere of the man who makes a perfect score in pointing out the imperfections of other people.

The fish walk is one of the latest dances. But a lot of fellows are more interested in feeling the fish bite.

The returned traveler who says there is no fighting in Finland may have tried to "start something" and failed.

A Chicago experimenter announces that a family of five can live on \$4.50 a week. Useless knowledge. Who wants to?

Statistics indicate that aviation is the most dangerous thing to learn there is and that it is no safer after you know how!

Photographs of our leading pugilists playing golf show that at least two celebrated varieties of sport are being more or less metamorphosed.

A woman smoker of 75 was burned to death while trying to light her pipe. Another evidence of the harmful effect of tobacco in shortening life.

Because a stout lady stepped on his pet bunion a New Jersey man is suing the railway company. If he wins corners will at last have acquired a market value.

STILL MORE FACTS

Statistics of farm animals in the United States are given a little consideration. The facts presented by the latest reports of the department of agriculture do not point in that direction. It seems that in 1912 the number of horses in this country increased by about 100,000. Their aggregate value rose more than \$15,000,000. Yet in the same year the scarcity and high cost of horse shoes were given a little consideration.

The facts presented by the latest reports of the department of agriculture do not point in that direction. It seems that in 1912 the number of horses in this country increased by about 100,000. Their aggregate value rose more than \$15,000,000. Yet in the same year the scarcity and high cost of horse shoes were given a little consideration.
