Thou hast brought the pearly dew From its chambers, to renew From its chambers, to renew Life and beauty in the flowers Blooming in our verdant bower While the daisy on the plain,

Peace comes with thee; thou hast shed Sleep o'er many a weary head; U'er the robin, through the gien, 'Mid the haunts of beast and men. Hushed is now the honey bee. Still the sportive lamb's young giee, And the violet shuts its eye When it knows that thou art nigh,

ing as I never had spoken, inwardly overwrought with excitement, but outwardly the cold, distant personifica-tion of discipline. Within two hours I Bud with sleep thou givest dreams On a thousand pleasant themes: had that brigade formed in a hollow square, and from its center I renewed Of the present, of the past, With its bliss too great to last. my threats and my promises. They were effective. Reason returned to the Thrilling love tones greet our ear, Words we long have pined to hear Eyes departed beam with light men, and with it came shame. What had looked like a dangerous outbreak was quelled by moral force.

### MARY'S SOLDIER.

The General's Story of How He Escaped Sentence.

"Speaking of court martial," said my friend, the general, "I recollect one which terminated more pleasantly. and yet it was a narrow escape for the

"Tell me about it," I urged, as the man brought us our coffee and cigars.
"Do you know what 'In front of the enemy means in military parlance?" he asked, thoughtfully, as he flecked away the first ash.

"Why, I suppose in front of the enemy means—in front of the enemy."
"Sapient youth: In time of actual warfare all troops as soon as they have and I was about to report at Washingder young woman, neatly dressed, stood before me. Her face was pallid; of the enemy."

"When they get there?"

"No, at once." "Then a regiment raised here in New York during the rebellion as soon as it soldier! He said that you might," and had been sween in was in front of the "Precisely. And thereby hangs a

your soldier is, and what you want."
"'I beg your pardon, she said, gently, and I felt like a brute. 'My name "Not at all. The articles of war are explicit, and if there's one thing cirummed into a soldier's ears, day in and day out, it's the articles of war.

They are his creed." "Yet how many of us can repeat our creed correctly? Can you?"

"You just ought to hear me! But to my story: At one time during the latter part of the war I was stationed here in New York, detailed as inspector general to raise a brigade. I had been successful, and my camp of instruction contained fair material. It was a few piles distant on foreign soil. "What!"

be tried before the court martial now "Yes, in Jersey. One afternoon, while in session." I was resting in my quarters after the fatigues of a hot day, an orderly brought me the unpleasant tidings that my camp was in an uproar. The men refused to obey orders, and open vic deed for the young recruit. lence impended.

What was the reason?" "There's no reason for disobedience in the services, yet, I admit to you, there was an excuse. I had seen cause of trouble for some time, and had striven to avert it. The pay was in arrears through some red-tape delay. The men were poor, and their families were suf-

acknowledged daring-"

and I didn't. But it seemed the forlornest of hopes. I dressed myself earefully in full uniform. Why? Because an officer who expects obediene must first command respect. If h wishes his soldiers to be soldierly he more critical or imitative. I hastened facts, the court would find him guilty, over the ferry and soon reached the and the articles of war prescribe death high board fence which encircled the as the penalty. Courts martial must encampment. From within came a confused rumble like the portent of a storm. I approached the wicket. It gating circumstances can only be conwas locked. I peered through the lat-There was the sentry, sure enough; but with what a difference hands in pockets, in no wise heeding strained in their grasp. my presence. I would like to have shot that man, but I was bound and braced

"Attention!" I commanded, sharply The man started, then straightened, seized his musket, presented, and stood

"Open that gate!" "He obeyed at once, and I passed through and marched quickly fo All over the field were knots of men, shouting, gesticulating, fiercely ha-ranguing. Here and there were a few officers arguing and pleading in vain. The majority, however, sat dejected within their tents. It was a most dis tressing sight for a true soldier.

"I approached the first group o about two hundred frenzied men. A captain was just leaving them, put sued by taunts and jeers. He was an insignificant man, with a repulsive face; naturally pompous in bearing, but now thoroughly cowed. Yet as he saw me he assumed a certain uneasy

HARVESTING CORN. Value of a Regular System in Cuttin

Each Shock While the inventors of harvesting machines are making successful prog-ress in constructing machinery drawn by horses for cutting the corn crop, the great majority of the corn fields in the country at large are still harvested by means of band labor, when not allowed to go to waste. It is important, ther fore, while millions of dollars are expended in labor by the cultivators of this crop, that every facility should be afforded, and the labor reduced as far as practicable. The suggestions we offer on this subject are not only intend ed to abridge labor, but to preven much of the existing waste by the needless exposure of the corn fodder.

The practice of planting eorn in "hills" is still very largely pursued throughout the country, and when the crop is ripe enough and the grain has well hardened, it is cut by hand and secured in shocks. These remain sev eral weeks till the season arrives fo husking and stacking, during which time the shocks are exposed to weather and storms, and a portion of them are commonly beaten down and prostrated soaked with rain and rotted so as to be of little value for fodder.

A reason for this prostration and waste is the one-sided way in which the shocks are built. Instead of place ing the shocks in an equal circle around the center, they are often placed nearly all on one side, pressing them more or less out of the center, giving the shocks trating a portion of them. This waste

essary care to build them with equa additions on every side, and by thu giving them a firmly erect position. A may be adopted, saving time and labor, which the accompanying figure may fully explain. The field is cut by taking five rows of hills at a time, and placing the shocks in the center one. Twenty-five hills will make one shock, the center being first taken; all the others are cut and placed around it. If the corn is of a large variety, three bills will be as much as the operator will hold in the grasp of his left arm while he cuts them with his right hand and place them against the forming shock. In the figure, the shock is larger and in the center; and the first three hills are those indicated by the letters AAA, car ried to the shock on the dotted line The next three are BBB, cut and placed beside the others. Each sucessive three are marked by the letter CCC, DDP, EEE, FFF, GGG and HHII: and being taken and cut in this regular order they will be placed in separate and the laborer can hardly avoid mak-ing it equally upright. The regular cystem will abridge his steps, and make random. As every shock requires the same order, the operator soon becomes accustomed to it and works rapidly The same general course will apply to larger shocks, or to those made of smaller corn. With slight modification, it will apply to corn. in drills. The arshock, if the hills are three and a half quired. Saving the folder would be still more imporcent, making all the difference between such as is fresh, green and uninjured, and that which is

## stroyed by prostration and rotting GROWTH OF WEEDS.

with rains .- Country Gentleman.

It Pays to Destroy Them Just as The Are Coming to the Surface. Cultivators who have tried both ways know the several advantages of destroying weeds just as they are coming to the surface. The ground is then

rendered mellow and clean with tenth part of the labor required to destroy large weeds; the crop has not been retarded in growth nearly to its entire failure. The estimate is made that weeds after growing a fortnigh and becoming a foot high, contain by much substance in growth, or more than when first making their appea ance at the surface, and with this

great difference it is easily understoo why they retard or destroy growth Take as an illustration the commo turnip crop. If the weeds are not al lowed entrance, the turnips will appear like those in Fig. 1. If the weeds are rampant, the turnips will make no headway, and will resemble those in Fig. 2. Late in the summer is the season when so many weeds steal a large growth.—American Cultivator.

Ducks and Corn Fodder. Ducks will greatly enjoy green corn fodder, if it is cut fine, and especially the suckers. A few rows of corn with the seed very thick in the rows, may be cut and cured for ducks when the corn is about two feet high. If the fodder is cut very fine in winter and sprinkled with bran and cornmeal the ducks will highly relish it. The blades of corn fodder may also be stripped, cut fine and scalded for them. It is best to always scald their dry food at all sea-

Training a Horse. One of the most important things in training a horse is to teach it to stand at the word of command. Adopt some single word to convey your order, and never vary it. Then compel the horse to obey it fully every time it is used. Do not use two different words to cor vey the same meaning, nor attach dif-ferent meanings to the same word if you expect the horse to learn and obey them rately.--Indiana Farmer.

## AGRICULTURAL HINTS. TRAVELERS AT ST. LOUIS.

Three Thousand Men to Para

with Military Escort. tion Attracting Great Crowd asing Popularity of the "Ex."
-Other Attractions.

Sr. Louis, Sept. 15.-The illumina tions to-night embraced all the grand features of the earlier displays, and were even grander than the earlier illuminations, owing to the arrival of several thousand additional globes and an immense quantity of electrical ap-paratus. The whole of the 75,000 gas and electric lights were alight, and the proceedings passed off without a hitch and amid great enthusiasm. Several and aimid great chithasaism. Several visitors from eastern cities and from Europe were loud in their expressions of opinion that the illuminations are far grander than anything ever seen in

any other city.
After the lights were turned out there was a general rush to Exposition Build-ing, and the magnificent structure was thronged with delighted guests. This, the ninth consecutive season of the St. Louis exposition, is far exceeding all past efforts, both in the matter of beauty and attendance, and Gilmore with his band of one hundred men holds the crowd enraptured four times

A large number of special attractions cluding a Travelers' Protective association celebration on Saturday, October 1. On the evening of that day the T.

will parade with a military escort, and ald. a very elaborate programme has been prepared for the entertainment of the visitors during the day. The Veiled Prophet will also arrive on October 1st, and will give his annual parade and ball on the following Tuesday. The route of the parade has bewill be grander than ever. From Octo-ber 3 to October 8 the annual fair will be open, and for this a large number of additional attractions are announced with two grand street illumination and other treats. The carnival is preing a remarkable and unprecedente

The railroads are offering exceptiona inducements to tourists and excursionists, and full advantage is being taken of their enterprise and liberality. As is well known throughout the con-mercial and business fraternity United States, St. Louis is best railroad center on the continent, an immense number of trunk lines either terminating or pass-ing through the city. It is on the line of three or four favorite routes from New York to the Pacific coast, and is the natural terminus of all roads running south and southwest and into the Mexican republic. St. Louis is so highly appreciated as a great manufacturing and commercial center, as well as a unique carnival city, that the practice of securing tickets through it and stopping off a few cays to enjoy the beauties of the city is becoming more and more com-mon. Tourists in making their ar-rangements should bear this fact in mind and not omit from their itinerary one of the most important and interesting points of the new world.

-In Cochin, a town on the coast of Travancore, a state in the southwest of India, there is a small body of Jews who are called White Jews, because their skin is fair and their bair light. They were once very numerous along this coast but in Cachin where they have a quarter all to themselves, there w only some two hundred of them. They have dwelt here for hundreds of years as a distinct race, and claim to be descendants of the Jews who fled from Jerusalem after its detion by the Romans (A. D. 70). Little Folks Magazine.

-How many truffle eaters know that the dainty is a fungous growth found in loose soil a few inches under ground. usually in forests where oak, beech and chestnut trees abound? All truffles ar imported, none being found in this country. In olden times in England truffle hunting was a sport, pigs being used to seent them out.—N. Y. Times.

DINED ON GRASSHOPPERS.

Unique Frast That Once Interested th People of Kansas.
A few old-timers still remember the

A few old-timers still remember the grasshopper dinner given in this city a number of years ago, during the first great grasshopper plague in Kansas. The 'hoppers were brought in from Kansas, the feast was prepared by a well-known caterer, and there were 'hoppers in every style. There was 'hopper soup of two or three kinds, the 'hoppers were boiled, reasted and fried, were made into pates and entrees, were served up in hash and omelette, were 2 ð served up in hash and omelette, were dried, ground to powder and served at pemmican. In short, were brought to perminican. In short, were brought to the attention of the assembled scientists in so many different ways that the learned professors, who gathered to teach the people of the west how hoppers might be made a blessing in disguise, after the first taste of two, placed their hands on their af-flicted stomachs, took a glance down

two, practificated stomachs, toos the bill of fare, and unanimously act journed to a neighboring restaurant to get something that they could eat. Only one or two had the courage to eat the bill of fare, and it is said that they did not feel well for several days.

As an object lesson in education the hopper banquet was a failure; as an illustration of scientific heroism it was a brilliant success on the part of those brilliant success of the succ farmer of Kansas, who, when told by an entomologist that grasshoppers could be eaten, for John the Baptist lived on locusts and wild honey, replied: "Well John the Baptist might have done that, for those were the days of miracles, and I reckon a man would cat almost anything then, but if he lived nowadays he would have to be fitted out with a different kind of stomach to enjoy these 'hoppers."—St. Louis lobe-Democrat.

BITTERS

An Old Quotation.

The quotation, "who shall decide when doctors disagree, and soundest when doctors disagree, and soumoest
casuists doubt like you and me?" was
written by Alexander Pope, "Moral
Essays," Epistle 3, line 1. The original did not apply to doctors of medicine, but to doctors of philosophy.
There is one fact all doctors agree upon and that is that indigestion is at the bottom of half the ills that afflict the human race. When the stomach is all right the system is all right but when the stomach is all wrong the 30tire system is a wreck. There is no escape from this fact. If when you are tormented with dyspepsia you will get a box of the laxative gum drops and take them regularly you will soon be relieved of all trouble. These drops have no taste of medicine and they can be given to children as so much confectionery but they act gently as a cathartic without pain or griping and they will help the most obstinate case. Get them of any dealer. Small boxes 10 cents; large ones 50 cents.

SYLVAN REMEDY CO., Peoria, III. Unlike the Dutch Process No Alkalies

Other Chemicals are used in the preparation of W. BAKER & CO.'S BreakfastCocoa. which is absolutely pure and soluble.

It has morethen three times the strength of Cocon mixed with Starch, Arrowroot or Sugar, and is far more consumed, conting less than one central cup. It is delicious, nourishing, and nature.

Sold by Grocers everywhere. W. BAKER & CO., Dorchester, Mass.

Give Ear

To the plain facts about Pearline, and then give Pearline a chance to prove them, by giving it a fair trial. . Nothing else will give the same result. It washes safely, as well as surely; it cleans carefully,

as well as easily. It is as cheap as soap and better. Anything that can be washed, can be washed best with Pearline. It lightens labor and does lightning work. As nearly as we can figure, about eight millions of women use it. Do you? You will sooner or later.

Don't To peddlers or unscrupulous grocers who offer imitations of Pearline, and say, "it is just as good as," or "the same as" Pearline. IT'S FALSE.—Pearline has no equal and is never peddled.

JAMES PYLE, New York.
