

At last the high school team has lifted itself from last place and has made a resolution to stay away from it. Wednesday they defeated the Waxis in three games. Naber captured high place for total pins with 639, which also gives him the record for the highest number of pins in three games for the league. But for several splits in the last game he would have made a still greater total. As it was he made 234, 245 and 160. The scores of the match follow:

High School.				
Groebner	143	149	173	465
Woebke	186	162	135	483
Bruns	157	148	153	458
Boerger	181	170	156	507
Naber	234	245	160	639

Totals				
Waxis.	901	874	777	2552
W. Schleuder	168	155	163	486
A. Frenzel	184	117	138	439
Average	150	150	150	450
H. Schleuder	190	134	120	444
Schmidt	164	214	168	546

The Beck's took two from the Wicherski's on the same evening in spite of the good rolling done by Wicherski and Emmerich, the former making 569 total, with a 232 single count and the latter 559. The scores:

Beck's Pharmacy.				
Backer	161	168	149	478
Amann	157	189	149	495
Vogel	161	184	126	471
Spaeth	174	177	160	511
Seifert	189	168	150	507

"They are getting too strong," was the comment made after the High School team had defeated the leaders of the league two out of three games Monday evening. Not only did they defeat their opponents but they did what no team in the league did before, threw a 900 game in three successive matches. Cy Groebner, their newest addition proved himself a worthy member of the team by throwing a 234 count in the first game.

Adolf Bierbaum did his best to check the onrush of the youngsters but one man can't win a game alone. In the first game he threw 223 and made a total score of 579 pins. The scores:

Telephones.				
Bierbaum	223	176	180	579
Hy. Grussendorf	173	146	152	471
Grams	146	150	117	413
F. Groebner	139	164	152	455

Everyone Should Drink Hot Water in the Morning

Wash away all the stomach, liver, and bowel poisons before breakfast.

To feel your best day in and day out, to feel clean inside; no sour bile to coat your tongue and sicken your breath or dull your head; no constipation, bilious attacks, sick headache, colds, rheumatism or gassy, acid stomach, you must bathe on the inside like you bathe outside. This is vastly more important, because the skin pores do not absorb impurities into the blood, while the bowel pores do, says a well-known physician.

To keep these poisons and toxins well flushed from the stomach, liver, kidneys and bowels, drink before breakfast each day, a glass of hot water with a teaspoonful of limestone phosphate in it. This will cleanse, purify and freshen the entire alimentary tract, before putting more food into the stomach.

Get a quarter pound of limestone phosphate from your pharmacist. It is inexpensive and almost tasteless, except a sourish twinge which is not unpleasant. Drink phosphated, hot water every morning to rid your system of these vile poisons and toxins; also to prevent their formation.

To feel like young folks feel: like you felt before your blood, nerves and muscles became saturated with an accumulation of body poisons, begin this treatment and above all, keep it up. As soap and hot water act on the skin cleansing, sweetening and purifying, so limestone phosphate and hot water before breakfast, act on the stomach, liver, kidneys and bowels.

HIGH SCHOOL QUINT TAKES ANOTHER.

Another victory was added to the string already gained, when on Friday evening the high school quint defeated the Kasota team on the Kasota floor by a score of 37-10. The game was a one-sided affair and from the outset the victors could easily be distinguished.

Had they not been handicapped by playing in a cold room and on a comparatively small floor they would undoubtedly have run up a score far over the half hundred mark. The Kasota team made eight of their ten points thru free throws, getting but one field basket. As in all previous games Herzog and Berg were the stars of the game, the former making seven field goals and the latter three. Six free throws were made by Berg and Herzog also made one. Coufal found the net four times and Kogge also added two points to the score.

The line-up and summary:

New Ulm	Pos.	Kasota
Coufal	c	Jardine
Olson	r. g.	Gustafson
Kogge	l. g.	Leaverson
Herzog	l. f.	Stockton
Berg	r. f.	Peterson

Summary: Substitute, Wiedenmann for Kogge, Shapiro for Herzog; Field baskets, Herzog 7, Berg 3, Coufal 4, Kogge 1, Peterson 1. Free throws, Berg 6, Herzog 1, Peterson 8. Referee, White. Umpire, Hamlin.

The boys are out for the district championship and are doing all in their power to win every game.

Next Monday, Feb. 12, the team will go up against the fast St. James team which will undoubtedly be the hardest fight of the season with the exception of the Mankato game. The lineup will be strengthened by the addition of Ernie Schleuder, the veteran of last year's team.

NEW LAW WOULD GIVE NURSES TO COUNTIES

A bill has been introduced in the legislature providing for the employment of Public Health Nurses, to be assigned to the schools, etc. The act as introduced, is as follows:

"County Boards of Supervisors are hereby authorized to make appropriations for the employment of school or public health nurses; such nurses are to be employed only from a list of registered nurses certified by the State Board of Health after such competitive tests as shall be prescribed by the State Board of Health. It shall be the duty of such nurses to act as hygiene experts for schools within the county not already provided with regular medical inspection; to assist authorities charged with the care of the poor in safeguarding the health of such persons; to assist in discovering and reporting cases of tuberculosis and other communicable diseases; to act as a visiting nurse and to perform such other duties approved by the State Board of Health, as shall be designated by the Board of County Commissioners; to make written reports to the State and County Boards of Health in such form and at such times as shall be prescribed by the State Board of Health. The Board of County Commissioners may detail a county nurse to act under the direction of the county Superintendent of schools or the County Health Officer."

WE offer you the best the market affords in fresh, pure food. We carry a full line of all staple groceries and your every day wants can be filled at a moment's notice.

QUICK DELIVERY TO ALL PARTS OF CITY

WHEN you want something specially tempting come in and look over our line of vegetables and fruits and the best of canned goods, delicious, wholesome preserves, jams and jellies, syrup, premium bacon, Brookfield Pork Sausages, fresh oysters and dozens of edibles to tempt the appetite and nourish the body.

MAUDE ADAMS IS AMONG WEALTHIEST OF STARS

An idea of the wealth that Maude Adams has accumulated during the twenty-seven years of her stage career can be gained from the recent sale of her town property in New York for a sum estimated to be \$700,000, according to a Western paper. She has remaining two country places, one of them being valued at \$150,000, the other at about one-third that amount.

The various properties owned by Miss Adams make her one of the richest members of the theatrical profession. Her annual salary has always been kept secret, tho well informed persons have frequently said that she received more than \$100,000 some seasons. Her tastes are extremely simple and she does not partake in the least of the extravagance of the average stage star. She had her town home in the four story property which has just figured in a sale. While the furnishings of this home were chosen with an exquisite taste, they were said to be almost Spartanlike in their inexpensiveness and lack of ostentation.

Most of Miss Adams' leisure time is spent at her summer home, Lake Ronkonkoma on Long Island. This is one of the prettiest country places on Long Island, with about 500 acres of rich farming land. She is very much interested in farm products and in dairying and poultry raising. Her farm is said to be a profitable financial investment, too.

GROCERIES

FRESH and GOOD

The best all the year round

Let us show you how prompt and courteous we can fill your order.

THE PRICE OF WHEAT

In spite of the highest price the world has ever known there is a deficiency of a billion bushels in the world's crop. The world must be fed. Now is the opportunity for the American farmer to make money for himself and be a patriot at the same time.

MORE AND BETTER GRAIN

Safe farming is the best farming. First select the variety of wheat which is best adapted to our soil and climate. Cut out the mongrels and breed your wheat up to its highest yielding and milling properties. Wheat is badly mixed.

MARQUIS WHEAT

Is the variety which has the best milling qualities and makes more and better flour, therefore brings the highest price to the farmers. The elevators and mills will pay you more because the wheat is worth more. As a rule, unless we have just such a year as last year, MARQUIS brings better results because:

It matures from five to ten days earlier than other wheat, avoiding so much danger from winds and drouth. We may never have another year like last year.

Being earlier, Marquis escapes rust, which attacks later varieties.

It does not shell out and waste so badly as Blue Stem, Red Fife, or Velvet Chaff, during harvest. This is true of it even when over-ripe.

The straw is shorter and stiffer, hence in a dry year it suffers less from drouth and in a wet year it suffers less from lodging.

It contains lots of gluten and the gluten is much superior to that of any other wheat, therefore is a better milling wheat.

HOW TO SELECT SEED WHEAT

Why not unite upon MARQUIS, and cut out the others? Blue Stem and Fife are very good but it is better to grow the same kind and get a better price.

Screen your seed and fan out all trash, immature kernels, weed seeds, wild oats, etc., leaving the seed to be planted the heaviest you have, with an equal amount of plant food in each kernel, which will cause it to mature at the same time, making less waste at harvest. It all ought to get ripe at the same time.

Examine your seed closely to see whether it contains bunt or stinking smut and treat your seed with formaldehyde before sowing.

How much of your seed will grow? It is easy to test it. Take an ordinary piece of blotting paper, wet it, fold it over in the middle, to open like a book, count 100 seeds just as they run into the blotting paper, put a strip of rag about ten inches long in the fold of the blotter, wrap it up in a piece of butter paper (greased paper), wet the whole thing, then hang the wick in a glass of water like a lamp, put the test on top of the glass, do not let it dry out or freeze. After six or seven days, open it and count so many kernels strong, so many weak, so

many dead; then let it grow for a few days on top of the glass and see if the sprouts will grow two inches long before they wither. This is important this year, because wheat is badly shrivelled and contains little plant food. Take no chances on your seed wheat. If the seed you have is all right you are fortunate. If it does not test 90 to 95% strong you are in danger; find some neighbor, if you can, who has good wheat enough to supply seed for you and sell the seed that you intended to sow. Ask your County Agricultural Agent or the Agricultural Teacher in your High School to help you locate MARQUIS seed in your neighborhood, or ask your seed man to get it for you, but be sure he honestly tells you where it is grown. Do not get it too far away from home. If the seed man cannot supply you to your satisfaction, apply to your mill or elevator. All of them have agreed in this territory to locate proper seed wheat for their customers. If they cannot supply you write to Prof. Manley Champlin, State Experiment Station, Brookings, S. D., or Prof. C. P. Bull, Secretary, Minnesota Crop Improvement Association, St. Anthony Park, Minn.

If you have any good Marquis wheat to sell advise your mill or elevator.

CROP IMPROVEMENT COMMITTEE.
