GIVE THE BOYS AND GIRLS A CHANCE.

Schools may not make men and women, but they will always help. Certainly the lack of educational advantages will not make men and women. Because the little low schoolhouse with the slab benches and two-by-four black-board has turned out strong men and noble women, it does not follow that they would not have been even stronger and nobler and have had greater influence for good if they had had better advantages in their youth. Because your hero, perhaps, learned his letters for himself by a flickering fire of light wood knots and got most of his learning in the "School of Hard Knocks," it does not follow that there is no better way of training men. All the evidence agrees that the more of opportunity, the more of culture, there can be put into the life of a boy or a girl, the better will be his or her chances of developing into the worthiest and most useful type of manhood and womanhood. We believe, with Elbert Hubbard, that it is a good thing for a boy to have had the privilege of warming his feet cold mornings on the ground where the cows lay the night before; but we also believe that it is good for him to have had the privilege of going to a schoolhouse made neat and bright and cheerful without and within, and of advancing from that schoolhouse to higher institutions of learning where he can breathe the air of academic inspiration, absorb the traditions and ideals of his college, and acquire all that it can give of learning and culture and breadth of thought. — The Progressive Farmer.

THE DOCTRINE OF DEMOCRACY

In an address at the democratic banquet at St. Paul on June 1, 1911, Joseph W. Folk defined his idea of democracy in these words: "Democracy is a religion; the religion of brotherhood among men and of equal rights for all. It is a religion that would demand more of the Golden Rule and less of the rule of gold in government and in our daily lives. It would not array class against class, but would protect the rights of all by having each respect the rights of the other. It would not attack wealth honestly acquired, but would wage unending war against the privileges that produce tainted riches on one side, and undeserved poverty on the other side. It would protect property rights, but would recognize the fact that property rights are best protected by preserving inviolate the public rights. It would not combat

men, but the evil that men do. It would seek as a remedy for existing evils, not less government for the people, but more government by the people. It would place conscience above cunning, and the public good above private greed. It would not offer a man an advantage in the shape of a subsidy, or bounty, or protective tariff, enabling him to make money at the expense of his fellowmen, but it would assure him that it would give no one else such a special privilege over him. It would guarantee to all an equal opportunity to live and labor and enjoy the gains of honest toil.

"This is democracy as I understand it."

HOW OLD PEOPLE

May Prolong Their Lives

At an advanced age waste is more rapid than repair. The organs act more slowly and less effectually than in youth. The circulation is poor, the blood thin and watery, the appetite poor and digestion weak.

We want to say to every aged person in this vicinity that Vinol, our delicious cod liver and iron tonic (without oil) will prolong life. It creates an appetite, aids digestion and makes good blood. In this natural manner Vinol retards waste and replaces weakness with strength, giving new life to the worn system.

If people in this vicinity only realized how Vinol invigorates old people we would not be able to supply the demand.

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you.
