If any member fails to attend properly to his team, or keep his fences in repair he is fined from \$1 to \$10, and the Draw the soil up about the plant with a money is collected out of the first pro- hoe and firm it about it, so that the ceeds of his crop. Membership in such aclub would prove expensive to a good many white farmers.

Among the numerous plans for the coming summer made by the great army of | top of the plants on each side. flower lovers all over the broad land, I hope many have included one, two or more window boxes. It can be said in their fayor that they offer one of the casiest methods of gardening, and one of the prettiest forms of out-door decoration; and to the large class, who, green feed for them, as corn is scarce through ill health or many cares, are debarred from the ordinary flower garden, they are especially suitable. They give also rare chances for richness of artist's work may be as plainly visible in a well-filled window box as in many Peas are the best feed for hogs, and

four feet long in each corner of the box, than pasture. from the arch above. Bulbs of oxalis deppi, which had been tucked in here and there, furnished abundance of prettily marked leaves, and the outside of the box was completely hidden by a perfect mat of othonna, tradescantia. in the centre, with white geraniums on either side, surrounded by quantities of fusion of drooping vines. These boxes were sheltered by a veranda, but had an unlimited supply of sunshine during the middle of the day, and were perfect marvels of luxuriant growth. Bogonias are among the most suitable plants for this kind of gardening, and

the tuberous-rooted varieties reduce the labor to a minimum. A box on my own veranda, last summer, contained our of the latter, while Maderia lambered over the work of slender wilclambered lows to the ends, and wreathed the upper part of the window with their own peculiar drapery of green leaves, and aintly sweet flowers. 'A quantity of variegated periwinkles completed the effect. On the approach of cold weather, such a box can easily be removed to warmer quarters, gradually dried off, and then placed in a frost-proof room or dry cellar until the following spring. A collection of fuchias, half a dozen different kinds, in a large box is also a charming, and unlike specimen pot plants, they can be left to their own devices, and neither trimmed nor trained For a good-sized box no vine is more

it is easily grown from seed. Two little pots filled with moist earth and placed side by side in an empty match box, the seeds planted edge down, the whole covered with a pane of glass, the seeds planted edge down, the whole covered with a pane of glass. So far at I can learn there was only one variety that ripened perfectly have germinated, they germinated, they germinated, they germinated, they germinated. Two little plants for me. After the seeds have germinated, they germinated, they germinated. Two little plants for me. After the seeds have germinated, they germinated. Two little plants for me. After the seeds have germinated, they germinated the potential to the country of these people is the delicacy of the more of th

Nothing adds so much to the chams of the rich, glowing colors of foliage plants as a judicious mixiure of ferns and some of our native ones are quite equal to the greenhouse varieties. Taken up in early spring before the fronds have begun to unroll them-selves in the sunlight, and put here and there among brilliant coleus or crimson dracenas, they will grow and thrive either in chade or sunshine, and end grace and beauty to their surroundings. Rustic boxes filled entirely with ferns, and wild grasses, and draped with mitchella vines, may deck a shel-tered veranda all summer, and then do

winter. Cyperus alternifolius, also, though isually recommended for Wardian cases, will give charming effects among ouvardias or abutilons in a large window box, and sweet peas and mignon-ette are always acceptable. Sweet peas must be covered three or sour inches when sown, or the vines will soon turn rellow and droop away without a single

luty at a north window as ferneries all

In regard to the size, shape and ornamentation of the boxes much will depend on the plants chosen. For strong, quick-growing ones, depth of soil and plenty of root room are required, while for the lower-growing and delicate ones shallow boxes are more desirable. One thing bear in mind; no art can decorate equal to the forms, colors, shadings, intricate loopings and draperies of healthy vines and flowers, so there is no necessity for elaborate ornament in the box itself; it should always be subordinate to the plants therein. The soil should be light and rich, and the supply of water must be ample.—Vick's Illustrated Magazine.

Early Pig Pasture.

What is it best to sow for an early Ans.-It is not advisable to pasture early, the same season the seed is sown: but the best you can do is to sow four pounds of Orchard Grass, six pounds Blue Grass and 12 pounds Red clover seed to the acre. To this you might add three pounds of Northern Red Top. The White Clover is very early and is he ground well and brush in the seeds. If you can do this just before a rain all the better. All the seeds mentioned may be sown together in the early spring. You might sow a patch of rye for pasture to ease the grass, but the success of this you can best determine for yourself.—Kural New Yorker.

### Growing Celery.

We are asked to give directions for ground is fit to work. The ground should be level and the soil mellow and or on some trampled bank a crocodile hens free from lice. If they are very rich, and it is better when it is being lies asleep in the warm sun, with a fixed thoroughly pulverised, which it ought to be, to mix it with short stable manure. Sow in rows eight inches apart, using ing with life-life that is ever stirring as, good screens of evergreens on the one ounce of seed to every twenty feet and pull out the weeds as soon as they are seen. As the plants advance in with its great saving and little cost, is growth cut off the tops—perhaps twice this strip of mud and water rises an albefore planting-as that process in most impenetrable barrier of forduces a stocky growth and plants est, nearly impossible to pass by treated thus suffer less in trans- land, but which is fortunately planting. I see an inquiry in your paper as to the time to sow clover seed. I was glad to see some one raise the discussion on perfect mat of othonna, tradescantia, description of German ivy and dew plant. The other box had a large, double, purple fuschia in the centre, with white germinms on the control with the control with the control with white germinms on the control with the con the ground when out of the way of frost. By this plan a man won't miss getting a stand more than once in five or seven germinates he is a goner.—Indiana Farmer.

Caution in Regard to Seed-corn. D. S., Ionia County, Mich., writes: For 15 years there has not been a sea son so bad for ripening corn as that of 1883. It is estimated that 150,000 bushels of seed-corn will be needed in the State of Wisconsin alone, owing to the failure of the corn to ripen. Similar conditions prevail in all corn-growing states, and probably not one farmer in fifty has saved corn that is fit for seed Every one should to-day test his seed corn by placing several average sample corn by placing several average samples between folds of moistened flamed and if it does not germinate then look sharp for corn that will grow or the result will be hundreds and thousands of dollars of loss to the fermers and millions to the country. Look above the formers and millions

The state of the s

Why Apprentices are Scarce. A contemporary writer says it is principally because of the conceit of weak and foolish parents who could not think of allowing their boys to soil their hands with manual labor or tarnish their pedi-

gree by associating with common workmen. Many and many a young man have I known whose aptitudes called to him with all the imperious demands of instinct to learn a trade, but he was the officers a pretext for dividing prevented from doing so by his parents, ho preferred to see him filling the more important and dignified position of clerk, often working fifteen hours a day for \$15 per month, and sometim vielding to the small temptation to leave unpaid his tailor's and washerwoman

bills. Or, if he escaped the clerkship, he was almost sure to be found among the luckless ninety-and-nine professional men who stand off and ager Haverly; 1 eye with green envy the one in the round hundred who has Jack Haverly."

made a success. It is not the lack of attention to the new workman that lowering the standard in mechanical trades, but the folly of parents in closing the doors of the trades in the face good material we get bad. It is very often the case that we get hold of a boy who has few or no qualifications, natural at common labor, and, as we can get no better, we have to do the best we can There is ho doubt we are getting poorer subjects every year for apprentices for this very reason. But we can reach a point so low that it is impossible to of business. Some plant dudes and raise men. Many some grasses at all, or to pasture very more than ever before it is wedded to The City of Mexico possesses many thought. The manual training-schools which are springing up in nearly all of of receiving his highest reward. With we see no reason for fearing that the being very comfortable." race of good workmen in any trade will

In the Lagoons of the Congo. "A rustling in the vegetation, and large varanus lizard slips into the water smirk hanging about his grim muzzle. These lagoons are places that are seeth striving and active-and when you sudexpectant hush of a thousand apprehensive creatures. Beyond the lagoons and peckers are creeping up the branches, deftly turning round towards the unseen side when they observe you; large, green mantises, or 'praying insects, are chasing small flies with their great pouncing forelegs, and every now and then a blue roller-bird snaps up a man-tis, in spite of its wonderful assimilation to its leafy sourroundings. Farther into the forest, the canal, a blind alley of water, stops, the soil becomes solid and well raised, and a native path is discernible, leading because we are approaching the abod of men. Out of the bosky trees little troops of black and white hornbills suddenly start, and flap their loose, irreg ular flight to another refuge. Violet plantain-eaters gleam out in their beau-ty from time to time; golden cuckoos, yellow-vented bulbuls, green fruit pigeons, gray parrots, parrots that are gray and blue and yellow-shouldered. green love-birds, a multitude of little wax-bills, a medley of diverse and beautiful birds, enliven this walk through the forest, along the black. peat path, with their loud cries, their lovely plumage and their rapid move-ments."—From H. H. Johnston's book

### on the Congo. The Infernal Machine.

The infernal machine can hardly be alled a new invention. The explosive force of gunpowder was too destructive an agent to escape the notice of the disaffected. The shell no doubt suggested the Orsini bomb. It was de structive, but it was bulky. No man could carry many of them about his person. It was effective against individuals, but powerless against society. Against the reapons of organized governments it was as impotent as the kuife. Shells thrown by hand were no match for shells thrown from cannon. Consequently, while Orsini bombs have been used with fatal effect against individuals they have never faced the organized from others I have talked with. My facilities for knowing have been somewhat better than those of most farmers, as I have been selling a seed sower for the last ten years. From what I can very thunderbolts of Jove. They can gather, about the 15th of April is the be carried in quantities about the perbest time, if the season is favorable; if son; they can be thrown by hand or not, sow later, when the ground is dry and cracked, and before a rain. I don't sow on a snow or in the moon, but on verize, and kill all within a certain radius. They can be manufactured cheaply, secretly and readily, Any manufacturer of bad smells in the basement of years, but if he sows early and the seed a soap factory can turn out more means of destruction in a day than Krupp could in a century. Nay, the work could be done in any back kitchen. If inventions. They introduce us to a warlike outfit, cheap and easily manufactured, which every one can own and every one can use. Is it likely that the block upon the game of rebellion will be continued long? Are the guardians of society justified in ignoring the fact?

Gossip About the Williamsire Dentist So Charles Howard, the millionaire

f Vermont is to leave \$1,000,000 to his niece, Mrs. Evans, the wife of the rich Parisian dentist. Truly the Bible saying holds good, "to him that hath shall it be given."

Evans is already several times a milionaire, and this will be a gretty addition to his fortune, which is increasing at the rate of hundreds of thousands yearly. It is generally supposed that he made the most of his fortune filling the interests of those with whom I have bus teeth. But this is a mistake, as the folowing talk with one of the oldest dentists in the United States, a man who was years ago connected with one of the imperial courts of Europe, will show:
"Dr. Evans," said the gentleman, was born in Lancaster county, Penn., and he started life as a jeweler's appren-Dr. Miller who made the examination tice in Lancaster, the same town in of Guiteau's brain, has been devoting which Buchanan began life as a young lawyer. After learning the jewelry

> to go to Europe, and got letters from the College of Dentistry at Baltimore to Brewster, who was then the leading American dentist in Paris. Evans was a money making fellow and very plausi When he called on Brewster Brewster saw he was bound to make his way anyhow, and fearing if he did not employ him Evans would hurt his trade e entered into a partnership with him, The conditions of the contract'were that Evans should work for Brewster three cars at a nominal salary, and at the lose of that time Brewster should go out of the practice and leave it to Evans, pnd he was bound thereafter not to ractice within three leagues of Paris. vfterwards he found that Evans was aorking entirely for himself and not at all for him. He would spend hours on filling, making it shine and finishing t up beautifully at the expence of the

> the contract, Evans fought him in the courts and beat him. And Brewster vas thus crowded out of Paris. "When did Evans become Court den-"I don't know the time. He says. inderstand, that he was filling Eugenie's teeth when Louis Napoleon came o his office for some dental work, and that here the two met, and from that meeting afterward sprang their mar-Napoleon owed much to Evans

n many ways. You know he saved the life of Eugenie one night as she left the Grand Opera House, and an attempt was made to assassinate Napoleon by throwing hand-grenades. He afterward aided Eugenie in escaping to England and went with her in 1870. At this time everyone else had deserted the Em-press, and she fled to Dr. Evan's house. doctor's wife was at the seashore, and Eugenie, dressed in Mrs. Evan's clothing, was passed off by Evans as his vife, and driven in his own carriage to the Norman coast. Thence they got a boat to England. "Dr. Evans," this gentleman went on,

is worth several millions, and he has grand palace in Paris. His office practice in the Rue de la Paix nets him probably \$60,000 a year, but this is not ow he has made the most of his money. When Napoleon was President of the Republic he was quite poor. He died very wealthy, and much of his money was made through Evans. Napoleon knew what action was going to be taken on public matters, and he also knew how this would affect stocks. If he ould use his information in buying and selling he could make large sums easily. But it would not do for Napoleon to be connected with a broker. There must be some trusty go-between, added to a safe banker. Evans, I am told by good ent home awaits them at Meridian. authority, was the go-between, and his position as dentist enabled him to do it to the best of his advantage. He had access to Napoleon at all hours, and he was the only one who could take precedence over the Cabinet and every one else. He attended him at his toilet at 8 o'clock in the morning, and was on s close terms with Eugenie as with

Louis Napoleon.
"One day Eugenie said to him: 'Dr. Evans, at 11 o'clock to-morrow an order will be issued withdrawing the French troops from Rome.' Evans at once went to the broker and invested in certain securities which he knew would be affected. At 12 the next day, after the order was issued, these securities went up like a shot, and Evans made \$60,000. Of course, Eugenie came in for her

o'clock Wednesday morning, the 30th, of heart disease, aged fifty-nine years. Eighteen months ago he was married, for the second, time to Miss Sarah Dean, sister of Gen. Lucius Fairchild, since which time he had been taking an extended bridal tour in Europe. Mr. Conover was born at Dayton, Ohio, and graduated at Princeton college, both from the changes. When the avenue de l'Imperatrice was to be laid out, Napoleon, taking down a drawing, showed Evans certain property and told him to buy it. Evans did so and this in a few days after was worth from thirty to fifty times the amount Evans paid for it. I suppose that he and the Emperor afterward divided the profits.

"But Dr. Evans' practice alone" share for her pin money.

'Dr. Evans," continued this gentleman, occupied this position during all divided the profits.
"But Dr. Evans' practice alone

amounts to a great deal. He has dealings with many of the courts of Europe. and though I do not consider him a good dentist, still he has that reputation, and makes a great deal of money. When Court, shed tears when on the Shiloh Napoleon was on the throne it is thought he acted as Napoleon's diplomatic agent in a quiet way on the pretense of three hundred Union veterans around his trade. Going, for instance to Rushim how the husband of his daughter sia, the rest of the world wondered what General Wallace, was killed near the Louis Napoleon and the Czar was up to spot then under foot. Why the Marriage Did Not Take Place.

What is said to be the true story of the postponement of the wedding of Hugh J. Jewett's daughter Julia and the subsequent breaking of the engagement with young McCormack of the great mower and reaper concern at Chicago, is just beginning to be talked about at the clubs in New York. The wedding was to have taken place some three or four months ago. McCormack came on three weeks before the day set. In that time he managed to so offend College. His surviving bryther, Ed-ward, supplemented this by a gift of boasts of his wealth and other similar fensive to her. She told her sister she would never forgive herself if she marchair in the college. Now his three ried him. Her father was absent from nephews have added \$40,000, and call home, but her brothers insisted that if would disgrace the family for her at that late day to throw McCormack over and won her reluctant consent to let the ceremony take place Mr. Jewett got home on Saturday night before the Wednesday set for the wedding. When ization, including dresses of the latest style, and who recently cast them aside he learned of the change of his daughand went to live in a wickiup with a ter's affection he said there was only one the devil delights in the horrors of war, he must be in ecstacies over these new ing bad whiskey all night, he arose in rule by which he should be guided. It she did not love the man she should the morning and began to beat and kick involved in acting under such a rule, he, as the head of the family, was prepared to meet it. It is said the boys felt rather cut up at their fathers decision, as they had hoped much from the union of two such prominent families. But everybody whose opinion is worth hav-

A Great Gambler Failed.

New York Special: On a put for 2,000 Western Union and small puts on Eric, James Keene failed to respond, and with that fail the bottom of the street that he had reached the bottom of the splendid fortune which a few years ago was the wonder and admiration of speculators. It for some time had been suspected that Keene was in a strait, but pluck kept him up, and until lately he though the would pull through. Very little was held aginst him by brokers, but he has privileges out of which have come heavy losses. He paid out recently to holders of his stocks \$175,000. The failure was for but \$14,000.

The following statement was issued for publication:

during the last few months, in my efforts to

the interests of those with whom I have business.

Keene's career has been wonderful. He made his fortune in silver speculation in San Francisco. He was a bull in Crown Point from \$10 to \$2,700, and a bear all the way down. It is estimated that his winnings there were from three to five millions. Coming here in 1879, entored the market as a bull and was credited in two years with having added to his fortune \$7,000,000. Meanwhile he had won a reputation as being one of the pluckiest operators ever on the street. Everything he touched during his success turned to money, and quite carly in his Wall street experience he worsted Mr. Gould. It is curious that the remarkable drop in Gould's Western Union recently was the direct cause of Keene's failure. Luck drop in Gould's Western Union recently was the direct cause of Keene's failure. Luck turned against him in 1881. He lost on wheat at Chicago and had a fight with the Standard Oil company, which cost him an immense sum. Then some of his speculations turned on him. He fought pluckily but could not resist the tide. He has paid out within two years millions of dellars on wiviless accounts he knew much about it he took a notion

f dollars on privilege accounts. In Memory of Judge Kidder.

Sioux Falls.—At a meeting of members the bar of Minnehaha county and officers of the general term of the district court, on the lst inst, a committee, consisting of E. Parli-man, William A. Wilkes, H. H. Kieth, T. S. Free and F. L. Boyce, was appointed to pre-pare resolutions on the death of the late Hon. Jefferson P. Kidder, judge of the Fourth ju-dicial district. This committee, at a meeting recently, reported the following, which was adopted and ordered entered in the court record: Resolved, That the supreme court of this ter-ritory, the district court of the Fourth judicial district, the bar, and people of this territory have sustained in the death of the Hon. Jeffer son P. Kidder, the loss of an honorable and upright judge. That his long judicial career in this territory has been marked by great industry, high abilities, and incorruptible integrity, and in the termination of his long public career, universal regret is felt and unusual sympethy, extended. office. Then Brewster tried to break

sympathy extended.

Resolved, That in this slight tribute to h nemory we can but inadequately express the abors, characterized as they were by honor, ndustry and the fullest integrity, are left for the future, and stand as an encouragement to hose of us who survive him, showing that success in life depends more upon integrity and good faith than upon more brilliant accom

The county house of Van Buren county Michigan, located near Hartford, thirty mile west of Kalamazoo was burned to the ground ot 2 o'clock Wednesday morning, and fourteen inmates perished in the flames, being as fol

James Johnson, an old sailor, eighty-eigh years old; Henry Baker, half mute, aged forty-signification of the sample of the sampl over seventy; Peter Balden, Deboran Gravatt, over seventy: Mrs. Curtis, insane; Caroline Shearer, aged thirty-five; Caroline Lang, aged thirty; Mrs. Wilson and her daughter aged ten. The building was of frame, and burned very rapidly. The above were all in one wing. Most of them were smothered in their beds, but several were found together. Only one body was found recognizable. All that could be found found recognizable. All that could be found for the others was put into one box the size an ordinary coffin box. The first known of the was the cries of the paupers. The build ontained forty-five paupers. The remaining of thirty-one all escaped, also all the hir help. Loss, \$15,000; insured.

Ella Wheeler Married. Milwaukee Special: The greatest and mos mouncement recently that Ella Wheeler was arried to a wealthy young manufacturer from Connecticut. The marriage was a very quiet affair, and took place at the home of Col. H. S. Benjamin, at Prospect avenue, where Miss Wheeler has been visiting for several weeks. The bridegroom is R. M. Wilcox, one of a heavy form of allegrance manufactures. The first acquaintance and courtship have been very romantic, and Wisconsin's poetess leaves her old home and friends followed by thousands of wishes for her future happiness and

prosperity.
Miss Wheeler was born in 1851, at Windsor Mass Wheeler was born in 1851, at Windsor,
Dane county, Wis., where she has since lived
with her parents. At the age of twelve years
she began writing poetry, and became one of
the most prolific versifiers in the country. She
has published three volumes of miscellaneous
poems, viz.: "Shells," "Maurine and Other poems," and "Poems of Passion." The last work
approach last year and some of the pieces, it gaged upon a volume of religious poems. Death of a Prominent Badger.

O. M. Conover, LL. D., court reporter of the Wisconsin supreme court, died very suddenly and unexpectedly in London, England, at 1 o'clock Wednesday morning, the 30th, of heart

Royal Nuntials at Darmstadt. The marriage of Princesa Victoria of Hess to Prince Louis of Battenburg took place Wednesday. The streets were profusely decorated with flags and thronged with sight-seers. After the performance of the civil marriage the bride was led to the palace chapel by her grandmother, the mother of Grand Duke Louis. They were followed by a procession composed of royal guests, Queen Victoria leading, followed by the prince and princess of Wales, the Princess Beatrice, Prince William of Prussia, and Prince Alexander of Bulgaria, brother of the bridegroom. In the procession the bride and bridegroom walked between the princesses of Battenberg. When the bride and bridgroom exchanged rings at the alter, a salute of thirty-six guns was fired. Queen Victoria stood during the choral portion of the services. At the conclusion of the ceremony she embraced the couple. The bride wore the voil of her mother, the late Princess Alice. All the guests, except Queen Victoria, to Prince Louis of Battenburg took place Wedwore the veil of her mother, the late Princess Alice. All the guests, except Queen Victoria, attended the banquet in the evening. The only toast drank was to the health of the newly-wedded pair. The couple afterward started for Jugenheim amid the plaudits of throngs of people. The streets were beautifully illuminated in the evening.

J.J. Knox's Successor. Mr. Henry W. Cannon of Stillwater, Minn., has been nominated as Mr. Knox's successor, and will be confirmed without opposition. M John Jay Knox remained at the desk of th John Jay Knox remained at the desk of the controller of the currency, which he has occupied for twelve years, and then took the train for New York to assume the presidency of the Bank of the Republic in that city. There was no formality about his leave, but he worked at the business before him until the hour came for him to take the train. He will be dined by the bankers of Boston Moulday, but does not expect to return to Washington. but does not expect to return to Washingto until the latter part of June.

or woman with a weak stomach is not in good health. Weak stomachs lead to weak nerves, or what are known as the "fidgets," debility, melancholy, and various other ills. Many peror what are known as the "fidgets," debility, melancholy, and various other ills. Many persons are not aware of it, or, if they are, say to themselves: "Oh, well, let the stomach brace up of its own accord; I guess I'll weather it." By neglecting to care for their stomachs people make a great mistake; the gastric pit is one of the most honest and faithful organs of the body and deserves the best of treatment. To you who feel in need of a good medicine for the stomach we take pleasure in recommending Burdock Blood Bitters, calculated especially as a cure for dyspepsia and indigestion, and sure also to do excellent service in correcting and toning the secretary organs—the liver and the kidneys. Did we have more space we would here insert a few of the many letters on the deak before us complimentary to Burdock Blood Bitters—letters from people cured of dyspepsia, debility, billiousness, jaundice, sick headache, and in several instances of scrofula, through the use of this preparation. Burdock Blood Bitters are very pleasant to the taste, economical, safe, and quick to benefit. W. E. Glifford, pastor M. E. church, Bothwell, Ont., a gentleman of large intelliant to the taste, economical, safe, and quick to benefit. W. E. Ghifford, pastor M. E. church, Bothwell, Ont., a gentleman of large intelligence, and whose opinion is well worthy of our consideration, says: "About two years ago I was attacked with dyspepsis in a very bad form. My system ran down, eleep forsook me, dizziness and palpitation of the heart set in, and I grew nervous, irritable and despondent, until life became a ceaseless round of horrors. Induced to try Burdock Blood Bitters, and after taking three bottles feel entirely cured—in fact, like a new man. I consider Burdock Blood Bitter the best family medicine now before the country for dyspepsis, liver complaint, etc. They cured me."

A Wretched Iowan's Deed. A special gives the details of a horrible crime near Roland Tuesday night. Edward Thomp-

near Roland Tuesday night Edward Thompson a young Norweigan, went home intoxicated and tried to shoot his wife. He was prevented by his wife's sister, who succeeded in getting the revolver. The wife got out of doors and started for a neighbors, when he pursued her with an axe. Overtaking her, he felled her to the ground and repeated the blow four times, each blow indenting and fracturing the skull. Supposing her dead he ran away. Her sister called for help and the wife was found in a comatose state. Surgeons worked for hours extracting pieces of skull and relieving the pressure from the brain. It is thought she has a slight chance of recovery. A search for Thompson showed that he had plunged head first in a deep well and thus ended his existence. He was dissipated and had made his wife's life unhappy ever since their marriage.

Messrs. Francis Newbery & Son, London, England, established for 125 years, write: As a testimonial from one of the oldest drughouses in Great Britain, respecting your household remedy, will no doubt be of interest to you, we are pleased to make the statement that we have sold St. Jacobs Oil with satisfaction to the public for several years, and that tion to the public, for several years' and that owing to the extraordinary merits of the article, the demand is continually increasing, and that we have heard of many favorable reports re-garding its great virtue as a pain-curing remedy.

A courier brings news of a daring attempt to rob the Medicine Valley bank of Medicine Lodge, thirty-five miles west of Harper, Kansas, in which the cashier was killed and the president fatally wounded. On Wednesday, the 30th, four men, amed with Winchester rifles and revolvers rode up to the bank. Two remained with the horses, while the others entered demanding money. E. W. Payne, president, and George G. expert cashier were in the bank. They refused to comply with the result above stated. The city marshal just then appeared and opened fire on the men. Outside citizens gathered rapidly, and the robbers, seeing the game was up, quickly mounted and galloped away without having secured booty. Within ten minutes thirty men were in hot pursuit, and the chances are that the robbers will be captured and summarily dealt with. No clue to their identity. A courier brings news of a daring attempt

An Invaluable Remedy.—None except those who have suffered all the horrors of Dyspepsia, can fully appreciate the value and efficacy of Perry Davis' Pain Killer, a sovereign remedy for this distressing disease in all its forms used internally and externally, test its virtue I am cured of Catarrh and deafness by Elv's Cream Balm. My Aunt was deaf in one ea After using the Balm a few times her hearin was restored. F. D. Monse, Insurance Broken Elizabeth, N. J. Not a liquid or snuff. We recommend Ely's Cream Balm where a cure for Catarrh is called for, and consider that we are doing the public a service by making its virtues known to those afflicted with this loathsome disease, for which it is in most instances a perfect cure. PECK BROS., Druggists, Grand Rapids, Mich. (Price 50 cts. See adv.)

One dozen small bottles of Swift' Specific (S. S. S.) cured me sound and well of a bac Scrofulous affection which had baffled all treatment including Hot Springs. J. H. Raiff, Denver, Col. Coughs. or her, she at once got and gave me some. The first dose eased my brain and seemed to go hunting through my system for the pain.
"The second dose eased me so much that I slept two hours, something I had not done for two months. Before I had used five bottles, I was well and at work, as hard as any man could for over three weeks; but I worked too hard fo my strength, and taking a hard cold. I was taken with the most acute and painful rheumatism all through my system that was ever known. I called the doctors again, and after several weeks they left me a cripple on crutches for life, as they said. I meta friend and told him my case and he said HopBitters had cured him and would cure me. I poohed at him, but he was so earnest I was induced to use them again. In less than four weeks I threw away my crutches and went to work lightly and kept on using the Bitters for five weeks, until I became as well as any man living, and have been so for six years since.
It also cured my wife who had been so for years; ty with from two to three bottles per year. There is no need to be sick at all if these Bitters

are used. J. J. BERK, Ex-Supervisor. "That poor invalid wife! "Or daughter "Can be made the picture of health!
