PERHAPS BLUFFING.

The Democrats in Ohio are going ahead making their nominations for congress under the apportionment of the late legislature. At one of these conventions, held at the home of Senator Brice and presumed to be inspired by him, resolutions were adopted de-nouncing the McComas bill, and making up an issue, apparently, with the Republican party in congress. The contention is over the provision requiring members of the next congress to be chosen from the same districts that the present ones were, in order to undo the work of the Democrats in Ohio and Maryland that is about as partisan as the lay-out made by the Republicans in the prior legislatures. This defiant attitude of the Ohio Democrats is likely to stimulate the Republicans in congress to push the bill through. It will make no difference practically that it is arbitrary and unprecedented, and a violation of wholesome principles All branches of the government, including the highest court, are in their hands, and they are not slow to utilize their advantages. Should congress pass the bill, the Ohio Democrats will only hurt their own heads in trying to but! their way through it. The situation then would be that in twenty of the twenty-one districts the new ones would differ from the old. The Demoerats would run candidates in the new and the Republicans in the old districts. The Democrats would be elected in their districts and the Republicans in theirs, and either all the twenty Democrats or the twenty Republicans would be seated. A Republican would make up the roll of the house, and the twenty Republicans would be put on. This would very likely control the congress and make it Republican. All the Democrats could do would be to growl and kick and go home. But it is probably a bit of bluffing on both sides.

But when a metal with the properties of aluminium is cheap enough for use, there will be achieve ments in bridges and other structures not now dreamed of.

THE HOME DEBATES. The Republicans would like to put a padlock on Mr. CLEVELAND's mouth. just to keep him from talking tariff reform; for every time he speaks on that subject he adds fresh force and vigor to terances, contained in his letter to the forcible of all. In his usually sententions way of stating unvarnished truths, Mr. CLEVELAND brings the question of tariff reform directly home to the farm-It is the plain talk of an honest man to a class who are seeking light on a matter which has a vital bearing on all their peculiar industry, and it is a letter which should be placed in the hands of every farmer in the land.

There is every indication that the great body of the people are doing more thinking for themselves on the tariff question than formerly. An evidence of this is found in the little attention that is being paid to the debate now in progress in congress. Heretofore a tariff discussion never failed to fill the galleries with eager listeners, who would hang on as long as the debate lasted. Now there is a marked difference. Newspaper correspondents writing from the national capital comment on the emptiness of the galleries, and on the listless air which prevails around the halls of congress during the present tariff debate. This is readily explained because of the fact that the masses have taken the tariff question into their nomes, where the discussion is likely to be more effective, and where more satisfactory results will be had than in the alis of congress.

It is a significant fact that the Farm-

ers' alliance turned away from the tariff

expositions now being given by the statesmen who occupy seats in congress to seek information from a private citizen who is quietly attending to his law practice in New York. The farmers say in their letter to this private citizen | than to gain one victory on the side of that they rely upon the soundness of wrong. his opinions because they have faith in his honesty and integrity of purpose, which were so heroically illustrated in the last presidential campaign, when he chose defeat rather than to surrender a principle. THE CUT RATE WAR. Of the many senseless rate wars that have sprung up between the railroads, we fail to remember one that had less justification than the one now in progress between the Northwestern roads. So far as we are able to see beneath the surface, the whole cause of the strife is that one line wishes to shorten its distance by compelling all competing lines to reduce their rate of speed. The traveling public who pay the bills seem to be left out of consideration alto-

The old-time method of adjusting inequalities of this character was for the road that had the longest distance between two points to shorten its own line and then to equip its road so as to enable it to make speed with the best of them. It seems to be a sort of a travesty on railway progress that we have reached a period of development where by inaugurating a cut rate war the long line can compel the short lines to disregard public interests by lengthening the time of travel between terminal

points. People who travel nowadays want to go fast. They want to get further and further away from the ox cart method of locomotion. Electrical development has suggested the wings of the lightning as about the proper thing for those who wish to go about from place to place; and the nearer a railroad can fix its schedule to the lightning transit idea the nearer is it keeping pace with the progress of civilization. It is true that people like to travel cheap, but they prefer speed to cheapness, particularly when the cheap rates are to be of only temporary duration, and have been established for a wrong purpose. It' is forward, not backward, we want to go in our railroad development.

Nor is this sort of discrimina tion confined to sewing machines. It applies to large classes of manufactures, particularly the machinery and implements used by the farmer. For instance, a shovel that the home dealer is charged \$9.20 per dozen for is sold to the foreign dealer for \$7.86. This system of fostering special interests comes hard on those who have to pay the bills.

BOLD BEN BUTTERWORTH. Mr. BUTTERWORTH broke loose from the party fold long enough yesterday to stamp the feathers out of the McKinley bill. The courageous Cincinnati congressman enjoys an enviable distinct tion; for, while there are doubtless many of his party associates who think just as he talked yesterday, they all seutiments that have already found a lack the moral courage to give exprespermanent lodging place in the hearts of the American people. His latest utgood thing for the Republican party if it had more BUTTERWORTHS in its Farmers' alliance, are perhaps the most | ranks; and it would be particularly fortunate for this state, just at this time, if BEN BUTTERWORTH were representing a Minnesota district. In fact, we would be willing to trade him for our whole congressional outfit. And yet we dare say that Mr. BUTTERWORTH has forgotton more on the tariff question than "DAR" HALL ever knew, notwithstanding the latter gentleman intends to vote for any sort of a tariff bill that the ways and means committee will put up.

> RANDALL'S SUCCESSOR. The Democrats in Mr. RANDALL'S old district respect his memory, but they do not carry their testimonial of respect so far as to wish to perpetuate the protection doctrines he used to preach. The nomination of ex-Mayor VAUX, to succeed Mr. RANDALL, on a free trade platform, is wonderfully in contrast with the way things used to run in Philadelphia when Mr. RANDALL was on deck. It was said that Mr. RANDALL was kept in congress by Republican votes. We will now have an opportunity to know how many Repub lican votes Mr. RANDALL was in the habit of receiving. If the Democrats in the old RANDALL district win on their new platform, it will be a marvelous evidence of the growth of tariff reform ideas. But whether they win or lose,

> CLARKSON says that he is out of pocket \$2,000 in his fifteen months, having to pay \$4,000 out of his \$5,000 salary for rent alone. Then the Republican press of the country has nearly gone to the dogs since he left it. In a few weeks he will return to recoup it. Nor has he added to his self-respect and honor. He affirms that he has put 30,000 Republicans into postoffices. Would it not be a gracious and considerate recognition of his degrading work for each of these 30,000 to contribute \$2 for a tribute to him? This would make a neat purse of \$60,000. If a reliable fiduciary agent is

wanted, there will be no churlish dis

Some of those New England colleges have had negro students for a hundred years; and with the natural aptitude of the colored man for vocal fluency, it is not surprising that some fine declaimers are developed In one instance, many years before slavery was abolished, the only black man in the class was elected president of the chief literary society in the instition. The republic of letters has been said to be the least concerned about race distinctions socially.

OKLAHOMA is one of the places where the state treasurer had the QUAY theory: but, unfortunately, did not have the full-handed friends to help him out. Consequently, he was not promoted to the charge of a political committee that had big purses. He is now doing the state service as a convict, working in a coal mine. His fellow-workers, however, have elected him their treasurer and put in his hands their savings from over-work. It is not necessary to draw the moral.

NATIONAL POLITICS.

Example From the Demo cratic Press.

If Mr. Clarkson can induce the Republican journals to advocate the Democratic doctrines he confesses are taking so strong a hold on the masses in the North, the number of their readers would largely increase. Empty promises, sustaining the moneyed monopolies, and vigorously flapping the bloody shirty twenty-five years after Appomattox, may satisfy the politicians; but the people who do not live by politics have grown tired of that kind of property and are seeking food more vender, and are seeking food more suited to their tastes and wants.

Know Their Time Has Come.

Richmond Times. Owners of the Republican party, such as the saintly Wanamaker, with his unsaintly colleagues, Quay and Dudley, are convinced that the natural time has are convinced that the natural time has arrived for that pariy to adjourn. They are positive that the fat-frying-blocks-of-five methods of two years cannot safely be repeated. And the great American people, united in the Democracy, will shout the affirmative in such thunder tones that the plotters against liberty will skulk away to their dens without daring to utter the negative.

The following Saturday, May 3, a squall capsized the vessel instantly and two of the crew below at the time were drowned. The captain and three men, the survivors, managed to get into the yawl boat and hoist a piece of sail. They ran before the wind 150 miles, and, having no food or water, their sufferings became intense. During the day they sighted a brig, but it passed them by at close range, no one seeing them. Monday evening they reached St. George's island and got water by digging in the sand. They remained until Wednesday, when the sea subsided so they could launch their boat. They reached Cape St. George lighthouse the same afternoon, where they first tasted food since the wreck. The same night they reached Apalachicola, all well. The Mary Ellen was a schooner of seventy tons, owned by Jason Gillett, of Mobile, and had a light outward cargo of lumber and general merchandise. sized the vessel instantly and two of

Grand Forks, N. D., May 13.—The city of East Grand Forks, Minn., is all broken up over the arrest of the mayor, broken up over the arrest of the mayor, Rox Brown, last night in a house of ill fame. The mayor was arrested by the city marshal, locked up and, about 1 o'clock this morning, brought before a justice. He pleaded guilty and was discharged. The mayor explains that he had called at the house in response to a request of the proprietor on business relative to fines of the inmates. The feeling is quite general that the arrest was the result of spite work of several members of the city council.
