WOMAN'S WORK.

What Our Foreign Friends Think of the Samples at the Fair.

Harper's Weekly. Some of our foreign friends are inclined to make light of the women's share in the great Chicago enterprise. They sav that much of the "work"literary, oratorical, artistic. what nothas been, not to put too fine a point upon it, and to use a phrase that the women ought to understand, taken from the oven a little too soon, and that the participants would have done better the participants would have done better to wait until they had something more worth showing. Doubtless there is ground for this kind of criticism, but the pebbles seem to us to be thrown from glass houses. The exhibits, per-sonal and other, made by the stronger sex, can hardly be said to be monotonously perfect after their kind. We have a painful consciousness that a large, a very large, proportion of the speed and writings of males on the subject of the world's fair might have been better baked. Some of it might have been reduced to ashes with advantage. And there is another side to the question. It is not to be denied that there is excellent work by women. at Chicago-artists, decorators, architects, writers, to say nothing of less pretentious exhibitors. It is our judgment that competition among the women, where a high level is attained by some, will tend strongly, directly and permanently to raise the level of the others. Warm weather of the Fourth of July series was what St. Paul denizens had yesterday, and so hot that the chronic grumbler, whose bones are his weather indicator, announced to his neighbor that we have but two seasons-winter and the Fourth of July. That the weather was unusually warm was indicated by the light attire of the women on the streets and the men carrying their coats on their arms and giving every indication of feeling uncomfortably warm. There were plenty of croakers to announce that it was the

hottest they ever saw it in this country. The day began with a warm wave that came by way of Dakota, and as early as 9 o'clock in the morning the mercury had reached the highest point of the day, with the exception of 4 o'clock in the afternoon, when it was one degree warmer. At 7 in the morning the thermometer at the observer's station registered 76 deg in the shade: at 9 o'clock it had jumped up to 93 deg; at noon it had dropped to 92 deg, and at 3 p. m. to 91 deg. At other places in the city it is claimed that the mercury stood at 94 deg in the shade at 4 o'clock p. m. The forecast last evening was to the effect that the fair weather would be followed by showers and severe thunder storms during the night or this morning, followed by warmer weather. Forecast Official P. F. Lyons gave out the follow-

Supreme Court Decision of Vital Interest to Lumbermen.

Loggers Are Entitled to Use Navigable Streams on Equal Terms.

Page Brothers Win Their Appeal Against a Lumber Company.

Important Ruling Concerning a Company's Liability for Accident.

An interesting decision, treating upon the right of lumbermen to use navigable streams, was handed down by the supreme court yesterday, and the court below was reversed. The case was that of E. T. In the court below, where the plaintiffs rested their case upon the trial, the judge dismissed the same on the ground that the testimony introduced was insufficient to sustain action. A motion for a new trial was afterwards denied, and the question involved came before the appellant court upon a bill of excep-From this bill it appears that both

From this bill it appears that both parties had been engaged in lumbering for several years on Rum river, a stream navigable for logs and timber. Both parties cut their logs on the upper waters and drive them to their respective mills, there to be manufactured into lumber. The plaintiff's mill is at Anoka, and the defendant's seventy-five miles above, or at Melaca, so that the former's logs must be driven past the former's logs must be driven past the point at which the latter takes his logs from the stream, and the only prac-tical way by which either could supply their mills with logs is by driving them down this stream.

The defendant constructed two dams

just above its mill, at a distance of about a half-mile apart, to create a pond and slack water above each. In the pond so created piers constructed, together with and boom sticks. The piling and boom sticks. The booms for sorting were so arranged that sawlogs had to pass the men doing the sorting for the defendant. The result was that all logs destined for a point further down the river were detained and delayed, greatly to the damage of the plaintiffs. The supreme court, in its finding, relates as below, and Justice Mitchell emphasizes the syllabus by concurring and elaborating, that he did concurring and elaborating, that he did so especially because it was the only highway open to the plaintiffs.

Two able-bodied and intelligent men were sent me, to whom I intrusted the dangerous task of whom I intrusted the dangerous task of crossing the river and going into the neighboring village to ascertain from stragglers the coveted information. They made the trip successfully and returned the next noon, not only with the facts, but with the traps and effects of four Union soldiers, which they had obtained in a manner creditable to the coolest and bravest men of either army. "After ferreting out the secrets of the "After ferreting out the secrets of the enemy, they started on the return trip, but were detained by a terrific rain storm of several hours' duration, which

were out early next morning investigating, and, seeking fresh tracks, suspected something wrong. Five of them started on the trail, plain in, the soft earth, and soon came upon the sleeping scouts. Feeling confident of having their prisoners secure, they thought to have some innocent fun with them, and proceeded to jab the back with the points of their bayonets and request them to come in
