A SMALL NET GAIN SCORED

TRADERS LACK CONFIDENCE

Both Bulls and Bears Afraid to Force the Situation - Effect on the Market of the Argentine, Indian and Australian Crops-The Severe Weather and Damage to Winter Wheat a Factor.

The wheat market has been a fluctuating

ported in the world's shipments as compared ported in the world's snipments as compared with the week previous. The receipts at primary points were not up to expectations, however, and this fact contributed something of strength by way of offset to news that the shipments from Argentine to Liverpool had been heavier than during the week previous. The announcement was also made that Russia and ladia ways healthing healt their steaks and and India were holding back their stocks, and that Europe was looking almost wholly to Argentine and the United States for future supplies. It has been apparent for the past two or three weeks that Russia will soon have to cease exports if the stories concern-ing famine in that empire are to be accented as reliable. The Indian surplus is not large, and has not cut much of a figure at any time. The most uncertainty has existed in connection with Argentina; and it is clear that shipments thence are being made in much larger volume than was earlier anticipated. reliable figures are yet attainable as to probable surplus, but stocks are evidently being rushed to the European markets as fast as the wheat can be threshed and vessels in which to carry it can be found. A record of 840,000 bu for the week before last was re-

corded, which closely approaches the volume of clearances from the United States. The same absence of the buving spirit no-ticeable in Monday's market reappeared Tuesday. The opening was moderately strong, but weakness predominated. On Wednesday lower cables were received at the opening, and later a moderate break in the share market of the New York stock exchange seemed to reflect its influence upon wheat tradition. trading. This developed a hesitating spirit, as though operators on both sides preferred to await developments. The prevalence of extremely cold weather not only in the Northwest, but extending with unusual vigor as far to the Southwest as Oklahoma, and to the Southeast, with damaging results, to Florida, caused a feeling of uncertainty as Florida, caused a feeling of uncertainty as to the possible effect upon winter wheat. The Cluctnati Price Current, in its weekly issue, gave some encouragement to this theory; but, after all, this is only speculative, inasmuch as the conditions cannot possibly be introduced, much less realized, until the thawing out process begins. It is at that period the damage to the plant, if any exists, makes itself apparent, and if the thaw is not broken too severely by freezing weather, the roots will be exposed to little or no danger of harm. But whatever of built nature was ots will be exposed to little or no uanger harm. But whatever of bull nature was thought to exist in connection with this scare was offset by the marked decline in the demand, which New York wired was ically at a standstill. In these circumstances the bull trading ceased; but there was no disposition manifested by the bears to take up the cudgel and attempt to hammer prices. This was one of the main arguments of the week as to the strength of the undertone. Friday showed a falling in the receipts, but this was doubtless due to the undertone. Friday showed a falling in receipts, but this was doubtless due to the continued cold weather. The market was disposed to go up on this fact; but Liverpool cables showed a decline, influenced doubtless by the increase of the Argentina shipments. figures do not vary much one way or the other from those hitherto sent forward. There were, however, stronger cables from Liverpool, and the market of the week closed

great crop of 1898, in this country, has not been marketed with much freedom. Heavy stocks must be resting somewhere in rescree, and these will probably be found in the private warehouses and smaller elevators. When once the Argentine and Indian and Australian surplus can be computed with reasonable reliability, the future price of wheat can be more easily figured upon. The strength which wheat has reflected thus far, pending the uncertainty in connection with the quantities named, affords a fair indiant of the first of the strength which wheat has reflected thus far, pending the uncertainty in connection with the quantities named, affords a fair indiant of the computed weak, and look for a fair trade the coming week, as we have a large supply on hand, consiststocks must be resting somewhere in re-serve, and these will probably be found in with the quantities named, affords a fair in-dication that in due time, say between now and the expiration of the May option, a modand the expiration of the May option, a moderate advance may be reasonably counted upon. Prices today, in view of all the facts, appear to be lower than might justly be expected. But the midwinter harvests in the countries mentioned are always a barrier to anything in the nature of a substantial and prolonged upward movement at this season of the year.

wheat appear to have tag interested the farmers of the Northwest; they are apparently as firmly set as ever upon holding for higher prices. For this reason country command. There was a notable scarcity of command. There was a notable scarcity of

market in the matter of receipts. The low temperature prevailing over the Northwest discouraged shipments; and some of those who were foolhardy enough to subject their

der such conditions paid the penalty in losses

WHEAT UP A TRIFFE degree attractive except a few lots which were promptly seized at the highest prices of the week previous. There was absolutely no sale for common stuff, and commission men were compelled to offer down far below any figure that would pay for shipment in order to get the creatures out of the pens. There are prospects of a much more lively market when the weather conditions improve. It is believed that, owing to the abundance of feed to the southward, but tributary to St. Paul, this market will be industriously explored during the coming two or three months for anything that can be fed into a condition of fair profit. The cau-tion is given that common milkers or com-mon backward springers are not in demand,

and such contributions must inevitably be disposed of as canners.

cattle lines:
Good to choice beef steers, \$4.50\(\)55; fair
to good, \$4\(\)24.50; good to choice cows and
heifers, \$3.50\(\)24; fair to good, \$3\(\)3.50; half-The wheat market has been a fluctuating one during the past week, but within only slight ranges, and the net results are in the direction of an advance as the outcome of the work of the six days ending Saturday.

The following are the closing quotations for the May option for the weeks ending Feb. 4 and Feb. 11 respectively, in the markets named:

Feb. 11. Feb. 4.

Minneapolis.

Feb. 11. Feb. 4.

Minneapolis.

This is a superficient of the market of farmers on the market; fat oxen, \$3.50.0 to choice steer calves, \$3.00.3 to choice steer calves, \$4.00.3 to choice steer

ners.

The supply of hogs was comparatively light and the demands of the packers are far from being met. There is a call for heavier representatives in this line, of which few are offering. The Chicago market has suffered somewhat in the general supply of hogs during the prolonged cold spell, and it is expected that when the weather moderates the rush there will be so considerable as to precipitate lower prices. Quotations are made at \$3.65 for light mixed to \$3.76 for fair quality.

lower prices. Quotations are made at \$5.00 for light mixed to \$3.70 for fair quality.

There is a little more activity in sheep, and prices are somewhat improved. Good muttons are quoted at \$3.75@4; lambs, \$4.50@4.75; stock ewes, \$3.3.50; stock lambs, \$3.75@4.40.

Good mutton sheep appear to advance just at this scason more quickly than lambs, and most with a reader, sale. meet with a readier sale.

CHICAGO LIVE STOCK.

The receipts at Chicago during last week were: Cattle, 38,000 against 43,824, being a decrease of 5,824. Receipts last year, corresponding week, were 50,798. These figures reveal a decrease this year, the same week, of 13,000. Receipts of hogs last week were 166,000,

against 175,337 the week previous, being a de-crease of 9,337. The same week last year the number received was 185,054, showing a decrease last week of approximately 20,00 The sheep receipts were 70,000 against 68, 592 the week previous, or an increase of 1,408. The same week last year the number was 67,992. These figures show a gain of about 2,000 last week of this year over that of 1898.

VISIBLE SUPPLY OF SHEEP.

The visible supply of sheep is quite large, and in all probability the receipts for the next few mouths will exceed those of a corresponding period last year, as they did in the month of January. Those who are feeding are losing heavily, but some are determined to hold on as long as possible, hoptermined to hold on as long as possible, hop-ing that the tide will turn in their favor. The hardening of values of good sheep under heavy receipts has given them some en-couragement, but there will have to be a big advance before there will be any entries on the credit side of the ledger for those who took long chances in buying high-priced feed-ters. There is nowly mener, traising sheep. ers. There is good money in raising sheep and selling them at present prices, but noth-ing for the men who paid \$4.25 for feeders and is selling at \$4.—Drovers' Journal.

ADVANCE IN SHEEP PRICES. Since a month ago there has been an advance of 25@35c in good sheep, while lambs have shown no improvement whatever. This is quite an unusual condition of the trade at this season of the year, when desirable lambs

this season of the year, when desirable lambs generally meet with a strong demand and sell a dollar per hundred higher than sheep. A year ago the best lâmbs were selling at \$5.65 and best sheep at \$4.65. One reason advanced for the duil, sleepy condition of the lamb trade is that receipts of this class of stock have been unusually heavy. At the present time choice heavy sheep are selling almost as high as medium lambs, but dealers do not expect this state of the market to last long.—Drovers' Journal.

GRASS ON TEXAS RANCHES.

Many of the big ranches in Texas are showing considerable improvement in the production of grass since they have ceased to be overstocked. A traveler who has recently visited many sections of the state says that there has been quite a noticeable change in the growth of grass since the supply of sheep and cattle has been redu rheat is more than ordinariThe feedlot plan of fattening cattle has also uncertain at this season of the year. The given much relief to the ranges .- Drovers'

SOUTH ST. PAUL HORSE MARKET.

as we have a large supply on hand, consisting of all kinds.

Speaking of the market with respect to its government by receipts the Northwestern Miller, in its latest issue, says:

"The advance and succeeding decline in wheat appear to have had little effect upon the formation of the Northwest; they are appeared to the Northwest they are appeared command. There was a notable scarcity of good stress making the season, but all our reports are to the effect that where good horses were kept they had about all the business to do that they should have had. While the number of stallions kept for service last year was small those that did make the breeding season got their full quota of mares and in some instances rather more than is usually regarded as advisable.—Iowa Homestead.

FACTS FOR HORSE BREEDERS.

tock to the cruelty of transportation un-er such conditions paid the penalty in losses f animals en route.

The receipts at South St. Paul during the week ending Feb. 11 were: Cattle, 1,655;

of animals en route.

The receibts at South St. Paul during the week ending Feb. It were: Cattle, 1,685, calves, 647; hogs, 6,499; sheep, 12,975. The previous week the receipts were: Cattle, 2,663; calves, 685; hogs, 6,492; sheep, 1,785. The previous week the receipts were: Cattle, 2,663; calves, 685; hogs, 1,513; sheep, 1,785. These figures show a decrease in attle of 575; calves, 115; hogs, 1,013; sheep, 4,707.

The killings by Swift & Co. last week were: Cattle, 195; calves, 13; sheep, 1,743; hogs, 6,458. The killings the week previous were: Cattle, 204; calves, 13; sheep, 1,543; hogs, 6,500. These figures show a decrease in cattle of 9; calves, 13; hogs, 412, and an increase in sheep of 1,655.

There was very little in the shape of really good butcher cattle offering—not nearly enough to meet the demand. In fact, one commission man freely says that this market could readily take care of four times the numbers which are moved in this direction. General prices for the quality offering were somewhat lower than during the previous week, but this was due wholly to the thinness and degenerate condition of the stock.

There was only a light demand for stockers and feeders owing to the severely low temperature and the absence of purchasers, but there was nothing on the other hand coming forward that was in the slightest brown of the stock.

There was only a light demand for stockers and feeders owing to the severely low temperature and the absence of purchasers, but there was nothing on the other hand coming forward that was in the slightest favor dountries is none too large, while the supply of horses for commercial purposes is allowed the former and the commercial offer a big opportunity to American of the continent is to make the filter of well-bring has been paralying, as the builty of the exported animals has gone to the markets of the "tight little is not have a continued bringly that, every since. them.

The incident in the career of Billy the Kid which I am about to relate was given to me by Mr. W. H. Sammons, of this city. Mr. Sammons' part in the affair will appear in the narrative. He said:

A STORY THAT THRILLS.

"In the spring of 1881 the commander of the government post at Fort Craig, "There is a lucky corner in the Lenox Athletic club," said Harry Harris. "It is in the southwest corner, and there is always a cummings, near Cook's Peak, that a the southwest corner, and there is always a scramble to get it. I fought several fights in it and always won. Jimmy De Forest, my manager; used to run down a half hour before and hold it down. Sharkey always took it, and so did George Dixon. When Dixon fought Gardiner he tried to get it first, but Gardiner got it and took it. O'Rouzke asks him if he won't toos for it, and Dixon wins the toss. Corbett had it, too, and tossed and lost when he fought Sharkey, and the sallor won again when he went against McCoy. They've got a big room there which the losers always occupy, It's one of the best rooms there, too. I took a little dirty room instead of going into it once."—Exchange.

Cummings, near Cook's Peak, that a gang of White Mountain Apaches were off of the reservation, and that they were plundering and killing the settlers by way of diversion; that they were supposed to have crossed the Rio Grande and to be making their way towards the Organ or San Andree mountains in New Mexico. A call for troops was made to go out and intercept them. Dispatches were to be carried to Fort Stanton, near the Peccs river, to this effect. Capt, Jack Crawford, the 'poet scout,' was then in the minimum properties of the reservation, and that they were plundering and killing the settlers by way of diversion; that they were supposed to have crossed the Rio Grande and to be making their way towards the Organ or San Andree mountains in New Mexico. A call for troops was made to go out and intercept them. Dispatches were to be carried to Fort Stanton, near the Peccs river, to this effect. Capt, Jack Crawford the post as dispatch cargang of White Mountain Apaches were off of the reservation, and that they were plundering and killing the settlers by way of diversion; that they were supposed to have crossed the Rio Grande and to be making their way towards the Organ or San Andree mountains in New Mexico. A call for troops was made to go out and intercept them. Dispatches were to be carried to Fort Stanton, near the Pecos river, to this effect. Capt. Jack Crawford, the 'poet scout,' was then in the employ of the post as dispatch carrier. He was notified to leave at daybreak with the word that would alarm and warn the settlers in the Pecos valley and enable the officers at Fort Stanton to put cavalry in the field and drive the Indians back to the reservation west of the Rio Grande, beyond the Black Range mountains. I was stopping at the post for a few days on a visit to Capt. Jack, having been an old friend and acquaintance of his years before in the Black Hills. I volunteered to accompany him upon his hard and perilous mission. We left Fort Craig shortly after daybreak, carrying our saddles and blankets across the Rio Grande in a boat and swimming our animals, which consisted of two saddle horses and a government pack mule, a very nimble-footed animal that was Across the street there was a fine horse place Range mountains. 6. SIE trail running from Fort Stanton to Silver City, our course to the Spring having been about due east. After loosening our cinches and watering and foddering our horses we partook of our scanty dinner of hardtack and canned horse and lay down to rest. We had finished our siesta and had started to get ready to renew our journey when I cast my eyes to the southeast and beheld what we supposed to be a band of Indians about a mile away, coming towards us. 'Los Indos' was my only remark, as by a wave of the hand I called the attention of Capt. Jack to them. There was mighty quick work tightening our cinches and a hurried departure from the spot. The Indians apparently did not see us until we were in the saddle, they then being about a half mile away, coming along on our trail. We put spurs to the horses and started for the pass, 'touching the ground only in high places,' as Capt. Jack afterwards expressed it. A series of loud demoniacal yells told us that we were discovered, and a few stray shots were heard as we rode rapidly away. The trail we were on was well worn and fairly good, so we soon proved that 'distance lends enchantment to the view.' After two hours' hard riding we passed the crest of the range and beheld the valley of the Pecos in the distance. We saw nothing more of our pursuers. At the foot of the range we encountered the famous salt beds which extend several miles to the east and are about thirty miles leng.

THE BORDER.

A TALE OF

"BILLY THE KID." "All the time this conversation was going on I had said nothing, but from the moment he had signaled me to take the same side of the trail as Capt. Jack I was aware that he was B.lly the Jack I was aware that he was B.lly the Kid, for I had seen him two years before at Las Vegas accompanied by Dave Rudabaugh and others of his famous band. I also assured him of my friendship. After requesting us to keep quiet about meeting him and to say nothing about his destination, we separated, little dreaming of the bloody tale regarding him which we were soon to hear.

tale regarding him which we were soon to hear.

"About 6 o'clock we emerged from the salt beds, where we met a negro on horseback whom I recognized as one of Billy the Kid's band, having met him before at Rincon, where he was cook for John Kinney, the famous 'cattle rustler.' 'Say, boss,' he said as he approached, 'have you seen a yourg feller with a black hoss?' 'No,' replied Capt. Jack. 'Mighty strange,' said the negro, 'here's his tracks in the trail.' In the meantime I was nodding my head in the affirmative to the netrail.' In the meantime I was nodding my head in the affirmative to the negro, but without Capt. Jack's knowledge. 'Sure you ain't seen him?' asked the negro. 'We have not,' was the reply of Capt. Jack. I again nodded my head in the affirmative, and a broad grin passed over the negro's face. Just then Capt. Jack turned and caught me nodding and giving the lie to his assertions. He was angry in a moment and started to express himself when I said, 'This man's name is Wash. He is a friend of Billy's, who would be very glad to have him with him.' This gave the negro the desired information

is a friend of Billy's, who would be to great the negro the desired information and he then told us of the Kid's escape and how it was effected.

"The Kid was in the Lincoln county jail under a sentence of death for murder. He was in charge of a sheriff by the name of Pat Garrett. Two guards, Ollinger and Bell, by name, were placed in immediate charge of the Kid during the day time. Other men were on duty at night. They were enemies of the Kid and took great delight in taunting him with his approaching fate. All their victim would say was, I may outlive you ducks yet,' and he did sure enough. That morning Ollinger went across the street to get the Kid his breakfast, Bell being left to guard the jail. The Kid asked Bell to get a rag and wrap it around one of his shackles, as it was chafing his leg. Bell procured the desired article, and, stooping down, was in the act of placing it around the shackle when the Kid reached over, took Bell's gun out of his hip pocket and in an instant shot him fatally, although he lived some hours and was able to relate how the affair occurred. The Kid then took the shackle key out of Bell's pocket and in an instant was free. Ollinger heard the shot and came running across the street. The Kid, however, met him at the door with a Winchester in his hands. With an oath he said, 'Ollinger, you must go to meet your pard,' and at that shot him dead. Across the street there was a fine horse tied to a post, all saddled and ready. pard, and at that shot him dead. Across the street there was a fine horse tied to a post, all saddled and ready. It belonged to one of the county officers who said he was going into the country to see his girl, but many believed that he was a friend of the Kid and had placed the horse there for his use. Be that as it may the Kid.

ANGLO-FRENCH ENTENTE. The Two Countries Are About to

Adjust Their Troubles.

PARIS. Feb. 13 .- This morning's papers assert that the negotiations which have been in progress between the French and British governments garding the Bahr-el-Ghazal basin, west of the White Nile, are on the eve of satisfactory settlement. Great Britain has admitted the legality of the French claim to a commercial outlet on the Nile, and negotiations are now proceeding for the delimination of

ONE NIGHT TREATMENT FOR SORE HANDS

Bathe and soak the hands, on retiring, in a strong, hot, creamy lather of CUTICURA SOAP. Dry, and anoint freely with CUTICURA Ointment, the great skin cure and purest of emollients. Wear, during the night, old, loose, kid gloves, with the finger ends cut off and holes cut in the palms. For red, rough, chapped, and discolored hands, dry, fissured, itching, feverish palms, shapeless nails with painful finger ends, this one night treatment is simply wenderful.

FOR BABY'S SKIN Scalp, and hair, no other soap is so cleansing, purifying, and beautifying as CUTICURA SOAP, the most effective of skin and complexion soaps, as well as purest and sweetest for toilet, bath, and nursery. For infantile rashes, chaings, inflammations, and eruptions, for crusted, tiching irritations of the scalp, with dry, thin, and falling hair, for red, rough hands with shapeless nails, and simple blemishes of infancy, when assisted by gentle anointings with CUTICURA Ointment, it is absolutely without a rival. Sold throughout the world. Price, CUTICURA SOAP, 25c.; CUTICURA, 50c. POTTER D. AND C. CORP., Sole Props., Boston, U. S. A. British depot: F. NEWBERY & SONS, London. How to Have Beautiful Hands, free.

X Will Fire 600 Shots a Minute.

Terrible Execution of the "Baby" Maxim Gun Lately Invented.

Six hundred rounds fired from a ! 'baby" Maxim gun in one minute is a terrific number of bullets to be turned loose against a public enemy. Yet this is what Hiram S. Maxim, the inventor, recently did at the conclusion of a lec ture on rapid-fire ordnance before the engineer society of Columbia univer-sity. Mr. Maxim used lantern slides to illustrate the evolution of the automatic gun and explained the differences of the various inventions. He wound up by firing 600 shots a minute from a lit-tle weapon of his manufacture, the en-tire weight of which was twenty-five

pounds The inventor said that the construc tion of metallic cartridges first rendered the use of breech-loading weapons possible. Peter Cooper was the pioneer building such a weapon as early as 1840. The gun was not put in use, however, the first machine gun to be used being the Gatling. Then the mitrailleuse, the Gardner, Lowell, Pratt, Whitney and Nordenfeldt followed in the order named. But included in

aside \$18,000 more to test the machine. It was taken to Sandy Hook and the whole outfit blew to atoms at the first fire. Thus some \$73,600 of Uncle Sam's cash was lost in a second.

The test was not satisfactory, of course, and another will be made. A new gun, which will possibly be devoid of the defects of the first one, will be constructed, and the same interest.

void of the defects of the first one, will be constructed, and the same interesting process, hopefully, as the Germans say, without explosive incident, will be carried out. Of course it will cost money again, but guns of this kind must be had and the government must pay for them. Civilizers come high in this end of the century, but the public situation makes them imperatively necessary.

From the Pittsburg News.

A Tring campaign story that they are telling is about a man who is also a candidate for, a ward office, in whose interests a ward office, in whose interests at ward office, in whose interest a twasfegether. It is said of them that they know the value of a dclar. The father is worth at least \$500,000. The politician approached a voter he was always sure of.

"Dick," he said to him, "I want you to line up the fellows in the Third for Blank for school director."

"Wouldn't vote for him if he was the on'y man on the ticket," replied Dick.

"He's the meanerst man in the ward." Dick answered. Then to did why.

The candidate and office, in whose interest a work he value of a dclar. The father is worth at least \$500,000. The politician approached a voter he was always sure of.

"Wouldn't vote for him if he was the on'y man on the ticket," replied Dick.

"He's the meanerst man in the ward." Dick answered. Then to did the the form the fields of the son then goes to attend to affairs in another part of the city. When the father comes each day he gets a transfer from the street car conductor and hurries to the office of the son with it. The son rushes out and oatches the first car and gives the conductor

coppers at the end of the day's business rather unlikely, but the doctrine of averages operates to even things up to within a few cents. In the long run about as many checks break on one half of the nickel as on the other.

MEDICAL STORY.

Singular Revival of a Man Who Was Apparently Dead.

From the Kansas City Star.

It has been remarked by people voo have noted the wonderful advance made in surgery noted the wonderful advance made in surgery within the last ten years that the science of medicine has not improved with equal rapidity. The average medical man cannot effect much where disease has once appeared. He may keep it in check to a certain extent, he may prevent the patient from being hadly nursed, but at most he can but assist nature to the best of his power. Be opinion what it will, and the sense of confidence has much to do, with the matter, the return will be to do.

it will, and the sense of confidence has much to do with the matter, the story told in "Memorles of the Late Henry Reeve, C. B., D. C. L.," is worth repeating.

Sir Matthew Tierney was summoned to the Duke of Newcastle, who was dangerously ill with typhus fever. It was about the year 1823, and although he traveled as fast as post horses permitted, Tierney was informed on arriving that the duke had been dead for two hours. At the first glance at the body, which was already laid out, he thought life was extinct. At the second he foubted, and at to swallow. He recovered, and lived twenty-five years afterward. The story reads like fiction, but dootors who are not afraid to try experiments in desperate cases frequently effect what may be termed miracles.

Visit the Southern Railway exhibit at 254 Jackson street, St. Paul. The Jiaplay includes grains, cotton, fruits, mincrals and marbles, and will give the visitor a general idea of the opportunities offered along the line of the Southern Railway.
