CHICAGO. April 29.—Realizing caused a severe break in wheat today and May closed 14,00% lower. July corn closed 3c down, May unchanged. Oats closed 3c down, May unchanged to 7½00c depressed.

While world's statistics were bullish, wheat traders were more impressed by Liverpool's failure to follow the aggressive advance here Saturday and heavy lines of long stuff were offered. May at the opening being quoted %0%c to 3c 1/20 lower, at 75% to 74c. Outside buying orders cared for the offerings early, but the marke showed no railying power. This demand soon died cut and longs, discouraged further by the fall of rain in California, the lack of export inquiry, the liberality and receipts and the fact that bug reports failed to show any spread of the pest, continued to liquidate the remainder of the session. May was gradually forced off to 72%c and the close was weak, 1% 0%c lower, at 72½072%c. The visible decreased 1,516,000 bu. World's shipments were 7,734,000 bu, while the quantity of wheat and flour on ocean passage showed a decrease of 3,392,000 bu. Primery receipts were 595,000 bu, compared with 513,000 bu. Local receipts were 75 cars one of contract grade. Minneapolis and ances in wheat and flour were equal to 797,000 bu. Local receipts were 75 cars, one of contract grade. Minneapolis and Duluth reported 282 cars, against 324 last week, and 551 a year ago.

May corn was saved from the weakness which affected July by suport from Phillips, which the market needed. July was hit by the wheat slump by freer country offerings, liberal receipts, easy cables and a vast improvement in the weather which is now regarded as highly favorable for germination. July sold between 45%c and 45%c and closed %c down, at 45%c. May ranged between 48%c. Receipts were 175 cars, nine of contract

Oats were active, and despite a moder-

Oats were active, and despite a moderate price recession, seemed firm at the bottom. The cash inquiry remained in its previous satisfactory condition. The wheat weakness, however, was too pronounced to be ignored, and the market eased off in the end. May sold between 27%c and 25%c, and closed 40%c lower, at 26%c. July ranged between 26%c and 25%c, and closed 4c down at 260. Receipts were 278 cars.

Provisions were dull and easier, because of heavy hog receipts and a slump in hog prices, but prices suffered but little, as there was scarcely any selling pressure. The range was narrow. July

MINNEAPOLIS.

MINNEAPOLIS. April 29.—Wheat had a sharp break to start the week. Saturday's gain of 1½c was wiped out. May sold down to 72c and July struck 7½c. At the opening the market was off ½c with the first trades in May at 7½c. This was in line with Liverpool. That market carried its bull turn to another advance, opening ¾d higher, but reaction came and Liverpool had a decided slump, losing the last advance and closing ¼d under Saturday. Corn was weaker. In our market the trade seemed hesitating at first, and in doubt as to whether to follow the opening trend or not. The market held steady for a short time at the lower opening, but on later realizing made a quick break. Some attempt was made to rally and the price was worked back ½c, but would not hold, and on the second giving way some step-loss orders came out.

Aside from the weakening in the foreign town the lower opening in the foreign town the lower the weakening in the MINNEAPOLIS, April 29.-Wheat had

Aside from the weakening in the fortight tone the lengs had to contend with
hoproved conditions in this country, as
shown by the reports received from various quarters. California has been complaining of impending drought but the
situation there was relieved somewhat
by rains. Good weather is general.
Nothing of especial interest came from

to some who, watching the increasing growth of the insect pest as represented in the dispatches received near the close on Saturday, looked for a flood of damage reports this morning.

Chicago had an active trade and a good many heavy lots of long wheat were sold out. After the second break the market met with strong support. Armour was said to have bought 1,000,000 bushels

estimated that the continent It is estimated that the continent bought last week close to 5,000,000 bushels of wheat and that Hamburg took a major portion of it. Wheat on passage decreased 3,392,000 bushels. Liverpool stocks now stand at 3,245,000 bushels. For the week America shipped 4,282,000 bushels, Russia 1,224,000 bushels, and Argentine 1,352,000 bushels. Total world's shipments were 7,794,000 bushels, against 8,286,000 bushels last year and 6,596,000 bushels a year ago. Odessa cabled that prespects are favorable in Russia. The visible supply decreased by 1,516,000 bushels, making the total now 48,352,600 bushels.

Primary receipts were 625,000 bu, against 513,000 bu last year. Kansas City surprised the trade with receipts of 232 cars again \$5 last year. Clearances, wheat and flour, 797,000 bu. Minneapolis received 269 cars and Duluth 13, against 386 and 165 last

Stage. Prev. Day. 601/2 4-41/2 NEW YORK. April 29.—14 there were any doubts entertained that the speculative advance might be interrupted after the holiday intervals, they were dispelled within five minutes after the trading opened in the new temporary quarters of the stock exchange. The first transactions demonstrated the leading position of the United States Steel stocks, Union Pacific and Northern Pacific in the speculative situation, and that leadership was unaffected during the whole of the day. There was great activity and some striking strength shown by a number of other stocks, but they paled into insignificance in comparison with the furious activity and extraordinary price changes in the leaders. Often during the day there were strips of several feet of tleker tape which recorded successive transactions in one or the other of these stocks, with not a single block of less than 1,000 shares in the series, and running up to 8,000 shares. The extreme advance in Union Pacific extended to 12½ in the later afternoon and in Northern Pacific to 10%. United States Steel in the later afternoon and in Northern Pacific to 10%. United States Steel stocks did not show such wide fluctuations as is natural from the much greater volume of the company's total capitalization. Nevertheless the common stock

in compensation for the Burlington deal. This belief gives rise to almost infinitely varied rumors, almost all of which are received with a certain amount of credulity. The action of the whole market shows clearly that the demand from stocks from all classes of buyers retains its veracious force and needs only the leadership of an upward movement in price to bring in such buying from all quarters as eclipses all previous experience in the history of speculative markets in New York. The final volatile outburst in Union Pacific and Northern Pacific today scemed to arouse missivings, and there was free profit-taking through the rest of the list. But this is exactly the story of last week's similar thovement in Union Pacific, which caused widespread apprehension lest the culmination of the boom had arrived, and which was, nevertheless, followed by a renewal in full force of the speculative advance.

Dealings in Union Pacific convertible bonds were in enormous volume, and the price shot up 7% points in response to the advance in the common stock. Dealings therewise were large, and price changes irregular. Total sales, par value, \$6,000,000. United States 5s advanced 14, and the 4s, coupon, and refunding 2s ½ per cent on the last call.

The imports of corn from Atlantic ports last week were 41,300 quarters.

VISIBLE SUPPLY—New York, April 29.—The statement of the visible supply stocks did not show such wide fluctuations as is natural from the much greater volume of the company's total capitalization. Nevertheless the common stock achieved an extreme advance of 3%, and the preferred of 2%, and held more firmly than almost any other stock in the list. There were some very striking ga ns among the grangers, Pacifics and trunk lines, but these seemed to be asociated in the minds of the buyers with the movement in Union Pacific. Rock Island was at one time 6% over Friday, St. Paul 4%, New York Central 5, Pennsylvania 3%, Illinois Cent. 3½, St. L. & S. F. second preferred 3%, and a number of other related stocks from 2 to 3 points. Colorado Fuel rose 8 points, and Amalgamated Copper 3½. If these stocks are set apart it will be found that the dealings elsewhere and the movement of prices otherwise were not sensational. But in contemplating these special price movements and the volume of dealings in the stock enumerated, one has compassed the salient facts of the extraordinary market of the day. There was no specific news to account for the unifercedented dealings, which lifted the days record to 2,760,000 shares. As the vital point of the speculation is the meney supply, the increase in surplus reserves shown by Saturday's bank statement was a favorable factor. The gain in cash was noted with special satisfaction as reflecting the continued inflow of funds to New York. Much store is placed also in the government international disbursements to be made on May 1, and large corporation dividend payments are also counted upon for to help the money situation. The reliance placed on these factors was made evident by the small monetary effect of the engagement of \$1,750,000 in gold for export, and the opinion of exchange experts that probably \$5,000,000 might go out during the week. There was some doubt as to the destination of the continental money market and the relative stiffness of the London money market, is beginning to arouse surmise in financial circles, whether preparations are not making b

Pacific ports, and 68,000 from other ports. The imports of corn from Atlantic ports last week were 41,300 quarters.

The market for coffee futures opened steady, with prices 20 to 25 points higher on a scare of room shorts, an influx of investment orders, buying for foreign account and scarcity of sellers. This sudden demand was created by a sharp rise in European markets, where, it was said, a well known "American clique" were buying in Belfast, where a large short interest had accumulated on the protracted decline. Smaller receipts were enticipated and an active demand for spot coffee helped to stimulate the spot market. In the afternoon profit-taking set in and led to a sharp reaction. The market was finally easy, with prices net 10 to 20 points higher. Total sales were 21.150 bags, including: May at 5.3@5.45c; July at 5.60@5.65c; August at 5.70c; September at 5.10@5.80c; October, 5.75@5.80c; November, 5.90c; December, 5.95@5c; March at 6.11@6.20c.

NEW YORK STOCK GOSSIP—Strong, Sturgis & Co. whre H. Holbert & Son:
"We find it difficult to accept the situation as being a healthy and judicious one, and are therefore inclined to urge our clients in many cases to aclept handsome profits when they are willing to do so. We admit that although we have been offering these views for some time past many of our friends prefer to hold their stocks rather than to accept the ruling quotations. Of course such action on their part has been fortunate and their ventures have proved successful, but we feel it still our duty to throw out the word of caution whether it is inforsed by their action or otherwise. Shipments of gold to Europe are imminent and to a very considerable extent will no doubt take place. The country naturally can stand a heavy drain of coin if necessary, and there is no reason to be alarmed from this source. Call money and time money is no reason to be alarmed from this source. Call money and time money are both more plentiful today, showing that Western resources are alding New York financially. It may be said, indeed, that the west is largely financing New York speculation, while New York, in its turn, is lending enormously in the European market."

FOREIGN FINANCIAL—New York, April 29.—The Commercial Advertiser's London financial cablegram says: The stock market was active here today. New consols were bought freely. The American department was the merriest, of course, London enjoyed the start on the good bank statement, and bought steadily until New York opened, First New York prices showed that Wall street was having a bulge, and London

New York prices showed that Wall street was having a bulge, and London took it up, following the lead. Northern Pacific, Union Pacifics and the Readings were especially strong. The March statement of these roads sent them kiting. The Erie and Missouri Pacifics alone were lagging. The greatest activity was in the steel stocks, of which 100,000 shares of common and 100,000 of the preferred were deaft in on account of London, New York and the continent. London and Paris are beginning to fight shy of Tintos. Thirty-nine thousand pounds of gold is coming in from Australia, £50,000 is going out to the continent. The money

gold is coming in from Australia, £50,000 is going out to the continent. The money market was firm. The time rate was 3%, discounts 3½. The market has repaid the bank about £4,000,000, but there is very little expectation of an early reduction of the bank rate, this in view of the Paris exchange and the fear of diverting gold common from New York and elsewhere. Exchange on Paris, 25.16; Berlin, 20.43½.

Butcher cattle offerings were fairly liberal for Monday, with a good demand and prices steady. The choice stock and feeding cattle of all kinds found a ready sale at fully steady prices, but there was a slump of about 10c in fair to good quality stuff. Buying, however, was fairly liberal at the decline. Common stuff was practically unsalable. Representative sales:
