a determining factor in sustaining prices and in tarsing them upward after the dip occasioned by the weak bank return. Authoritative announcement regarding the developments in St. Paul continue lacking, but the belief holds in Wall street that a controlling interest in that stock has been made available for the purposes of adjustment of the North-Western railroad dispute, which is being worked out. It is a matter of notorlety that when efforts were made to secure St. Paul previous to the Burlington deal the figure demanded for the stock by controlling interests was 200. Intimations have been given that minority stockholders will be given equal benefit in any terms of sale of the controlling interests. Assumptions from these promises were the occasion of today's dealings in the stocks, in which conspicuous speculative leaders, however, bore a large part, as they did in other large buying in the market. St. Paul crossed 181 in the late dealings, compared with 174½ last night. Colorado Fuel added 6 points to its sensational advance. A jump of 14 points in Pere Marquette and of 6 in Kanawha & Michigan attracted attention, the latter being connected with reports of a consolidation by J. P. Morgan of Ohio soft
