MARKET TAKES ON

Fair Weather and Favorable Crop Reports Cause a Decline in Wheat

The following grain and stock letters were wired yesterday to St. Paul brokers by their New York and Chicago corre-M. Doran & Co.'s Chicago grain letter

says:
Wheat—Better weather and crop advices, coupled with the local character of trade, gave the market a bearish turn.
The Northwest was a fair seller on better when wheat prespects and local bulls ter spring wheat prospects and local bulls were worried at rapidly advancing harvest time, which gives promise of fair July receipts. We are conservatively bearish. Liverpool closed unchanged to

Corn—The market was weak in tone, but prices closed a trifle higher on a late spurt. Trade was purely local and such support as was given came from floor professionals. Bulls found little encouragement in the day's news. The weather is improving. The country movement is liberal. Receipts here continue large. The sample market was steady for good grades, but Ic a bu lower for the poor ones. The shipping demand is slow and practically nothing has been taken from store during the past few days.

Oats—The strength in the cash situation gave a firm tone to the market. Trade was small, but values were well maintained. The Price Current says the

report gives condition as \$0 on increased acreage. The shipping demand is good and the sample market firm. Receipts were light. If any such crop as is now indicated is harvested the present September price will look high. Estimated cars, 33.

O'Connor & Van Bergen's stock letter says:

There has been no development of interest that would account for the rather abrupt cessation of the buying power which appeared Wednesday. Traders, although inclined to be bullish on prospects of a favorable crop report, having learned caution, turned sellers rather than take a chance in present listless condition of trading. Stocks have been shaded but slightly in spite of this profitaking. Loudon has shown more speculative interest in our affairs than for some time, buying some 15,000 shares, mostly Union Pacific and Atchison. The principal influences contributing to advance in Reading are first the class of buying around 45, which was reported particularly good, and the fact that people close to official quarters are manifesting much interest in the stock Estimates from well informed sources continue very confident as to this quarter's earnings being over \$18,000,000, and there will be no change in the fact that people close to official quarters are manifesting much interest in the stock Estimates from well informed sources continue very confident as to this quarter's earnings being over \$18,000,000, and there will be no change in the first preferred dividend. Announcement of earnings will not be made this year until the latter part of July. We are inclined to believe the market hesitation is due in a great measure to inclination to wait official figures from the government as to general agricultural conditions.

J. C. Geraghty & Co.'s correspondent is proved to the sast few modest improvement of the sast few modest improvement of the sast few

J. C. Geraghty & Co.'s correspondents say of stocks:

Logan & Bryan—The market holds its modest improvement of the bast few days. It is, of course, not active and activity at this time can hardly be expected. There is, however, no selling pressure from any quarter. Bearish enthusiasm has evaporated and holders of stocks seem contented with their holdings. We think the market may be bought with safety. Great immediate returns can hardly be expected, but a little patience will be rewarded.

Dick Bros.—The market has been quite dull. The trading dropped back to very small proportions. The list was firm, but only firm. The fluctuations being narrow, as a rule, the leading shares showed no gains. Expectations of a good crop report and a good bank statement on Saturdey had influence, but did not induce buying.

Walker Bros.—The market was very quiet and uneventful. After a steady

UPWARD MOVEMENT FINDS NO EN-COURAGEMENT

Halt in the Advancing Tendency of Prices Throws the Market Back Into a Condition of Apathy-Influence of Crop Improvement Grows

NEW YORK, June 9 .- The light specuation for an advance in prices which was in evidence yesterday was somewhat discouraged today and gave little show of enthusiasm. The poor market afforded for taking profits yesterday afternoon served to discredit the upward movement.

London gave some upward impulse to prices early in the day and took stocks here until they reached the London parity, when the foreigners turned sellers again. London was said to be somewhat disap-

Iron Attracts Attention

There was further discussion of the statistics of production and consumption of iron which made their appearance yesterday just before the close of the stock market. The shrinkage in consumption of iron is so generally accepted as highly significant of business conditions in general that the discussion was bound to have some influence on speculative sentiment. The New York Central's statement of May gross earnings, showing a

of well secured bonds, but wleakness among speculative issues made the price movement irregular. Total sales par value \$1.080,000. United States 2s declined 1/4 per cent on call.

here until they reached the London parity, when the foreigners turned sellers again. London was said to be somewhat disappointed over the failure to reduce the discount rate of the Bank of England. But the statement of the bank left no room for anxiety over the financial situation in London, the \$2,600,000 bullion increase being accompanied by a loan contraction of over \$14,000 bringing the proportion of reserve to liability to over 50 per cent. At the same time the Bank of France showed a further rise in its gold holdings of over \$7,500,000 with a reduction of over \$23,000,000 in its bills discounted.

It was not surprising, therefore, that a violent advance in the sterling rate at Paris should reflect the turn in the current of the stream of capital again. The sterling rate eased here, although an additional consignment of \$2,697,000 in Japanese gold arriving at San Francisco was made available to New York bank reserves by telegraph. The result is something like a redundancy of capital at the great financial centers of the world with a corresponding apathy of speculative and even of investment demand which seems to point to a world wide cause. Here in New York the halt in the advancing tendency of prices threw the market back into an apathetic condition.

There was further discussion of the New York Bonds

New York Mining Stocks

terday just before the close of the stock market. The shrinkage in consumption of iron is so generally accepted as highly significant of business conditions in general that the discussion was bound to have some influence on speculative sentiment. The New York Central's statement of May gross earnings, showing a falling off of \$342,500, or more than 5 percent from the previous year, was a reminder of an unpleasant fact in the situation.

An opinion is held that the May statement of net earnings may show the benefit of measures of retrenchment not yet reflected in any statements published. The coalers are especially pointed to as beneficiaries from this development. Grain crop estimates by some of the unofficial authorities aroused some apprehensions that the government report, due tomorrow afternoon, might not prove as favorable as has been hoped. The influence of the crop prospects on speculative markets gains in force as the crops mature. The question of labor troubles was kept in evidence by the maintenance of the ves-

the St. Paul Commission Men
ST. PAUL, June 9.—Trade in the
open market at today's meeting of the
Produce Exchange established the following prices:

AREA OF HARVESTING OPERATIONS IS EXTENDED

Firm Opening-Bearish Reports Come From the Spring Wheat Territory

CHICAGO, June 9.-Spreading of harchicago, June 9.—Spreading of harvesting operations had a weakening influence on the wheat market today. In July wheat there was a net loss of 4.0%c. Corn is off %c. Oats are down a shade. Provisions are 2%c lower to 10c higher.

For the first half hour the wheat market showed considerable firmness, due to wet weather in sections of the Southwest, where harvesting is in progress. Firmness of foreign markets, especially at Paris, helped to create bullish sentiment at the start. Opening sales were at an advance of a shade to %c at 87c to 87.087%c. The price soon rose to 87%c. Part of the early demand was due to a rumor that the Mexican import duty on wheat was to be suspended. Later there were dispatches from Tennessee stating that cutting of wheat had commenced and would be general the beginning of the coming week. It was intimated that the crop would be the largest in years. With the area of harvesting operations extending daily wheat traders began to realize that new wheat would soon be coming on the market. With this in view many traders were disposed to take the selling side. Numerous favorable reports as to crop prospects in general brought out selling orders from some of the large holders. The Kansas state report was quite bearish, showing the condition of wheat June 1 to be 87 against 82 last month. Advices from the spring wheat territory told of continued improvement in crop conditions. Predictions were reliterated that the government report, to be issued tomorrow, would be exceedingly bearish regarding spring wheat. In the face of these influences buying lacked vim and prices steadily declined. A rally occurred just before the close on covering by shorts, but the market still retained an easy tone. After selling off to 86%c, July closed at 86%c.

Clearances of wheat and flour were equal to 32,300 bu. Primary receipts were 234,000 bu, compared with 254,000 bu a year ago. Minneapoljs, Duluth and Chicago reported receipts of 145 cars, against 143 cars last week and 205 cars a year ago. vesting operations had a weakening in ence on the wheat market today.

Corn Turns Heavy

Wet weather had a bullish effect on the corn market early in the day and a moderate advance over yesterday's closing quotations were realized. Heaviness of wheat and predictions of improved weather, however, brought out numerous selling orders, resulting in a decline. A feature of trading was selling by outsiders, who were doubtless in fluenced by favorable crop prospects. Late in the day nearly all the loss was regained on covering by shorts. July opened 4% to 1% 4% to 1% 4% to 1% 4% 4% 49c. Local receipts were 382 cars, with 19 cars of contract grade.

Oats were extremely dull and held within a narrow range. Weakness of wheat caused some selling, but scarcity of offerings and a good cash demand had a steadying effect. After opening unchanged to a shade higher at 39% to 39% c and 39% c. July sold between 39% c and 39% c. July sold between 39% c as short a big line of ribs tended to strengthen that a prominent packer was short a big line of ribs tended to strengthen that a prominent packer was short a big line of ribs tended to strengthen that a prominent packer was short a big line of ribs tended to strengthen that a prominent packer was short a big line of ribs tended to strengthen that a gain of 10c at \$12.20. New York, September . 84% . 94% . Minneapolis—Wheat trading began with the bulls armed with a new argument which they used for what it was worther the report that Mexico is about to abolish the tariff of 15c a bu that now maintains on American wheat. Just what this would mean to the grain trade is a matter of some doubt. It would certainly mean a greater movement of wheat into Mexico and would be a price strengthening influence in its general application, but scarcely anything to become rampantly bullish over. Two other things helped the bulls a little, one the heavy rains, the other the fact that Eastern millers sent inquiry West for hard Kansas wheat, and Milwaukee sold some Turkey red wheat to go East at 97c in Milwaukee. On all this a small fractional advance was under way, and the market looked good for ½c or so. Then the bears handed out the information that the Minneapolis flour mills will close today until Tuesday next, and this took the edge off at once, Through the small fluctuations there was evidence of a waiting undertone, the pit crowd being governed more by desire to know the import of the government report to come today than by anything else. Receipts, 97 cars.

The market dragged along to the close without much new interest shown. July closed at 93% 93% c. September at 81% cand December at 79%c. Following was the range of prices:

Wheat—Open High Low Thurs Wed
