John Buzzard, sr., who is suffering from a paralytic attack which came upon him a week or more ago, is still unable to speak or help himself. Mr. Buzzard has very little reserve strength and his friends are worried over his condition.

Pest Works Its Will.

The Mediterranean fly (karatit capitata) has for several years caused considerable damage in Greece to the fruit and vegetable crops. Oranges, apples, pears, peaches, apricots, plums and tomatoes have been especially affected. No remedy has yet been discovered, and there seems to have been little attempt to prevent the spread of this pest.

Would You Believe It?

A scientist in Europe has figured that a particle of water evaporated from the ocean is condensed and returns again in ten days, but that it remains there 3,400 years before being evaporated again.

Hair Dyes Not Needed.
Hair dyes are unknown among Chinese women, as their hair is uniformly black, becoming gray only in extreme old age.

Opal More Colorful When Warm.
The opal shows its exquisite colors best when warm, and dealers aware of this peculiarity will hold an opal in the hand before showing it, in order to enhance its changing luster.

A Similarity.
Some great scientist said that an oyster is as complicated as a watch. We know that both run down easily.

And Not Be Blue.
When you know a man to be yellow it is just as well to draw the color line.—Cartoons Magazine.
