#### Care of Ferns.

The best soil for ferns is a light, porous loam or leaf mold, half mold—not too freely broken nor sifted—and the other half well-rotted manure and sharp sand, equal parts, and well mixed. When potting drainage should be provided for by filling in first with charcoal, broken pots, coarse gravel or something similar. Remember that ferns object to stagnant moisture at their roots. The soil must not be kept constantly soaked, though they require a soil kept on the moist rather than the dry side, therefore provide good drainage. Give the plants plenty of light, a moderately warm and moist temperature, and they will soon adapt themselves to the living rooms.

#### Surprised.

A number of Mrs. Earl Baldwin's friends planned to give her a surprise party. Last Monday evening about eight o'clock they arrived without ceremony. Mr. Baldwin had been notified of their coming and had ordered refreshments sent down. These arrived a little ahead of time. Mrs. Baldwin told the boys there was a mistake and would not receive the things. Mr. Baldwin had to quietly slip out and overtake the boys and stand guard on the outside until the arrival of the guests. It was a good thing for him the weather was pleasant, but they surprised her all right.

Judge William B. Drescher is critically ill at the home of his son, W. H. Drescher in St. Louis. His faithful sons, Will, Edward and Warren are at his bedside. The condition of Judge Drescher will be learned with sincere regret by his numerous friends in Hannibal and this section of the state.
