

Not Much.

Secretary Foster has always had the reputation of knowing a good thing when he sees it. He knows gold to be a good thing and he proposes to keep it in this country by exercising his prerogative of refusing gold bars for gold coin for exportation. This is the first time since 1862 that this government has refused to furnish gold bars for shipment. In that year certain banking firms wanted to exchange gold coins for gold bars, but the Treasury Department declined to allow the bars to leave the country. So that Secretary Foster has a well established precedent in the matter.

In this action the Treasury Department is simply following the course long pursued by the bank of England. In other words: What is sauce for the goose is sauce for the gander.

Mud.

Mud is simply earth and water mixed together. Of the former, we have an inexhaustible supply of the very best there is, and of the latter we sometimes do not have enough to go around, but fortunately we have enough now, and could furnish a surplus for 40000 exporters for a while at least. This means that the roads, the entire surface of the earth, so far as Holt county is concerned, is one vast mass of earth and water too much mixed. This has been the condition of things for so long now, that we begin to yearn for a drouth. Let's see, ever since the middle of January it has been varied with intervals of rough frozen ground and lately it has gradually grown worse, so that each day we have been able to say this is the worst we ever saw. The "oldest inhabitant" we have here now, "Uncle Jesse Welch, who celebrated his 100th birthday Tuesday last, admits that he never saw anything like it and he has lived in Missouri for nearly ninety years. We have had muddy periods in the past, but none so lengthy as this. Those who have travelled through this country in the old stage days can well remember the slow progress made for weeks at a time, but no period extended into months with so little promise of a cessation as this. We have no information as to when this period of mud will end, or whether it will go on growing worse until the whole surface shall float away. We will see further on. Better have your canoes ready that you may be able to go with the tide.

Naturalization and Suffrage.

The attempt to raise a diplomatic question over the New Orleans treaty has brought to the front a peculiar fact. Although some of the lynchmen were not citizens of the United States, they were voters according to the laws of Louisiana, and were locally regarded as citizens.

It is a great mistake to confound naturalization and suffrage laws. No State can, by legislation or otherwise, admit any foreign born resident to citizenship before he has resided in the country five years, as required by the Constitution. But the States can grant a man power to vote before he is a citizen, provided he has gone through the formality of "declaring his intention."

It is an old joke that when an emigrant ship arrives at Castle Garden on election day, the new comers' first request is for directions how to reach the polling places, and although this is of course a joke, and nothing more, a newly landed immigrant can, in twenty States, vote long before becoming a full-fledged citizen.

Whether this indulgence is wise is a matter of opinion, but the practice is calculated to cause considerable trouble. A man of mature years is a citizen of some country, whether of his birth or adoption, and an immigrant who returns to his home without having taken out final papers can vote there without question. Hence a man is practically a qualified voter in two countries at the same time, if he is allowed to vote here while still a citizen of a subject of the country of his birth, and this seems contrary to the spirit and intent of the Constitution.

Wheat in Missouri.

The secretary of the Missouri Board of Agriculture furnishes the Associated Press with the following weather report. The rainfall has been normal and the snow which covered the ground of the northern part of the state has been beneficial to the wheat crop. The wheat crop has apparently wintered well in all sections of the state and the prospect for a good crop appears to be much better than at this time last year.

In a few places the alternate freezing and thawing during the last of February and the first of March did some slight damage, but generally there has been sufficient snow to protect the wheat from injury. The ground is generally too wet for seeding, but in some counties, particularly in the southwest, planting has begun. The peach crop has been injured by frost in many counties.

The following conditions are given as fair estimates: Small fruits 88 per cent, apples 84 per cent, peaches 69 per cent. Very little oats have been sown so far. Stock is healthy and in excellent condition, but has not yet been turned on pasture.

Sir John Will Not Prosecute.
The Canadian Government is reported to be contemplating a political suit against Edward Farrar for high treason. Mr. Farrar is the able journalist who wrote a pamphlet giving reasons why Canada should seek annexation to the United States, of which twelve copies only were printed for private circulation and information. If he is guilty of high treason, full half the male inhabitants of Canada, who are voters, and who have been discussing annexation and reciprocity along the same line, are also guilty of treason, and Sir John Macdonald would be obliged to prosecute all of them if he prosecutes one. Sir John is satisfied to get out of the electronics with the skin of his teeth, without prosecuting anybody.

Missouri's legislature does not propose to have the young ladies who come into that state with amusement aggregations, exposed to the rigors of that climate in light and airy costumes of opera bouffe. It is only their great regard for the health of those ladies that prompted them to introduce the law against exhibitions in light.

—Notwithstanding the horrible condition of the roads a large number from the surrounding country were in our city Saturday, and our merchants report a very large trade. As a business point Oregon is one of the very best in this section of the state. Her business men enjoy the commercial standing of A 1.

—Andrew county has organized a horticultural society, with Wm. Ent as its president. Why not have a summer meeting of the fruit growers of Nodaway, Atchison, Andrew and Holt counties, and why not have that meeting in our own lovely little city some time in June. We hope the Oregon society will take hold of the matter.

—Rev. W. L. Carter, of this place, has been called to preach for the congregation of Mount Zion Baptist (colored) church in St. Joseph. Mr. Carter has been a citizen of this place for several years and will still make this his home. He has been engaged in making a collection here for the benefit of his church. His success in this effort has been very good.

—The FARMER, going from the oldest to the youngest send greetings to Brother King of the News, and to grand Ma Mamma. It's a boy, you know—and surely Sherman when he marched down Pennsylvania Avenue, at the head of his magnificent army that went to the war, was no prouder there than is Ed King to-day over the arrival of that baby boy at his house.

—N. F. Murray, we are informed, will soon receive a shipment of plants, etc., from France. This enterprising nurseryman is determined to supply the demand for trees and other things in his line if it is possible to do it. He has been preparing his apple grafts during the winter months and is now making preparations at his nursery for his spring deliveries. It is worth the time spent to visit his place and look over his stock.

—The demand for Oregon property is always good, but this season surpasses previous years. It is no trouble what ever to holders of property to dispose of it at prices far beyond those of a year ago. Lots that commanded \$150 a year ago are today in demand at \$250. They know that by reason of the substantial improvements and prosperity of our city investments in Oregon real estate will always bring good returns. Good schools, fine churches, lovely homes, excellent society and low taxes, are in themselves the wise will always favorably consider.

—In our next issue we will publish an essay "What to Plant and Why Plant It" from the pen of J. N. Menefee of this city, and read before our local horticultural society. It is not only an article written by a practical grower, but is wisely and highly deserving a personal review by every farmer and lover of the soil.
