

A Marvelous Work

Whatever may have been the influence of the World's Fair during the summer months...

No printed description, and no number of such descriptions, of what is visible at the fair will give one a fair understanding of the character of the wonderful sights to be seen at Jackson Park.

No other people in the world could produce such a spectacle. No people not associated by the genius of an enlightening and progressive civilization could have conceived such stupendous work.

As no other country could in so short a space have produced such results, so no other city in the world could have brought within its limits so many wonders.

As no other country could in so short a space have produced such results, so no other city in the world could have brought within its limits so many wonders.

Thomas M. Cooley is a recognized authority on all constitutional questions. He is, perhaps, the leading lawyer of the United States, and his legal writings are standards in this country and in Europe.

A statement from Judge Cooley on the present attitude of the minority of the senate ought to be read with as much respect as anything yet written on the subject.

It is a fundamental principle of representative government that the majority shall rule. For a majority of the senate to concede for any reason that a rule of practice in debate is a senatorial courtesy makes it possible for a minority to prevent legislation by side lightly protracting debate is equal to revolution.

Still Unelected.

The present administration has been in power six months and thus far has done but little to enforce the law against trusts and combinations in restraint of trade and in respect to the administration has disappointed public expectation.

Some people think it is a greater volume of currency that is needed. But there was plenty of employment at good wages. Why this remarkable change since the presidential election last fall?

It is not true that the Democratic party served notice on all concerned that the industrial policy of the party in power thirty years is to be reversed?

Has the Golden Age Ended.

Have we come to the end of the golden age in American industries? Will our employment be less in magnitude and variety and will wages be lower?

The Federal Election Laws.

The Democrats in the house of representatives, in faithful performance of the program mapped out by the leaders, have passed, by a strict party vote, the federal election laws.

There is not known a single instance where those election laws have had the effect charged by the Democrats. There is not a case on record showing that a fraudulent voter has been detected.

It is not true that the Democratic party served notice on all concerned that the industrial policy of the party in power thirty years is to be reversed?
