

Loeb's Store Robbed

Burglars Enter Rear Windows and Rifles Safe—Secure Little Money.

Some time Monday night burglars broke into H. Loeb & Bros. store and got into the safe, which was only partially locked. The cashier had deposited the money at 4:00 o'clock Monday afternoon and very little money was in the safe, Monday being a rainy day.

Entrance was made into the building through the office at the landing of the stairs.

The windows are just above the roof of a one-story extension on the north of the main building and this roof can easily be reached from the rear stairs of Van Voorhis Photo gallery.

A suit of clothes was found in the rear of the store the robbers had evidently tried on and left. A number of checks in the safe were not disturbed. Aside from the cash Mr. Loeb says that nothing else has been missed.

Mr. Loeb states to the Tribune that he thinks the robbery was committed by home talent—those who have been breaking into so many stores in the last year.

Butler Boy Attempts Suicide.

About nine o'clock Wednesday morning, John Haynes, the son of Elijah Haynes of this city, shot himself in the right temple with a twenty two pistol, inflicting a wound which will result fatally. The boy has been afflicted with epilepsy and has always been carefully watched by the family. This morning he had a quarrel with members of the family, and while mentally deranged threatened to shoot his mother and a child which was in the house. They ran out and left him alone when he turned the pistol and fired a bullet into his right temple. Dr. Boulware was at once called but could not locate the bullet which had penetrated the brain. There is no hope that the boy will recover.—Butler Democrat.

Do You Read?

We want every man in Southern Bates county to read THE RICH HILL TRIBUNE

a weekly paper that prints the news you want to see. We are planning to make the paper more readable along our own ideas; the way to find out whether it is more readable to others is to

Ask Your Neighbor.

We say this because we can not get out and ask the people what they want, but if we succeed in giving the people what they want we have succeeded in our newspaper ambition. Ask your neighbor who is a subscriber to read his paper and if you like it

Then Subscribe

Last week the Sprague Department was started; soon other features are to be added. While these things may not interest every reader, they do help towards what we consider the ideal paper—one that records the doings of all the people in Southern Bates county.

You who take the Tribune and want to get all the news of Southern Bates county, will help the paper and will receive a better news paper if you mention the fact to a neighbor that he should take the Tribune.

The paper is elastic in that it will be enlarged as the patronage increases and as we are anxious to grow we want more patronage.

Advertisers will be interested to know that the circulation is growing more rapidly now than it ever has under the present management.

Subscribers:—When you read this issue hand it to your neighbor and if you can speak a good word for us we will appreciate it.

Dr. J. Paul Goode, head of the Department of Political Economy of the University of Chicago, in a recent lecture held out reassurances as to the nation's fate when its supply of coal gives out. Power may be obtained from the sun in America's desert area each year sufficient to generate 15,000,000,000 horse power, according to Dr. Goode. This is equivalent to three hundred times the power at present secured from coal. "In less than 200 years, according to present estimates, our supply of coal will have been spent," said Dr. Goode. "But there will be plenty of substitutes. Air motors will reach for power from the wind, securing eight or ten times as much as is available at present. Then there are the waves, tides, rivers and waterfalls. By means of solar engines placed in the 1,000,000 acres of desert area to be found in this country vast power from the sun's rays may be maintained."—New York Tribune.
