Its Republican friends do not propose bringing it to the front unless it can pass the senate. Treating the Wrong Disease.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here and there, and in this way the all present alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he describes his pills and potions, assuming them to be such, when, in reality, they are all only symptoms caused by some womb disease. The physician ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse, by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby discharging all those distressing symptoms, and instituting comfort instead of prolonged misery.
