Philadelphia, which arrived here Wednesday, brings news of the restoration of peace in Venezuela. The troubles which have existed in that country for the past sixteen months grew out of the election of Dr. Rojas Paul to the presidency of Venezuela over Gen. Crespo, who had served one term as president. Gen. Crespo, on learning of his defeat, collected his most trusty followers, manned a schooner, and sailed for Trin-idad. Since that time he has been ranging along the coast causing out breaks at different points, until finally he and his crew were captuaed on Dec 2, off Curaco, and they are now in prison. The natives are overjoyed at the capture of Crespo, for while he was at large shippers were loth to send vessels to Venezuela ports.

CONGRESS MEMORIALIZED.

Dakota Democrats in Convention Urge Division and Admissi The democratic convention of delegates rom South Dakota counties, held at Mitchell yesterday, adopted the following memorial:

To the congress of the United States: four memorialists, the citizens of south Dakota in affiliation with the democratic party, duly assembled in conven-tion at Mitchell, this 20th day of December, 1888, hereby request, urge and solicit at the hands of your honorable ody the division of the territory of Dakots upon the 7th standard parallel of surveys thereof and the immediate admission into the union of states of that portion of said territory lying south of said parallel of surveys. We desire most respectfully to represent that the division of the territory of Dakota by an east and west line has for many years been desired and expected by its citizens; that the congress of the United States has been memorialized to that end, but without avail, by sixteen successive legislative assemblies; that in view of such expectancy the penal, charitable and educational institutions of the territory have been duplicated in the north and in the south, that religious sects have in like manner established northrn and southern conferences and that anticipating division throughout all these years intervening since the first settlement of the territory all hope has been guided and all interests builded to that end. We desire further to re-present that either section of the divided territory would be exceeded in size by but eight out of the thirty-eight states in the union, the smaller portion comprising 74,000 square miles, or more than 20,000 square miles in excess of the mean average of all existing states; that the southern half, for which immediate ad mission is now requested, contains with-in a restricted compass doubtless the most prolific mineral section within the national boundaries, producing gold, eliver, copper, iron, galena, tip, nickel, graphite, mica, gypsum, coal, antimony asbestos, cobalt, salt and oil, while he larger area of prairie, remarksthe larger area of prairie, remarka-bly productive in soil and almost en-tirely cultivable, by reason of the ab-sence of hills, mountains, swamps and other obstructions to profitable agricul-ture, constitutes a fair country upon which may safely be predicted for the future an unusual density of population; that the people of south Dakota now number 375 000, and that thus equipped
