The gist of evidence was-that with few exceptions the iniand published rates had not for some months been maintained. Chairman Cooler. the inland published rates had not for some months been maintained. Chairman Cooley said to the managers, in part: "It is very manifest that things have been going on here that should stop at once. Here is the law, and it is not with you to say to us that there are practical obstacles in the way of complying with it, that you would lose business by so doing, and all that sort of thing. We are not concerned in that. We do not wish you to do anything to make you wish you to do anything to make you lose business. At the same time we cannot accept it as a valid excuse that if you obey the law ou will thereby lose business. The time ought to be coner's by the name of John Martin. Mr. sidered as gone by when a manager can Martin informed them that he was come to us and say, I named the rate about to start east, and that they could and I did it regardless of law because stay and take care of his stock in his absence. One crime in railroad circles is no more to be excused

by another than one theft is to be justi-fied by another." Judge Cooley announced that for cer tain southern roads that had asked for a hearing a continuance of the investigation for two weeks had been granted. The commission did not wish to express an opinion that would affect the inter-ests of those roads until they had been fully heard, but in the meantime the practices in the north which have all appeared unjustifiable should not be continued. "I trust," he added, "that reproached him for it, whereupon Baker drew a six-shooter with the evident intention of using it.
