Red, Black and Brown Men Have Had Hard Time Under American Government.

Lincoln, Neb., June 14.—Commencement exercises were held today, the senior class and graduates of several colleges being addressed by General Nelson A. Miles, referring to the race problems this country has to solve, said:

## L. M. SHAW HEARD

Secretary of the Treasury Addresses Republicans in Davenport.

## RIDICULES FLOATING RUMOR

Says Roosevelt Is Not in Campaign—Makes Speech Upholding Republican National Platform.

"Of course Theodore Roosevelt is not mixing in the affairs of the republicans of Iowa. I would not let him if he wanted to and he would not do it if I wanted him to," said Leslie M. Shaw.

LESLIE M. SHAW.

at the Grand in Davenport last night in addressing the republican voters. It apparently seemed ridiculous to him to have to make this statement.

The secretary denied the statement that he was opposed to a primary law, but said there were many kinds of primary laws. His opinion was that the people are not qualified to vote for members of the supreme court, and asked the question, "How many lawyers do you know outside of your own town?" He took the position that the operation of the primary should be representative, the same as the operation of the government.

While discussing this subject, he said, "You surely do not object to the president choosing his own cabinet. Of course, I knew there were some people who would tell him whom to put out of the cabinet. There are some Washington correspondents of the Des Moines newspapers who have had me put out six or seven times besides the time I had planned myself to leave, and I see by a Chicago paper this morning that I am about to be put out again because I have come to Davenport to speak tonight."

Gubernatorial Contest.

To the charge that he had come to Davenport to mix in the gubernatorial campaign, he said that he took advantage of every opportunity to make a republican speech that he could. He said he was simply coming there to defend the party and its principles, not to discuss state issues, and he did not. He said he came to talk about principles, not men. He did not mention Governor Cummins' name.

His speech consisted principally of a discourse on the tariff, and compared the attacks upon it within the party with the attacks by the democratic party, and said that there was not one word in the record of messages and speeches that would show that President Roosevelt stands for tariff ripping.

## SHORTS, OF ISTHMIAN COMMISSION, SCORES SNAP JUDGMENT IN POLITICS

Des Moines, June 14.—Theodore P. Shorts, chairman of the Isthmian canal commission, today delivered the address before a large audience at the Drake university silver anniversary service. He said in part:

Need of Education.

"There has never been a time in the history of this country when the need of the higher education which our universities alone are competent to supply, was so great as it is today. The highest function of a university is to supply well disciplined and well informed minds, which are capable of accurate thinking. There has never been any lack of the opposite kind of mind, which is the very fountain-head of misinformation and error. This crop, like those of weeds and mosquitoes, takes care of itself."

Ignorance Abroad.

"In a time like the present, when a spirit of discontent and of revolt against existing conditions is abroad in the land, the harm which an ignorant mind, no matter how sincere and well meaning, may do, is incalculable. Its bad influence can only be offset by calm reasoning and solid knowledge. The present upheaval of unrest, call it what you will, socialism, collectivism, communism or incipient anarchy, is like countless others that have preceded it. It has the same time-worn nostrums for the transformation of human nature and the abrogation of natural laws."

All Have Been Tried.

"There is scarcely a panacea proposed today for the cure of social ills and
