

WE HIT 'EM HARD.

Have just opened a job of sample gloves and mittens, all kinds under the sun, 70 different styles. We have divided the gloves into three lots to sell at 11, 18 and 25c. Those at 11 are worth from 15 to 30 cents; those at 18 from 25 to 50c, and those at 25c from 50c to \$1.00.

The mittens will be divided into 4 prices as follows: 4c, 11c, 18c and 25c, every pair guaranteed to be worth double the price, and many worth three and four times the price asked.

These are the greatest drives in gloves and mittens we have ever been able to place before our customers.

To make this drive doubly interesting we will for Monday, Tuesday and Wednesday, three days only, present to each purchaser of a pair of kid gloves, free, one of our extra kid glove stretchers. Remember the glove stretchers are one to each customer purchasing one or more pairs of kid gloves and will only be continued three days.

We do not think we exaggerate when we say we have the largest line, best selections of colors and styles, and lowest prices on kid gloves in this section. Many new goods just now being added to the stock.

We close at 6 o'clock except Saturday.

On Monday, January 21 at 8:30 A. M. we shall offer a lot of double fold wool tricots at 19 cents per yard.

A mixed job of better tricots and flannel suitings all go at one price, 34c. At the same hour 10 pieces (388 yards) bright red cashmere at 54c per yard, you have paid two or three times more for the same goods. Everyone can afford to buy his little girl a dress at the price, and we shall refuse to sell long lengths.

Another big drive, 27 pieces (16 color) silk dress plush, while they last, 41c a yard; hardly think they can last all week.

Additions to our plush stock at one-third below value.

N. B.—The publishers of the Dore Bible Gallery have just notified us that they can furnish us with 100 more copies. Our ad. at 59c each closed them out so quickly before Christmas that many customers who came were disappointed—we have arranged to take the order for your customer at the above price all this week. Be sure and leave your name—only six days, after which the price will be higher.

THE DEERE DOMINO.

A Great Event in the Tri-City Social Circles.

A Gay and Brilliant Assembly at Masonic Hall, Moline, Last Night—Who Were Present—Dancers From Abroad.

The domino given by Mr. and Mrs. C. H. Deere at Masonic hall, Deere block, Moline, last evening, was, as it had been predicted it would be, a great and brilliant event in the society circles of the three cities. There were nearly one hundred couples present, embracing the best known society people in Moline, Rock Island and Davenport, and including many from abroad. It would be impossible to enumerate or describe the costumes. Suffice it to say, they were varied, odd, and in many instances rich in design, and identity was in almost every instance successfully concealed. The early part of the evening was devoted to round and square dances to the music of Schilling's orchestra.

At 11:30 the maskers formed in line and proceeded about the spacious room to the step of a grand march from the orchestra, and at a proper signal the masques were simultaneously removed. Then followed a series of surprises, greetings and jolly congratulations, accompanied by a straightening of frizzes and bangs, and other hirsute appendages. Mrs. Deere, richly attired in black silk velvet, old lace and diamonds, did not mask. She was gracefully assisted in the reception and entertainment of the guests by the Misses Deere, Miss Henderson, of Chicago; Miss Kimball, of Chicago; Miss Mansur, of St. Louis; Mrs. J. D. Chapman, and Miss Chapman, of Clinton.

Of those present the following were noted:

Moline—Mr. and Mrs. C. H. Deere, Misses Kate and Anna Deere, Mrs. S. H. Velle, John Goode and wife, Geo. Crampton and wife, Frank Goode and wife, Clarence Nelson and wife, L. B. Kuhn and wife, Geo. Dunn and wife, Walter Toles and wife, E. B. Keator and wife, Miss Taylor, Miss Calkins, Miss Barker, Miss Shields, Miss Anderson, Miss Anthony, Miss Snyder, Miss Crampton, Miss Weaver, Miss Hall, Chas. S. Kerns, Robert Swan, H. Hoffman, W. Brown, Frank Herbst, Austin Way, W. E. McCrea, John Cady, Will Velle, M. Y. Cady, A. F. Vinton, S. S. Davis, Mr. Dickinson, L. Gaylor, Bert Savage, F. W. Gould, Carroll Kinsey, Dr. Merriman.

Rock Island—Miss Maggie Dart, Miss Grace Dar, Miss Lonie Weyerhauser, Miss Huber, Miss Webster, Miss Hall; F. J. Kinney, John Galt, Dr. Geo. Beck, Geo. Pleasants, I. S. White, Gus Tegeler, W. B. Meyers, John Weyerhauser, Otto Huber, C. C. Truesdale, Maj. McGinnis.

Davenport—Wm. Wadsworth and wife, J. R. Preston and wife, Miss Peck, Preston, Miss Norma Allen, Miss Anna Smith, Miss Josie Parker, Miss Kuhn, Miss Leonard, Miss Larimer, L. M. Allen, H. T. Wadsworth, Ed. Van Patten, Dr. Parker, Walter Freeman, J. P. Cook, J. P. Donahue, Nick Kuhn, W. P. Kiser, Clement Putnam.

Chicago—Miss Kimball, Miss Henderson, Mr. Adams, Mr. Downs, the Misses Swann.

St. Louis—Miss Mansur.

Peoria—Miss Dwight.

Sterling—Miss Crawford.

Joliet—J. R. Graham and wife, Miss Gleim.

Clinton—Mrs. J. D. Chapman, Miss Chapman.

Galesburg—E. S. Gunnell.

West Chester, Pa.—Miss McFarland.

The cuisine, the serving of which was in charge of Terrell and his corps, was spread in the supper room adjoining the hall, the refreshments being light and dainty, but varied and abundant.

OTHER SOCIETY EVENTS.

Mr. and Mrs. S. H. Velle, of Moline, give a reception tomorrow evening.

Mr. and Mrs. J. J. Reimers entertained in a most delightful manner a large card party last evening.

A dinner party is to be given by Mr. John D. Cady, of this evening, in honor of the Chicago guests of Mr. and Mrs. C. H. Deere.

The West End Progressive Euchre club met at the residence of Maj. and Mrs. L. M. Buford last evening. There was amusement for several tables. Fine refreshment were served.

On the occasion of his birthday anniversary last evening, Mr. E. D. Folsom was surprised at his home, Fourth avenue and Twelfth street, by a number of his friends and the evening proved a happy one to all present.

A pleasant party was given at the Island City club rooms in Star block last evening by the ladies who presented the flag to the Island City club last fall. It was an invitation affair and highly enjoyable in all respects. There were present:

Rock Island—Misses Maggie Brady, Sadie Montgomery, Sarah Macklin, Mollie McEniry, Jennie Kane, Hannah, Kate and Jennie Dolly, Hattie and Aggie Kinney, Mary Maroney, Minnie Ryan, Sterling, Davenport—Misses Anna Mullins, Katie Jones, Lydia Harrison, Maggie Jones, Rock Island—Messrs. Jas. L. Brady, John Kinney, Thos. L. Velle, John Kane, Thos. and John Duly, John Brady, Fred Young, Jas. and Thos. Reidy, John Looney, M. J. Murrin, P. H. Horn, Wm. McEniry, Frank Kane, Wm. Lynch, Davenport—Messrs. Jas. Lindley, John Mullins, Frank Harrison.

The "Kerry Gow."

Joe Murphy's great Irish comedy drama, "The Kerry Gow," is to be presented at Harper's theatre tomorrow night, and indications are that the largest audience of the season will be present. The "Kerry Gow" Disputes says:

"The Kerry Gow" was received at the opera house by a fair Monday night audience. The piece is not strictly new, having been played here but once before. It is of the sensational style, and strictly Irish. Mr. Murphy has long enjoyed a fine reputation as an Irish comedian, while his company is composed of rather better talent than is usually found in companies playing this kind of business. The songs, the carrier pigeons, the smithy, shoeing the horse, the scenery, all taken together, make "Kerry Gow" a decidedly interesting play. There is none of Irish burlesque or alleged funny business about it. Those present grew quite enthusiastic at times, loudly applauding the wit and repartee of Dan.

Columbus discovered America and Edison invented the phonograph, but it remained for Dr. Bull to invent the remedy of the age, "The Cough Syrup," the kindly cure.

"Mamma" said a little three year old, "papa says on wednesday we're week but you are beautiful today." "Ah! my child, last week I had neuralgia, this week I have Salvation oil."

Induced Magnetism in Iron Vessels.

The other magnetic qualities of a ship are comparatively stable, but this is treacherous and changeable to a degree that necessitates constant vigilance to prevent disaster. On the great fleet of transatlantic steamers it is more likely to lead into danger than on other routes; the ships steer a generally easterly course going to Europe, and a westerly one coming to New York; the magnetic influence on the outward trip is the opposite of that on returning; the ships run at a high rate of speed, and the induction varies on different parts of the route, according to the intensity of the magnetic field passed over, the smoothness or roughness of the sea which affects the motion of the ship, and the warmth or coolness of the weather.

It is of attributing the loss of vessels when approaching a coast to the magnetic effects of fog and land, and other improbable influences upon the compass, it is more likely to lead into danger than on other routes; the ships run at a high rate of speed, and the induction varies on different parts of the route, according to the intensity of the magnetic field passed over, the smoothness or roughness of the sea which affects the motion of the ship, and the warmth or coolness of the weather.

A COLLIER'S FATE.

Crushed to Death in a Mine near Coal Valley—Particulars of the Sad Fatality.

COAL VALLEY, Jan. 23.—A fatal accident occurred at the Blossom coal mine, owned and operated by R. Somerson and located about three miles from town, at 4 o'clock yesterday afternoon, John Adams, one of the miners, being the victim. He was working in a pillar, which is usually regarded as more or less dangerous, as there is a strata of top coal above, which is subject to fall without notice. This was the case yesterday, and young Adams was struck with great force in the back of the head, his head being pressed forward against a chunk of coal which made a deep impression and laid the scalp open for several inches, besides inflicting other wounds. He was released from his terrible position by another miner, as soon as the coal could be removed, and found in a sitting posture his head forced down to enunciate his knees. He was then breathing heavily and being conveyed into the open air, died in twenty minutes. It is believed the immediate cause of death was concussion of the brain.

His remains were brought to his father's home in Coal Valley. He was a son of Wm. Adams, a single man twenty-six years of age, industrious in his habits, modest and unassuming. His mother is prostrated with the shock of the accident and the other member of the family are deeply grief stricken. He was a member of Coal Valley Lodge, A. F. and A. M., and the funeral will be conducted under the auspices of that order tomorrow afternoon with interment at Coal Valley cemetery.

Coroner Hawes went to Coal Valley this morning and held an inquest on the remains of the unfortunate young man, summoning as a jury: Thomas Martin, Thomas J. Murphy, John T. Hass, L. M. Nelson, James Reed and T. R. Lees. The testimony of Joseph Bardsley, Robert Buckley, Richard Callahan, T. J. Murphy, coal miners, Robert Somerson, mine owner, and Dr. Martin, physician, confirmed the facts as related above and a verdict was rendered to the effect that John H. Adams "came to his death by being crushed by a fall of top coal in the old Blossomburg coal mines now being worked by the firm of Somerson & Co., of Coal Valley; that the accident was unavoidable and we find no blame attached to anyone."

A Perilous Situation.

The Davenport Democrat Gazette tells of a thrilling scene which was witnessed on the ice near the Iowa shore Monday afternoon. Ice had formed in the still water there to the depth of six to eight inches, the field extending several hundred feet from the shore. For several days brewers had a force of men cutting ice and hauling it away with teams, and at the time named, their work came to an abrupt termination. The middle channel of the river was almost free of ice; the rise of water and milder temperature together, loosened the field of ice which was being worked, at the shore. But the fact last named had not dawned upon the workmen. So while two or three teams and a dozen to fifteen men were on the field, it commenced to move. It moved toward the main channel and down stream. All the workmen, excepting the drivers, put for shore and reached it, the most of them after waiting. But it was impossible to get the horses and wagons off the ice—and down stream they went with the field. The horses saw that something was wrong, and neighed and whinnied, stamped and reared, as if conscious of great peril.

As many as a thousand people soon gathered on the river bank to see the move with its load. They gazed in fear, too—expecting the field to break where the weight was—where the horses were stamping. Their fears were not realized. The field floated with comparative swiftness until it lodged against the upper end of Credit Island, where it lodged against thick ice. The drivers hurried their horses and wagons on to the island in quick time, and great gladness. From the island to the main shore there was a safe passage over the ice bridge. And by 7 o'clock the teams were safe in their stables.

Court Callings.

The trespass suit of Craig vs. Silvia came to an end in the circuit court last evening, the jury returning a verdict for the plaintiff for a new trial.

The case of Harmon Marshall vs. Edward Wilson, was then called up. It is an appeal case founded on an attachment made by the plaintiff upon some property belonging to the defendant and situated in LaSalle county. The case was tried to court.

Decree of divorce was granted in the case of Rose Van Horn against Chas. Van Horn.

This afternoon the case of Siegrist against Siegrist was taken up in the circuit court, it being an appeal from the justice's court. Messrs. J. T. Kenworthy and Saville Johnston are the opposing counsel.

A jury was selected in the damage case of John Blakemore vs. the city of Rock Island this morning, but the case was postponed until tomorrow morning.

Public Notice.

The latest example of making art subservient to trade is shown by the Union Coffee Co., of New York, in the introduction of their Patent New Process Alarum and Bunola coffees, by presenting to the purchasers of the above brands of coffee, beautiful medals bearing likenesses of the favorite, Mary Anderson, Adeline Patti, Ellen Terry, Clara Morris and Ada Rehan. We have seen the above medals, and as works of art, the exquisite engraving of the faces puts to shame the boasted work of the U. S. mint in the engraving of the heads upon our national coins. In America's greatest favorite, Mary Anderson, the artist has been most fortunate, not only in reproducing the exquisitely beautiful face, but in expressing the noble animation that animates the face of the great actress. The perfect beauty of the faces upon these medals will be highly appreciated after examination under the magnifying glass. From an artistic standpoint, these medals will be highly valued as souvenirs of art, while to those who have been entertained by either of the above actresses, they will be a memento that will become more valuable as the years pass by.

"Mamma" said a little three year old, "papa says on wednesday we're week but you are beautiful today." "Ah! my child, last week I had neuralgia, this week I have Salvation oil."
