A horse attached to a Davenport commission man's wagon made a lively run along Third avenue in the vicinity of Tenth street last evening, scattering eggs and other articles all along the street. A boy who was driving narrowly escaped serious injury.

In a letter from Chicago to a friend in this city, Fred Hass writes as follows concerning the World's fair hotels: "I consider it unwise to make advance payment on World's fair quarters, or quite unnecessary to make any arrangement for accommodations, as you can do much better yourself after you come here, as every person knows better what he wants after he sees them. Furnished rooms in hotels and private families are so numerous that 10,000 people could be easily accommodated in the World's fair district. There is not a hotel or rooming house that is at the present using one-fourth of its capacity. The magnitude of the fair is so vast that it would be difficult to express it on paper. As regards prices, I consider them very reasonable. I have discovered that people who have made advance payments have been greatly taken in."

Quit the Stage.

The Cherry sisters have taken the advice of the press and gone home to their farm, but they now appear in the role of litigants in a court of law. After they had decided on a starring tour they leased their little farm, animals, increase, etc., to a Mr. Houts for a period of one year, beginning March 1. Returning from the tour they decided to oust Mr. Houts and brought a replevin action for the livestock. The case was heard before Judge Ellsberry, of Marion, Saturday. A jury was impanelled and the hearing lasted throughout the day. The jury on retiring finally agreed to disagree, and the result will probably be another trial. The girls have staying qualities, and though Mr. Houts may defeat them in their action, the Cedar Rapids paper thinks strong reasons exist for believing that for him life will hardly be worth the living during the next year. If they would sit on the fence and sing to him, says an exchange, Mr. Houts would no doubt vacate the premises in a hurry.

Is the Earth Slowly Freezing?

In Spitzbergen and Greenland, in Alaska, along the banks of the Mackenzie river, even in Grinnell Land between 80 and 83 degrees north latitude—the farthest point yet reached—fossil plants have been found belonging to the carboniferous, jurassic, cretaceous and tertiary periods, and these plants have been described by Professor Oswald Herr of Zurich. The fossil sequoias of Grinnell Land bear an unmistakable resemblance to the living sequoias of California, while the fossil laurel—*Laurus primigenia*—of ancient Greenland is said to be the direct ancestor of our present laurel. The cold which overwhelmed the ancient polar regions is not arrested in its progress; the cause which first brought it on is still at work. Our sun is becoming more and more condensed, and by and by it will no longer find in the contraction of its diameter a source sufficient to keep up its energy, and with the extinction of the sun our earth must perish. The approach of this deadly world chill is infinitely slow—so slow that history takes no note of it—but in time the now crowded portions of the earth must meet the fate of Greenland and Spitzbergen. This day is still buried in the distant future, but far off as it is the lesson of the past tells us that it is coming.—Catholic World.

A Man Thermometer.

Lean men make the best thermometers. Fahrenheit never invented better ones. If the weather is warm and sunny, they are cheerful. If cold and frosty, they are irritable and snappy. If damp and cloudy, they are downcast and gloomy. But if either lean or fat men are suffering from biliousness, headache, constipation, or indigestion, the weather will always be damp and cloudy in their locality, unless they use Dr. Pierce's Pleasant Pellets. These Pellets are small, sugar-coated granules, calculated to start the liver and digestive organs into healthy activity, and thereby raise low spirits, and dispel gloom.

Property Holders, Attention.

I wish to notify all property holders in the Third ward who are desirous of laying their own walks under the ordinance recently passed that they can still do so if the work is done immediately. The matter will be taken up at the July term of the county court. Respectfully,

JOSLIN.

JOSLIN, June 13.—F. E. Crompton considering that the Swedish jubilee at Rock Island was the opportunity of a lifetime, went down on Thursday and did not return until Monday. It is interesting to know that the jubilee is in commemoration of the 300th anniversary of that memorable assembly of Upsala, at which, after a 70 years' struggle, the Evangelical Lutheran Church of the Reformation at last gained the victory and was fully established in Sweden. We could but notice that a majority of the visitors were well dressed, broad-cloth suits and silk hats predominating, and that they were very sociable, friendly and polite to all around them. In 1993 we hope to have the privilege to meet with them again.

Dr. Morgan, of Moline, gave an address to the people of Barstow, on Monday evening last, showing forth the benefits of the Forum. On Tuesday the Dr. and Mrs. Morgan start for the World's fair to be gone two weeks.

The cut worm is destroying whole fields of corn, some of which has been tended both ways, and although this is June 13, there are quite a number of farmers replanting, which is very discouraging.

On Monday morning we heard the engine of a freight train tooting for some time, and then to slacken speed, and finally after killing a yearling calf, the train stopped.

John Moore, James Rathbun and Charles F. Shafer have insured their residences and farm buildings in the Coe and Zuma Mutual.

Mr. and Mrs. James Rathbun and their daughter visited with F. E. Crompton and family on Thursday last.

The frequent showers we are having, combined with the heat, is causing the corn to grow rapidly.
