

Articles of Incorporation.
TERRITORY OF NEW MEXICO.
OFFICE OF THE SECRETARY.
CERTIFICATE OF COMPARISON.
I, Nathan Jaffa, Secretary of the Territory of New Mexico, do hereby certify that there was filed for record in this office at ten o'clock A. M. on the fifth day of June, A. D. 1911.

ARTICLES OF INCORPORATION
of
LANUMEX MINING COMPANY
Number 6281.
and also, that I have compared the following copy of the same, with the original thereof now on file, and declare it to be a correct transcript thereof and of the whole thereof.
Given under my hand and the Great Seal of the Territory of New Mexico, at the city of Santa Fe, the Capital on this fifth day of June, A. D. 1911.
NATHAN JAFFA,
Secretary of New Mexico.

ARTICLES OF INCORPORATION
of the
LANUMEX MINING COMPANY
TO WHOM IT MAY CONCERN:
Notice is hereby given that the undersigned, residents of the United States of America, being desirous of forming a corporation under and in pursuance of the laws of the Territory of New Mexico, do hereby make, sign and acknowledge this instrument and declaration, which when duly filed and published as required by law, is and shall be the Articles of Incorporation of the
LANUMEX MINING COMPANY.
First. The name of the said corporation is the **LANUMEX MINING COMPANY.**
Second. The principal office of said corporation in the Territory of New Mexico shall be located at Hatchita, Grant County, New Mexico, at the office of the Hatchita Mercantile Co., directly in front of the E. P. & S. W. R. R. station, and the agent of said corporation at said office and in charge thereof, and upon whom process against the said corporation may be served, shall be James Hartog. The corporation shall also have an office in New Orleans, La., Parish of Orleans, State of Louisiana, at No. 230 Magazine Street, at which office also the directors may hold their meetings.
Third. The objects for which this corporation is formed are: To buy, hold, sell, operate, lease and mortgage mines and mining properties wherever situated, and to mine, produce, refine, and deal in ores and mineral products of all natures and classes whatsoever. To acquire, maintain, use and operate water rights and water privileges, to operate water power plants and water works, to acquire, generate, use and operate electric power by means of water or otherwise for the operation of mining, milling and smelting purposes. To buy, sell, build, maintain, operate, lease and mortgage reduction mills, smelting plants, electric power plants, refineries, all buildings and appliances appurtenant thereto where necessary or expedient in the operation of its business of mining, smelting and reducing of ores and mineral products; To buy, hold, sell, manage, control and vote shares of stock in other corporations; To carry on and conduct any mercantile business necessary or expedient in connection with its said mining business, in furtherance thereof, to buy, sell, and deal in merchandise of all classes and kinds whatsoever; To buy, hold, own, sell, lease, mortgage and deal in all properties of every kind and character, whether real, mixed or personal, and generally to do all things and to conduct and carry on all business necessary or expedient to the conduct of the business of the corporation under its aforesaid objects.

Fourth. The amount of the capital stock of said corporation is five hundred thousand Dollars, (\$500,000) and the number of shares into which said capital stock is divided is Five Hundred Thousand (500,000) Shares of the par value of One Dollar, (\$1.00) per share.
Fifth. The names and postoffice addresses of the incorporators and the number of shares of capital stock subscribed for by each are as follows:

Shares
Chas. L. Hopkins, Waveland, 250
Geo. Cousin, Becnel, La., 250
John R. Gaunt, Jr., Becnel, La., 250
W. M. Barnett, New Orleans, La., 250
L. L. Moise, San Francisco, Cal., 250
R. J. Marks, New Orleans, La., 250
Louis Ochs, New Orleans, La., 250
Chas. Wiggins, New Orleans, La., 250
Ed Levi, New Orleans, La., 250
W. O. Hudson, New Orleans, La., 250
L. A. Caboché, Wallace, La., 250
Mark Theriot, Litchie, La., 250
J. W. Hannigan, Deming, N. M., 250

Sixth. The said corporation shall exist and endure for a period of fifty years from the date of the filing of these Articles of Incorporation.
Seventh. The number of directors who shall manage the affairs of said corporation shall consist of not less than three, not more than seven, to be determined by the by-laws, the board of directors of the corporation shall have power to make, amend, alter and repeal by-laws for the government thereof.
The names of the persons who shall act as directors of said corporation for the first three months after the filing of these Articles of Incorporation are:

Chas. L. Hopkins,
Geo. Cousin,
John R. Gaunt, Jr.,
J. W. Hannigan,

Stopping a Steamship.
M. Bertin, chief engineer of naval construction in the French navy, figured out from elaborate calculations in how short a distance a steamship can stop. He demonstrated that a 50,000-ton transatlantic liner, going twenty-nine knots an hour, simply by stopping the engines will come to a stop in one hour and thirteen minutes and will in that time have traveled 4.78 statute miles. The same vessel with reciprocating engines, if they are reversed, will stop in twice its own length and if the engines be turbines in four times its own length. These theoretical calculations are verified by actual experiment. The French minister of marine made the test with some torpedo boats and has on several occasions stopped one by reversing its engine to 600 yards and when the engines were of the turbine type in 273.4 yards.—New York World.

Putting His Feet in It.
Guest (to hostess at private theatricals)—Madam, you played your part splendidly. It fits you to perfection.
Hostess—I'm afraid not. A young and pretty woman is needed for that part.
Guest—Oh, but, madam, you have positively proved the contrary.—Boston Transcript.

CATCHING COLD.
Due to infection and not at all to changes in the weather.
Have you ever noticed in church immediately after a prayer or a sermon is finished some one starts a cough and then a whole battery of coughs explode? The modern physician will tell you by way of explanation that minute emanations from the breath of the coughers find their way into the respiratory tract of others, who thereupon cough too. Not alone in church, but in theaters and other indoor places, where people gather in large numbers, is this coughing habit noticeable.
In an article dealing with this subject published in the Independent it is explained that colds are slight infectious fevers which spread particularly among the population of cities and which are due to contagion and not at all to changes in the weather. These may predispose by lowering resistive vitality and by disturbing the circulation in mucous membranes, but it is the presence of an infectious germ that gives rise to the symptoms of the cold. When one of these bothersome afflictions gets into a household usually more than one person suffers from it, and it spreads in offices and schools and the like. It is much more frequently caught in a crowd than anywhere else.
The people who have a succession of colds during the winter time, and those who have to work where many people come and go during the day are particularly susceptible to them. It is not to some sudden change in the weather that the physician looks for the origin of a cold, but to some rather intimate contact with other sufferers from similar affliction.

FAT AND FLOWERS.
Extracting Their Dainty Perfumes From Odorous Blossoms.
By a process known as enfleurage, which is the exposure of beef fat to fresh flowers in closed boxes until it is thoroughly permeated and charged with their odors, the perfumes of various flowers are obtained which could not otherwise be so effectively preserved apart from the fresh petals. These flowers are violet, jasmine, tuberose, rose, orange flower and cassia cinnamon flowers. From these six there are fifty or more combinations made for the stimulation of the odors of other flowers. Sweet pea is made with orange flower and jasmine, hyacinth is counterfeited by jasmine and tuberose and the lily of the valley by violet and tuberose.
The resources of the perfumer are, however, by no means confined to the potpourris, as the scented fats are termed. He uses many essential oils, the principal of which are sandalwood, bergamot, lemon, rosemary, neroli (made from bitter orange flowers), patchouli and attar of roses. The latter, which is not now used so much as formerly, is very difficult to obtain in a pure state, because its great contempt to dishonest adulteration. Very often geranium oil is substituted for it. Musk is another important ingredient, entering as it does, into almost all perfumes except those that actually are imitations of flower odors or, as styled by perfumers, "naturals"—as, for instance, the heliotrope, tuberose, white rose and violet.—New York Press.

The Music Seethed Him.
In his book "My Life's Pilgrimage" Thomas Catling gives an interesting glimpse of Gladstone in the Midlothian campaign of 1880:
I happened to meet an organist from Edinburgh, who told me that in the throes of that electoral fight Mr. Gladstone soothed and steeled himself with music. Having arranged a time for the organ practice, he was provided with a key, by means of which he could enter the church quite privately. Silently and alone he would sit in one of the pews with his forehead resting on his hands while the organist played over a number of familiar and impressive hymn tunes. The listener neither looked up nor spoke until the hour compelled him to move. Then, with a "Thank you," he passed out to throw himself again into the bustling political contest.

Forestalled.
"Widow" said the observing man, "are very attractive, but about a widower there is always something uneasy, something almost clammy—I mean, of course, from the matrimonial point of view."
"I know a widower who is thinking of marrying again. He thought he'd broach the matter delicately to his morning to his little daughter, so he said:
"Ah, my dear, how I did love your mother!"
"But the little girl gave him a suspicious look and snapped:
"Say 'do,' not 'did,' papa!"—Washington Star.

His Mexican Commission.
"Yes, he's a very merry wag. The last time he went to Mexico his wife asked him to bring back some of the embroidery work for which the country is famous. When he reached home he handed her a box containing half a dozen human teeth.
"Ah," she cried, "what's this?"
"Mexican down work," he trippingly replied.—Cleveland Plain Dealer.

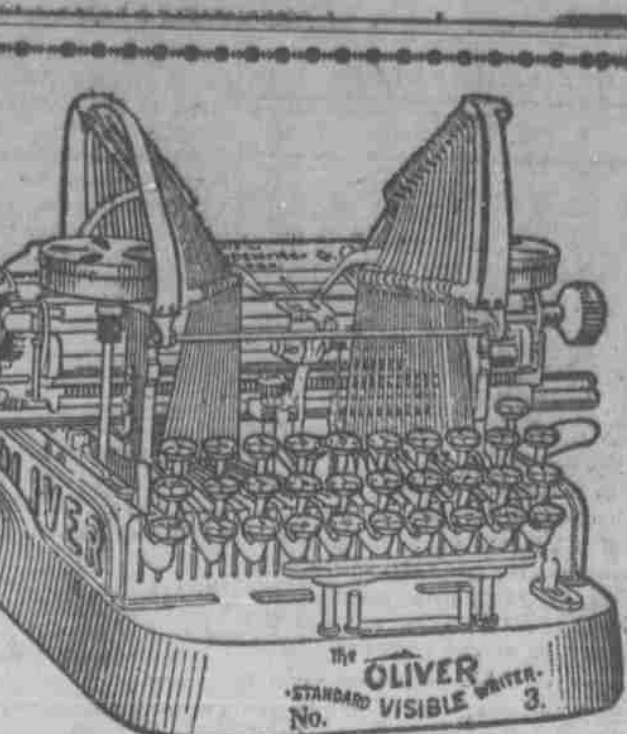

Not Missing Much.
"How do you like this grand opera, Eli?"
"I can't understand what they are saying."
"That's all right. You ain't missing no jokes."—Pittsburg Post.

The Irony of Fate.
"What is your understanding of the irony of fate?" asked the bashful young man.
"Well," the beautiful girl replied, "if two fellows should fight over me and I should get into the papers I should think that was about it."—Chicago Record-Herald.

You Can Easily Operate This Typewriter Yourself
Don't worry your correspondents. Don't write him anything by hand that takes him time to make out—that may leave him in doubt that is can't easily read.
And don't fill out legal papers or card memos—or make out accounts or business letters in your own handwriting.
It looks bad, reflects on your standing, makes people think you can't afford a stenographer, and is sometimes ambiguous.
You can write out your letters—make out an abstract—fill in an insurance policy—enter your card memos—make out your accounts, or a hotel menu—or do any kind of writing you need, on any kind, size or thickness of paper, and space any way you want to.

The OLIVER Typewriter
You can write any of these things yourself if you do not happen to have a stenographer.
For you can easily learn, with a little practice, to write just as rapidly, and as perfectly, as an expert operator on the OLIVER. Because the OLIVER is the simplified typewriter. And you can see every word you write. About 90 per cent more durable than any other typewriter, because it has about 80 per cent less wearing points than most other typewriters. Eighty per cent easier to write with than

these other complicated, intricate machines that require "humoring"—technical knowledge—long practice and special skill to operate, than machines which cannot be adjusted to any special space—with which it is impossible to write abstracts, insurance policies, or old-sized documents except you buy expensive special attachments requiring experts to operate.
You can adjust the OLIVER to any reasonable space—you can write on any reasonable size and thickness of paper, write out to the very edge, without the

THE STANDARD VISIBLE WRITER
aid of any expensive attachment or special skill, and your work will be neat, appearing, legible and clear.
For the OLIVER is the typewriter for the doctor, the lawyer, the insurance agent, the merchant, the hotel proprietor—or any man who does his own writing.
Write us now for our booklet on the simplified features of the OLIVER.

Notice of Forfeiture.
To Fannie Whaley and Margaret Wright and their heirs, executors, administrators and assigns and to any and all persons claiming an interest in or title to the American Mining Claim, derived from the said Fannie Whaley and Margaret Wright.
You and each of you are hereby notified that the undersigned, as co-owner, has expended the sum of \$100.00 for the year 1910 in improvements and labor on the following described mine or lode mining claim situated in the Fremont Mining District in the County of Grant and Territory of New Mexico, to-wit: American mine, the location notice of which is of record in the office of the Probate Clerk and Ex-Officio Recorder of said Grant County, in Book 19, on page 45-46 of Mining Location Records; that the same sum of money was expended in order to hold said mining claim under the provision of Section 2305 of the Revised Statutes of the United States, and all amendments thereto, being the amount required to hold same for the year ending Dec. 31, 1910; that the undersigned has paid and expended as your proportion of the annual labor upon said mining claim for the said year of 1910, the sum of \$50.00, and that if within ninety days after this notice by publication, you fail to refuse to contribute your proportion of such expenditures as co-owner, your interest in said mining claim will become the property of the undersigned, your co-owner, under said section 2325. Dated at Deming, New Mexico, April 24, 1911.

United States Land Office,
Las Cruces, New Mexico
NOTICE
Notice is hereby given that on the 21st day of March A. D. 1911, the Santa Fe Pacific Railroad company, made application at the United States Land office, at Las Cruces, New Mexico, to select under the Act of April 21st, 1904, (30 Stat. 211) the following described land, to-wit: Southwest Quarter, Section Twenty-two, Township 30 South, Range 10 West, New Mexico Meridian, New Mexico.
The purpose of this notice is to allow all persons claiming the land, and adversely, or desiring to show it to be mineral in character, an opportunity to file objection to such location or selection with the local officers for the land district in which the land is situate, to-wit: at the land office aforesaid, and to establish their interests therein, or the mineral character thereof.
JOSE GONZALES,
Register.

His Equivocal Answer.
The blushing girl buttonholed her fushed fiance.
"Well, Egbert," she murmured, "did papa give his consent?"
Egbert drew himself up stiffly.
"He did not commit himself either way," he responded.
"Then are we or aren't we engaged, Egby?"
"I do not know," answered Egby, still stiffly.
"But what happened?"
"This," said Egby more stiffly than ever. "I went in and said: 'Sir, I wish to marry your daughter. Have I your consent?' He turned and looked at me a minute, then he grew red in the face, then he grabbed me, then he lifted me up, then he threw me over the banisters. But whether he is in favor of our engagement or not, Ethelbrite, he did not say."

Beginning of the Drama.
The theater in the only sense that is worth considering was born in Athens. Both tragedy and comedy spring from feasts in honor of Bacchus, and as the jests and frolics were found to be out of place when introduced into graver scenes a separate province—the true drama—was formed and comedy arose. The father of the Greek comedy was Aristophanes, who had lots of fun lampooning the public men of Athens. The creator of Greek tragedy was Aeschylus, born B. C. 525. In sublimity Aeschylus has never been surpassed. He is to the drama what Phidias and Michelangelo are to art.—New York American.
