Does Saving ONE or TWO MEN At the Cutter Mean Anything

in ensilage cutting time? Self Feed on "Ohio" cutters does that and more, and increases capacity 33 1/3 %.

1903 "OHIO" Blower Elevators

solve the Blower problem. They successfully elevate ensilage into silos up

to any height, as demonstrated by abundant proof in 1903 catalogue. 10 and 12

The Success

The Manure Spreader which results from 25 years experience in building.

Doubles Manure Values.

For 25 years we have manufactured the Kemp Manure Spreader. It is the machine that made mechanical spreading of manure a success. Its fame has become world wide. We still manufacture it in its improved form. The "Success" embodies all the advantages of the celebrated Kemp, with certain improvements, which make it the unquestioned peer of all spreaders.

Its Mission is the spreading of all manures, no matter what the character or condition, and all commercial fertilizers. Makes the manure go twice as far and secures better results. Its

Special Features are positive in character, tested and proven thoroughly practical. Among them are: Beater Freeing Device, Direct Chain Gearing of Beater, Separate Control and Working of Beater

and Apron, Automatic Return of Apron, Device to Regulate Quantity of Manure Spread, etc.

Its Handling is all from the seat. It spreads any quantity per acre, changes to fast or slow instantly, unloads in 3 to 5 minutes, stops apron and ceases spreading while beater revolves full speed for bridge and swale crossings, etc.

Construction is the best possible from materials proven best by experience. Every part positive and perfect working; draft the lightest, least breakages and repairs. Made in 4 sizes. We

Guarantee to replace free any part breaking from defective material or workmanship. The Success Catalogue fully describing and showing why superior, with valuable chapter on fertilizing, mailed free.
