WARM KNICKERS FOR BABY

These Are Suitable for Either Indoor or Outdoor Wear and Not at All Hard to Make.

This little garment will be found very useful for either in or outdoor wear when the feet do not need to be covered too. It is very easy to make, and would require about two ounces of white Andalusian, and a suitable bone hook.

Work a chain ten inches in length, turn and work a double crochet into each chainstitch, * turn with one chain, and work a double crochet in the back thread of each stitch in the previous row; repeat from * until the work is 24 inches long—more or less as may be required. Join the last row to the foundation chain with single crochet, and fasten off.

Fold the work so as to bring the seam to the middle of the back. Sew

OVERALL KNICKERS.

the two lower edges together for about three inches in the middle, that is 1 1/2 inch on each side of the seam. This will leave an opening on either side the join for the legs, round each of which work as follows:

First Row: A double crochet with one chain between into every other stitch (each rib) all round.

2nd Row: Work up a loop through each of the first four stitches of the previous row (5 loops on hook), wool over and draw through all the loops at once, and make a chainstitch to hold them together, * work a loop under the chainstitch just made, another through the back thread of the last loop of the previous group, and one into each of the next two stitches; draw through all five loops at once, secure with a chainstitch, and repeat from * all round.

3d and 4th Rows: Same as last, but pass over the end stitch of each row so as to decrease a little.

5th Row: Two trebles with two chains between into every other stitch all round.

6th Row: Five trebles with a chain between each under the nearest chain loop, * a double crochet under the next, five trebles with a chain between each under the next, and repeat from * all round.

7th Row: Four chain under each chain between the trebles, and a double crochet on the double crochet between the groups.

The fifth row to be threaded with a chain and tassels of wool, or with narrow ribbon, as preferred.

Round the top work a treble with one chain between into every other stitch all round.

Last Row: Four chains under each chain between the trebles. Thread the treble row with a chain and tassels made of the wool.

BOARD TO COUNT PENNIES

Simple Contrivance Used by Government Employees for the Purpose.

A million pennies a day—that is the capacity of a strange machine which Uncle Sam uses in the Philadelphia mint to count the coin of smallest value made by the government. The machine, known as a counting table, is exhibited in the government building as a part of Uncle Sam's \$500,000 display at the Lewis and Clark exposition.

The counting board is about as large as a big kneading board such as housewives use. The surface of it is wide enough to hold a row of 40 pennies. When the pennies are to be counted several thousands are heaped onto the board, which is placed above a hopper. Then an operator tips the board backward and forward and sideways, so that the pennies slide about and finally settle in the grooves made by the brass partition strips. When the board is full there are 1,000 pennies on it. It is then dumped into a receptacle just outside the hopper, and the pennies which have slipped off the board into the hopper are caught by a box beneath. Pennies are coined only at the Philadelphia mint, and the government finds the coinage of them profitable, because the value of the metal they contain is only about three-fourths of a cent.

NAUGATUCK NUGGETS.

REASONS

WHY PUPILS SHOULD ATTEND THE

Waterbury College

BECAUSE—It has the Ablest Faculty.
BECAUSE—It is the Leading and Largest Business School in this section of the state.
BECAUSE—It has Individual Office Desks.
BECAUSE—It has more Smith-Premier, Remington and Underwood Typewriters.
BECAUSE—It teaches the leading systems of Bookkeeping and Shorthand.
BECAUSE—It is the only school in this section whose pupils do work with pupils in other business schools.
BECAUSE—It has One Price and no "Confidential Terms."
BECAUSE—It fills more positions.

HOW NICE

It is to find yourself on an equality with those who dance the correct and beautiful Glide Waltz and Military Two-Step. A large difference there is between the common "shindy" style of dancing and that which is taught in this school of graceful deportment. A course of 12 lessons learns you to dance properly. Two classes weekly. Daily private lessons in ballroom and stage dancing.

PROF. BAILEY
