She was born Nov. 22, 1822, and was therefore well advanced in her 80th year. She was married to Mr. Robinson on the 9th of December, 1847, and on Dec. 9th, 1897, they celebrated their Golden Wedding. Their union was blessed with five children, one daughter who died in infancy, and four sons, viz: N. P., S. D., W. D., and J. P. an inspiration to all who came in contact with her. The mortal remains were laid to rest in Shiloh church yard Thursday afternoon, after funeral services conducted by her pastor, Rev. W. C. Ewart. The sudden death of Mr. E. P. McKissick yesterday morning at Norfolk was a great shock to his friends in Columbia, where he had many. Few men in the state were better known than he or were more popular. ## Skeleton in a Trunk.

Rappahannock, Va., Sept. 29.—Bayard Wright, local agent for the Weems Steamship company, today discovered a skeleton in a trunk which had been stored in the company's warehouse here for about eight years. The skeleton was apparently that of a child about 12 years old. Some tattered clothing hung around the remains. The trunk was rather more than medium size, and the body was considerably bent in order to get it inside. The trunk and contents were thrown into the river and were carried down stream by the tide. There was no name or address of any kind on the trunk. Mr. Wright thinks it was brought here on one of the Weems steamers.

## New Use for Refined Paraffine Wax.

A new and important use for Refined Paraffine Wax seems to have been discovered by a prominent resident of Ohio, living near Lancaster, who had two trees badly damaged by storm, one being a maple and one an apple. In each case a large limb was broken down from the trunk, but still attached to it. The limbs were propped up and fastened securely with straps, much as a broken leg might be fastened with splints, and then melted refined wax poured into and over all the cracks. The "surgical operation" was entirely successful. The Paraffine prevented the escape of the sap, kept out the rain and moisture which would have rotted the trees, prevented the depredation of insects and the limbs seem thus far to be perfectly re-attached to the trees.
