### SURPRISED HIM.

Major Off Says Arizona Will Beat the World.

Major J. W. A. Off, cashier of the State Bank and Trust Company of this city, returned a few days ago from a week's trip through Arizona, going as far south as Naco, on the boundary line between the United States and Mexico.

In a chat with a representative of the Mining Review Major Off expressed his pleasure and surprise at the evidence of prosperity he saw at every point in the territory, more particularly at the activity in the mining regions. "Never in my life," said Major Off, "on any state or territory have I seen such activity in mining as I witnessed in Arizona."

On the mines in the neighborhood of Bisbee, where he made his longest stay, he spoke in terms of rapture of the magnificent plant of the Copper Queen. "But," he added, "there is no reason to doubt that many of the copper properties adjoining the Copper Queen will, when fully equipped, prove to be as good if not better paying mines than those of the Queen. Take, for instance, the Lowell, the South Bisbee or the Costello claims; any and all of them, in my opinion, possess copper ore, bodies equally as rich, if not richer, than those of the Copper Queen. As you know, a number of people who are shareholders in the Calumet & Hecla copper mines of Michigan lately purchased some eleven claims of the Costello group, and for which they are to pay \$500,000. None of these claims are developed, but it is not to be supposed that people who are familiar with the ore bodies of the Calumet & Hecla mines would agree to pay half a million dollars for eleven undeveloped copper claims in Arizona unless they knew pretty much to a certainty what they were buying. No, no, that is not likely."

Major also spoke of the country about Wilcox, and of the mines at Dos Cabezas, and then said: "I went as far south as Naco, just inside of the Mexican line. It is a wonderful little town. It is only a few miles but it has a lively population of 300. True, its prosperity has largely come through trade from Sonora. Both the American and the Mexican governments are going to move their custom houses to Naco."

In conclusion Major Off said: "As I have told you, Arizona is to me a wonder. I did not expect to see such business activity, and from what I saw and learned I am convinced that within five years from this Arizona will be the greatest producer of metals in the world, no other state or country excepted."—Los Angeles Mining Review.
